Dressing a House! HOMES

TOWN COUNCIL.

Council Chamber,
April 5th, 1910.

Council met in regular session on Monday evening, Reeve Alexander presiding.

Councillors present - Messrs. Meng, Waller, Kimmerly, Hawley, Osborne. The minutes of the last session were read and approved.

Councillor Steacy entered. Mayor Simpson entered and assumed the chair.

COMMUNICATIONS.

From Public Works Department, Ottawa, offering to do the necessary wiring to illuminate the town clock, if the town supply the current for same. Laid on the table.

From the Board of Railway commissioners re the matter of protection of Centre street crossing railway in Napanee the Board has made an order adding the town and the Bay of Quinte Railway as parties to the matter. Fyled.

From Electric Light Commissioners asking for seven hundred dollars for capital expenditure on Electric Light plant, same to be placed to their credit to be used as desired. On motion of Couns. Waller and Osborne no action was taken. Carried.

From Electric Light Commissioners, re, trimming of trees to clear the electric light wires. On motion the trimming of the trees was ordered done under the superintendence of the street commissioner.

From Mr. W. A. Rose asking to be appointed assessor for this year and from Mr. W. H. Garrison also asking for the same appointment. Laid on the table.

Messrs. T. G. Carscadden and Thos. Johnston were present and heard in reference to the extension of the sewer on Dundas street, from Donald street to the creek on Dundas street. Mr. Carscadden's cellar is flooded annually on account of the defective sewer on Dundas street. On motion the matter was referred to the street committee to go into the matter, secure estimates and consult with the ratepayers who will be financially interested in the sewer.

Petitions for cement walks were read from Mr. H. V. Fradick for walk on Adelphi street in front of his new house.

From Willis J. Campbell petitioning for walk in front and on side of his property.

From C. A. Anderson & Son, John Allison and V. Koubek asking for cement walk on Dundas street in front their respective properties. All walk petitions were referred to the Streets committee to report.

REPORTS.

The Finance Committee presented the treasurer's report to April 1st as follows:

Balance	\$2702 17	2620 81	191 40	223 72	32 20	135 30
Expended	\$297 83	2370 19	105 60	176 25	17 80	61 70

1867.

**Why not try us with
your spring order.**

J. L. BOYES,

Date of "Exams."

Students may now begin to look forward in earnest to the mid-summer examinations. The department of education has issued the schedule and time-table for these annual tests.

The examinations for entrance to normal schools begin on June 27th at 9 a. m., and are concluded on July 4th with Latin composition the last subject. For entrance to the faculties of education the examinations begin on June 28th, and are terminated on July 11th. Honor and scholarship matriculation "exams" begin on July 12th while for pass matriculation the first paper is on June 27th and the last on July 8th.

Commercial specialist examinations begin on June 27th and are concluded on July 11th. The art specialist examination for 1910 will be held on August 9th and 12th, at the Department of Education of the summer school at the University of Toronto.

Household Syringes etc.

Overdraft in Merchant's Bank \$6218.07.

The report was referred back to the treasurer for correction.

The council went into the committee of the whole on the second reading of a by-law to appoint an assessor, Mr. Steacy in the chair. The blank for the name of the assessor was on motion filled in with the name of Mr. Allan Neilson. The salary was fixed at the sum of one hundred and seventy-five dollars.

The council rose and reported the by-law, read a second time with the blanks filled in.

On motion the by-law was read the third time signed, sealed and finally passed.

On motion the town accepted the proposition of the Minister of Public Works to wire the town clock, the town to furnish the current.

The Tenders for Supplies were taken up. Wm. Vine tendered for either sprinkler at \$3.00 per day, team work at same price; John Benn, small sprinkler and team work at \$2.50 per day.

On motion W. C. Vine's tender was accepted for large sprinkler at \$3.00 per day, teaming at same price when so employed.

On motion the tender of Mr. John Benn for small sprinkler and teaming at \$2.50 per day was accepted.

Mr. Sam Howard's tender for care taking of the Harvey Warner park at \$100.00 for the season, was accepted.

On motion M. S. Madole's tender for cement was accepted.

Robt. Light's tender for plank and cedar stringers, was accepted.

M. S. Madole's tender for 3, 4, 5, 6 and 7 in. wire nails, was accepted.

M. S. Madole's tender for the various sizes of tile, was accepted.

Geo. Sampson's tender for ballast at \$1.00 per yard delivered, was accepted.

On motion Wm. Louck's tender for stone at 25cts. per load at the quarry, was accepted.

On motion the auditor's report was referred to the finance committee.

On motion a load of rubble was declared to be a yard and a quarter.

The people very much regret the resignation of the public-school teacher, George Brooks, who has been advised by his physician to give up teaching for a time on account of throat trouble. He will be greatly missed by the young people, as he helped to enliven their gatherings. The present teacher is Miss Gould, of Ernestown.

Joseph Hicks, of Bardolph met with a painful accident on Saturday evening last, when he was kicked in the face by a colt, receiving an ugly gash. The doctor put four stitches in the wound.

Percy Hawley is getting better. Mr. and Mrs. W. Miller entertained several friends recently.

Mr. and Mrs. George Birch entertained on Monday evening.

ODESSA

Mrs. W. C. Smith has returned home from Belleville, where she has spent the last month with her son.

Joe Smith spent Sunday at home.

Mrs. Cartwright Parrott passed away on Saturday night after a lingering illness. The funeral took place on Tuesday to the Methodist church.

Mrs. Jeremiah Snider and Mrs. Charles Snider spent last week with Mrs. Snook, at Napanee.

A. D. Perry, of Brockville, attended the funeral of his sister, Mrs. C. Parrott.

Much sympathy is felt for the friends of the late Mrs. Geo. Turner, of Kingston, who passed away on Sunday.

Two little strangers have taken up their abode in the village, one at Mr. Kenyon's and one at Mr. Munro's.

The automobile stage running from Kingston to Odessa has again started and will run regularly.

On Thursday evening the friends of A. P. S. Donaldson, manager of the Northern Crown Bank, Odessa, tendered him a banquet on the eve of his departure for Winnipeg, where he has been ordered by the bank. Speeches were the order of the evening and everyone wished Mr. Donaldson success in his new home and all indeed were sorry to lose him from our village, where he has been a very capable and obliging manager.

Forty undesirable have been deported from Ontario during the last month the largest number since the policy of deportation in conjunction with the department of the interior was begun.

M. S. MADOLE

.. CANADA—FRIDAY, APRIL 8th, 1910

\$1 per Year in advance: \$1.50 if not so paid.

NEWS NOTES.

The steamer Aletha starts on her regular route on Friday.

A new powerful search light has been installed on the steamer Brookville.

The steamer Pierrepont made a trip from Kingston to Cape Vincent on Monday.

Brookville's tax rate for 1910 is twenty-six mills on the dollar, an increase of two mills over 1909.

Capt. Bernier, of the steamer Arctic, is preparing for his dash to the north polar regions next June.

The steamer Reindeer will start on her regular route on Monday, April 11th. Capt. W. F. Bristol in command.

Victoria Day will be celebrated in Kingston as usual this year, and preparations for a big day's sport are under way.

Because he would not tell where he secured his whiskey Michael Hogan was sentenced to the county jail for three months, at Kingston Monday.

Hon. Adam Beck, Ontario's minister of power, met with a painful accident in London. He broke an ankle, and will be on crutches for some weeks.

The Grand Trunk mail train jumped the track at Shannonville on Monday, causing a delay of about 4 hours. No damage was done to train or passengers.

Marie Corelli, the novelist, is dangerously ill with pneumonia, at Stratford-on-Avon Shakespeare's birthplace, in England. Her condition has given serious alarm to her friends.

The next fourth of July will be noiseless in New York. Mayor Gaynor has decided that no permits for the retail sale of fireworks between June 10th and July 10th will be issued.

Three of the moving picture shows in Kingston have been fined for allowing the theatres to be overcrowded. The Princess was fined \$10, the Bijou \$5 and the King Edward \$2.

Owing to some part of the street lighting machinery being disabled the town of Picton has been in darkness for the past week. It will be about another week before the machinery will be repaired and in running order.

Daniel McLean, Collins Bay, a sailor, about sixty-eight years of age, was taken to the Kingston general hospital on Saturday evening suffering from three fractured ribs, caused by being run over by a heavy wagon.

There has been an alarming number of people bitten by dogs in Brockville lately, so much that with a view to curtailing the number of curs running at large the council enacted a by-law increasing the license fee from \$2 and \$5 to \$5 and \$10.

Alderman McGuinness, of Belleville, who was arrested for shooting holes in the door and windows of the police station in that city because he could not secure the release of a prisoner, has resigned from the city council and his resignation has been accepted.

On the authority of Capt. B. F. Osborn, one of the most active supporters of Dr. Frederick A. Cook, the explorer, it is announced that about \$175,000 had been guaranteed towards a fund to help Dr. Cook prove his claim to discovery of the north pole.

The steamer Salaberry, formerly the property of the Lehigh Portland Cement Co., which has been undergoing repairs during the winter at Deseronto and recently purchased by the Adolphustown, Picton and Napanee Navigation Co., will go into commission just as soon as navigation opens. The steamer will run between Prinzyer's Cove and intermediate ports to Napanee.

Kingcardine Reporter—"Toronto papers are throwing all sorts of bouquets at J. C. Eaton, in recognition of his \$250,000

William G. Parker, of London, aged sixty-five, died after being continually in bed for 35 years. Parker was a house painter, and in 1874 while at work, he fell from a church steeple and injured his spine so seriously that he could never move. Throughout his illness he has been attended and cared for by the Oddfellows, to which order he belonged.

Over one hundred men—inmates of the Central Prison—will travel to Guelph under escort this week to "learn farming." Work will be commenced at once. The tract of 800 acres, purchased recently for the purpose of establishing a Central Prison, under conditions under which the criminal can go back to the land, came into the formal possession of the province Monday.

William Colwell, an employee of the Seymour Light and Power company, working on the power line to Sulphite, was drowned in Clare river near Tweed, Sunday. He and a companion had taken out an old log canoe for a paddle and by accident the canoe was upset. His companion swam to shore, but Colwell being unable to swim was drowned. The body has not as yet been recovered. Colwell was twenty-four years of age and unmarried.

Lawns and Flower Beds.

Use the "Monet Royal" lawn grass seed. A special mixture of the best in grass seeds for lawns and cemetery plots. Also a fresh supply of choice flower seeds, Sweet Peas, Nasturtiums, &c., at The Medical Hall, Napanee's Largest Drug Store—Fred L. Hooper.

Napanee Cemetery Company.

A special meeting of the above company will be held in the Council Chamber, on

Tuesday, 12th April, 1910

at 2 o'clock p.m. for the purpose of considering plans and specifications for a new vault. A large attendance is requested, as this is an important matter.

Kincardine Reporter:—"Toronto papers are throwing all sorts of bouquets at J. C. Eaton, in recognition of his \$250,000 gift for a surgical wing to the new General Hospital and he deserves every nice word that has been uttered. The gift is a princely one, and will assist in establishing a magnificent and much needed hospital in that city. But—there frequently is a "but" in the case. But who pays the shot? Where did J. C. Eaton get enough long green to be able to throw it around like this? He got it from the people of Toronto, and all Ontario—Canada, one might also say. And he got it honestly, we hope. Still, the point we wish is this: that John C. Eaton has never paid one cent to the support of our churches—has never paid a cent towards any public improvement in our town. Then why does he drain the sheekles of our district?—for he does. The answer is simple. He is a past member of the art of advertising. When spending huge sums of money annually for publicity he does so wisely. He does not skin the printer, but pays full account for the value received. The result of his publicity is told by the express companies, and the mournful faces of rural merchants, who view with alarm the increasing tide of Eatonism. They view the result, but ignore the cause. The man who observes the cause and follows suit does his share to stop the tide, for the people will buy from the advertiser and will ignore the non-advertiser in the long run."

Children Cry FOR FLETCHER'S CASTORIA

Painters on Floor Paint.

First you must select a good drying paint, one that dries hard and can be walked on, second one that when it does dry it won't mop off and thirdly it must cover well to be economical for the user. We have gone most thoroughly into the paint business and after trying all kinds of experiments we have proved to our satisfaction that Ramsay's and the Prism Brand will cover more surfaces (1 gallon 100 square feet) and dry better and wear longer than any other kind. If you want good paint get it at Wallace's Drug store.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for restoration of, and additional story to Military Stores Building, Ottawa, Ont." will be received at this office until 5 00 P. M., on Friday, April 15, 1910, for the work mentioned.

Plans, specification and form of contract can be seen and forms of tender obtained at this Department.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures, with their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupation and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, equal to ten per cent (10 per cent) of the amount of the tender, which will be forfeited if the person tendering declines to enter into a contract when called upon to do so. If the tender is not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,

NAPOLEON TESSIER,

Secretary.

Department of Public Works.

Ottawa, March 21, 1910.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

Synopsis of Canadian Northwest Land Regulations.

ANY person who is the sole head of a family, or any male over 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any agency, on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties—Six months' residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 81 acres solely owned and occupied by him or his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may pre-empt a quarter section alongside his homestead. Price, \$300 per acre. Duties—Must reside six months in each of six years from date of homestead entry (including the time required to earn homestead patent, and cultivate fifty acres extra).

A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may take a purchased homestead in pre-empted districts. Price \$300 per acre. Duties—Must reside six months in each of three years, cultivate fifty acres and erect a house worth \$200.00.

W. W. CORY,

Deputy of the Minister of the Interior.

SPRING REMINDERS OF RHEUMATISM

Raw, Damp Weather Starts the Pain, But the Trouble Lies in the Blood.

Changeable spring weather, often raw, cold and damp, is pretty sure to bring a time of misery to people who suffer from rheumatism. But it must be borne in mind that it is not the weather that causes rheumatism, the trouble is rooted in the blood—the damp, changeable weather merely starts the aches and often almost unbearable pains going. The trouble must be reached through the blood, and the poisonous rheumatic acids driven out. This is a medical truth every rheumatic sufferer should realize. Liniments, outward applications and so-called electric appliances, never did, and never can, cure rheumatism. The sufferer is only wasting valuable time and money with this sort of treatment, and all the time the trouble is becoming more firmly rooted and harder to cure. There is just one sure way to cure rheumatism—Dr. Williams' Pink Pills. They act directly on the impure, weak, acid-tainted blood. They purify and strengthen it and so root out the cause of rheumatism. Mr. John Finnamore, Marysville, N. B., says: "I was laid up with rheumatic fever for a year, and for eight months of that time I could not go about. My blood had seemed to turn to water, and the pain I endured was at times almost unendurable. Notwithstanding I was under the doctor's care I was not regaining my strength and I decided to give Dr. Williams' Pink Pills a trial. I took altogether nine boxes and they simply worked wonders in bringing back my lost strength. I still take the Pills occasionally as I am working in a saw mill where the work is pretty heavy."

Not only rheumatic sufferers, but all who have any trouble due to weak, watery blood, will find a cure through Dr. Williams' Pink Pills. It is because of their direct action on the blood that these Pills cure such troubles as anaemia, indigestion, general weakness, neuralgia, and the aches, pains and secret troubles women folk alone know. Give Dr. Williams' Pink Pills a fair trial, and they will not disappoint you. Sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

YEW TREES.

The Germans have started a movement, which has Government support, for preserving a small forest of yew trees situated among the Bavarian highlands, near Munich, says the Westminster Gazette. Accidentally, when the wood was felled for bows, the yew, of which Caesar says there was "great abundance in Gaul," seems to have been widely distributed throughout Germany. It is now nearly extinct. The little Bavarian forest, which has been badly damaged by peasants, who covet the foliage for decorative purposes, covers about 350 acres, and the ages of the trees vary from thirty to three hundred years. These are, of course, mere

THE MYSTERY CLEARED UP;

OR, THE HERITAGE OF MADAME
YALTA.

CHAPTER IV.—(Cont'd)

"Where is he?" Alice asked quickly.

"This morning I could have answered you, but I have just promised the countess that the secret should rest between us two."

"Of me also she exacts secrecy. That house is full of mysteries."

"I begin to think so. We will abstain from mutual questionings. But I may, at least ask what course you mean to take. What will you say to your father, to Vignory? My uncle is persuaded that all is satisfactorily arranged; Vignory rests in absolute security. Do you intend to leave them to their illusions?"

"No," replied Alice. "I shall tell my father to-day that I have changed my mind and do not mean to marry."

"Diable! your father might take you at your word. You will not marry Vignory, but neither will you marry Robert."

"It is my dearest wish not to marry at all."

"My dear Alice, I believe you do not say what you think; but this is not a moment to discuss it with you. One word, however. Do not come to any decision for a few days, and above all do not declare yourself. It is more than will be needed to decide what course to take with respect to M. de Carnoel."

"You are then on his side?" asked Mlle. Dorgeres, with emotion.

"Yes; I am even astonished that I should have given in for an instant to the foolish suspicions that were so easily admitted."

"Your friend Vignory does not think with you."

"I feel less sure of Vignory since the countess has touched on certain inexplicable points in his conduct."

"Ah! at last!" cried the girl. "Then I may speak. You will understand me when I say that in a moment of anger and despair I engaged myself to this man, but I would die sooner than marry him. If he had any heart he would never have accepted what I had to offer—indifference and a large dowry. His resignation is but calculation; his gentleness, baseness."

"You go rather far," said Maxime; "but I have not the heart to blame you, and, I repeat, you may count on me. Here we are at the Boulevard Haussman. I do not know that I shall see you to-morrow. Write to me if anything occurs to make you wish for me; and then, perhaps, I may be able to tell you what the countess desires me to conceal for the present concerning Robert de Carnoel."

"And I," murmured Alice, lowering her voice, "can perhaps tell you what I have just seen at her house."

CHAPTER V.

After the revelation that followed

His ride was marked by no incident and had no effect of enabling him to collect his ideas. He said to himself that he might at any time be released from an embarrassing position by liberating M. de Carnoel, promising him his support as the price of his silence. And confiding in his savoir-faire which had extricated him from more difficult positions, he returned to the city with a tranquil mind, proposing to pass the evening according to his fancy.

He dismounted at the door of his club, and intending to dine there, sent away his horse and groom.

He found what he sought, a place at a whist table, and that nothing should mar his satisfaction he had unusual good-luck, and when he rose to make his toilette for the evening had won a considerable sum.

It was his habit to make up a party here from four to six, and in that case his valet de chambre had orders to bring him his dress for the evening.

He was putting the finishing touch to his toilette, when a card was placed in his hand from a gentleman who wished to speak with him on urgent business. The name was unknown to him, and the card had a peculiar mark in the corner.

Quite surprised to see this sign, which was understood only by the attaches of the Third Section and by those only of a certain grade, the colonel decided that he could not dispense with giving audience to the man who made use of this sign, and could shorten the interview if the subject seemed not worthy of his attention.

On entering the parlor of the club, he found there a young man of fine presence and elegantly dressed, who welcomed him by a phrase in the Russian language, a phrase more significant than the mark on the visiting card. There was no longer room to hesitate. The newcomer belonged to the political police, and occupied, too, a high place in it.

The question was, why had he come to Paris, and Borisoff experienced a vague disquietude.

"My dear Alexis Stepanowitch," said the unknown, addressing him, according to the national custom, by his first name followed by the Christian name of his father, "this is not a favorable place for talking; let us dine together at a public house."

"Willingly," replied the colonel, who felt the necessity of putting on a good countenance; "which would you prefer, my dear—Mouriatine?"

"Say Ivan Ivanovitch. Let us go to Begnon's, Avenue de l'Opera. I arrived this morning after sixty hours of express train, and am in need of refreshment."

The colonel showed his compatriot the way from the ante-chamber, and hastened to don his overcoat. As soon as they were on the bou-

RHEUMATISM WEATHER THIS

BUT DODD'S KIDNEY PILLS ALWAYS CURE RHEUMATISM.

What They Did for W. H. Craine, and Why They Always Cure Rheumatism—They Remove the Cause.

Toronto, Ont., May 21 (Special).—In these days of sudden changes of temperature known to so many suffering people as Rheumatism weather the experience of W. H. Craine, of 103 Gladstone Ave., this city, is of widespread interest. Mr. Craine suffered from Rheumatism. He is cured and he knows the cure. It was Dodd's Kidney Pills.

"Yes, I know Dodd's Kidney Pills cured my Rheumatism," Mr. Craine states. "For after I started taking them I used no other medicine. I never cease recommending Dodd's Kidney Pills to my friends."

Dodd's Kidney Pills cure Rheumatism by putting the Kidneys in condition to strain the uric acid out of the blood. It is uric acid in the blood that causes Rheumatism. Cold or damp causes it to crystallize at the muscles and joints and then comes those tortures every rheumatic knows only too well. Dodd's Kidney Pills cure Rheumatism by curing the Kidneys. The cured Kidneys remove the cause of the Rheumatism.

SQUANDERED A FORTUNE.

Young Man Went Through \$125,000 in Four Years.

This young man has had disaster and disgrace brought upon him. Let him be treated as a prodigal," said Judge Parry at the Bankruptcy Court, Manchester, England, in granting the immediate discharge of William Proctor, subject to the debtor signing judgment for a sum of \$500 not to be enforced without leave of the court.

The debtor is a son of the late Mr. James Proctor, a founder and director of the Refuge Assurance Company, and on the death of his father seven years ago he came into an income of nearly \$6,000 a year. In three or four years he squandered the \$125,000 left him by betting, card-playing, and presenting jewelry to women.

Mr. C. D. Allen, giving evidence, said that Mr. Proctor had told him that he was worth \$500,000. They became friendly, but he (witness) denied going to more than two race meetings with Mr. Proctor. They motored together. He had never sold Mr. Proctor any jewelry without the latter's knowledge of the price. He did not know that Proctor was living beyond his means.

"I wonder if that rich uncle of Wilson's remembered him when he made his will? Wilson used to sing to him." "He must have; he didn't leave Wilson a penny."

The merits of Bickle's Anti-Consumptive Syrup as a sure remedy for coughs and colds are attested by scores who know its power in giving almost instant relief when the throat is sore with coughing.

dance in Gaul," seems to have been widely distributed throughout Germany. It is now nearly extinct. The little Bavarian forest, which has been badly damaged by peasants, who covet the foliage for decorative purposes, covers about 350 acres, and the ages of the trees vary from thirty to three hundred years. These are, of course, mere giddy, irresponsible youths compared with many patriarchal yew trees in our English churchyards, one of which inspired a magnificent passage of "In Memoriam."

A WORD TO MOTHERS.

No matter whether baby is sick or well, Baby's Own Tablets should be kept in the home always. They not only cure the minor troubles to which babyhood and childhood is subject, but will prevent them coming on if the child is given an occasional dose of the medicine. Mrs. Geo. T. Walker, Mascouche Rapids, Que., says: "I have used Baby's Own Tablets for constipation and other disorders of childhood and am so pleased with them that I always keep the Tablets in the house." Sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

THE NATURAL PLACE.

Where should a vessel encounter the teeth of a gale?
"I don't know, unless it is in the mouth of a river."

Marion Bridge, C. B. May 10, 1902.
I have handled MINARD'S LINIMENT during the past year. It is always the first Liniment asked for here, and unquestionably the best. I handle all the different kinds of Liniments. I handle NEIL THOMPSON'S.

UNCLE EZRA SAYS:

"Some men listen so intent to hear opportunity knock at their doors that they don't hear their names begin in the wood."

Minard's Liniment Relieves Neuralgia.

Sarah: "I'm not very well, thank you. Nerve pain in my temples."
Jones: "Oh, that must be neuralgia."
Sarah: "Yes, it can't be neuralgia. I've had it once a month."

you should take the countess desires me to conceal for the present concerning Robert de Carnoel."

"And I," murmured Alice, lowering her voice, "can perhaps tell you what I have just seen at her house."

CHAPTER V.

After the explosion that followed the inconsiderate visit of Maxime Dorigeres, Col. Borisoff quickly returned to calmer sentiments. His fits of anger did not last long where grave interests were at stake, and such was the case now, for he had to determine a delicate question on which he felt himself very much in the dark. The proceedings of this hare-brained Maxime proved nothing, unless it were that an almost idiot boy affirmed that M. de Carnoel was retained by force in a house in the Rue de Vigny. The supposition was so unlikely, it could scarcely gain credence anywhere and need not give him very serious concern and the seconds of young Dorigeres not having shown themselves at twelve o'clock next day, there was no longer reason to expect them.

But concerning his prisoner, M. Borisoff's anxieties were great. He could not keep him indefinitely, neither could he release him without exposing himself to the danger of a publicity which he greatly dreaded. To send him to Siberia, the order for which had been given as a last resource, did not remedy anything. It was to cut the difficulty, not to resolve it.

Besides, in his last interview with him, Robert de Carnoel had spoken with so much energy and earnestness that he succeeded in casting doubts in the mind of his jailer.

In the capacity of secret agent this Russian was accustomed to look at affairs from all points, and to change his batteries as often as necessary. He possessed a marvelous suppleness in turning when once he discovered himself to be on the wrong track. And he now began to ask himself if he would not do well to search elsewhere for the accomplice of the thieves. That some one in the banker's house was in league with them was certain, but what proved this to be M. de Carnoel? Why not some other? Suspicion might rest upon the cashier himself as well as upon the secretary.

"What might not have been gained," said the colonel to himself, "if, instead of directing all our efforts toward this young man, we had carefully watched the clerks and valets of the banker? Perhaps there is yet time. I am half tempted to think Vacili is right, and that he must be released on giving his word of honor to be silent concerning the past month."

These perplexities occupied Col. Borisoff all the evening and night after his conversation with M. de Carnoel. Their effect was to induce him to countermand the journey to Siberia. In truth, he feared being reproached for having taken a measure of this sort of such questionable utility. He decided to temperize and to connect himself more closely with M. Dorigeres, in order to study the habits and relations of those around him. And as he felt the need of distraction, he had his horse saddled and went to the Boris attended by a groom after announcing his intention to dine out and to return probably quite late.

"I prefer, my dear M—Mouriatine! Say Ivan Ivanovitch. Let us go to—Begnon's, Avenue de l'Opera. I arrived this morning after sixty hours of express train, and am in need of refreshment."

The colonel showed his compatriot the way from the antechamber, and hastened to don his overcoat.

As soon as they were on the boulevard, which in this locality was quite solitary, the newly-arrived began thus, still in Russian:

"You do not know me, and do not recognize the name of Mouriatine. That is not surprising. I was stationed in our Polish provinces while you were with the general at St. Petersburg, and I returned to the department when you went abroad. My wish is, my dear Alexis, to act with you as comrade. I shall not begin by showing you my written powers, they are, however, at your disposal when you wish. Meanwhile, shall I give you the password?"

(To be continued.)

A GUIDE'S HEROISM.

He Bore a Wounded Comrade Down Mountainside.

While returning to Chamonix from a ski expedition, the guides Jules Favret and Edouard Ravanel were crossing a glacier, when the former fell and broke a leg, says a despatch to The London Chronicle from Geneva, Switzerland. As it would have taken at least six hours to descend to Chamonix and return with aid, during which time the injured man would have been frozen to death, Ravanel determined to carry down his comrade in spite of the fact that his shoulder, which he had dislocated lately, was not healed.

Favret thought the proposition impossible, and begged his friend to let him die. Under ordinary circumstances the descent is difficult in winter, but with a heavy burden it was dangerous. Between four and five hours later, Ravanel reached Chamonix in an exhausted condition, with his unconscious comrade on his shoulders. Favret's life was saved. This is the third guide that Ravanel has snatched from the gate of death in the Alps.

AN AWFUL FALL.

"Spearing of bad falls! ladadu! Speaking of bad falls," remarked Jones, "I fell out of a window once, and the sensation was terrible. During my transit through the air I really believe I thought of every mean act I had ever committed in my life."

"Hum!" growled Thompson; "you must have fallen an awful distance."

CURED OF LAME BACK WHEN 34.

Mr. Samuel Martin, of Strathroy, Ont., passed twenty years of his life in misery, suffering tortures from lame back. He tried nearly all advertised remedies and household recipes, but received no benefit from any of them.

Some months ago, seeing Gin Pills advertised, Mr. Martin purchased a box. The relief which Mr. Martin experienced after he had taken one box, was so great that he knew he had found the right remedy at last. He used two more boxes and is now completely cured.

50c a box, 6 for \$2.50. At all dealers. Free sample if you write National Drug & Chemical Co., (Dept. W. L.) Toronto.

A practical joke is never funny when it's on the first person singular.

made his right wrist. I wish I could sing to him. "He must have; he didn't leave Wilson a penny."

The merits of Bickle's Anti-Consumptive Syrup as a sure remedy for coughs and colds are attested by scores who know its power in giving almost instant relief when the throat is sore with coughing, and the whole pulmonary region disordered in consequence. A bottle of this world-famed Syrup will save doctor's bills, and a great deal of suffering. Price 25 cents, at all dealers.

"What's the use of searching for the North Pole, anyway?" "Why, it would save thousands of dollars if it were found. It wouldn't be necessary to send any more expeditions to look for it."

Minard's Liniment Cures Burns, Etc.

The man who respects the law need not fear it.

We Make the Emphatic Statement that "The D & L" Menthol Plaster will do more to relieve neuralgia, lame back, lumbago and kindred troubles than any other plaster. 25c tin and \$1 yd. rolls. All druggists.

"I say," asked Jenks, as he walked into Bink's shop, sample case in hand, "can a cowhide in a boot shop?" Binks wasn't at all slow. "No," he said; "but calf-skin."

These Pills Cure Rheumatism.—To the many who suffer from rheumatism a trial of Parmelee's Vegetable Pills is recommended. They have pronounced action upon the liver and kidneys and by regulating the action of these organs act as an alternative in preventing the admixture of uric acid and blood that causes this painful disorder. They must be taken according to directions and used steadily and they will speedily give evidence of their beneficial effects.

Few men have the courage to admit they are cowards.

A Sudden chill often means sudden illness. Painkiller is all that is needed to ward it off. Unequalled for cramps and diarrhoea. Avoid substitutes, there is but one "Painkiller"—Perry Davis.

You might do worse than exaggerate the goodness of your friends.

Minard's Liniment Cures Dandruff.

It doesn't take much work to convince a man that he needs a rest.

"Only One 'BROMO QUININE' That is LAXATIVE BROMO QUININE. Look for the signature of E. W. GROVE. Used the world over to cure a Cold in One Day. 25c."

MIXED UP.

A sergeant was once drilling a squad of recruits. They were incredibly ignorant. One of them could not tell his right hand from his left. The sergeant proceeded to teach them, and at last attained some degree of success.

Sergeant—"Now, yer blessed idiot, hold yer hands in front of yer, and twist them round one over the other. Stop! Now, which is your left hand and which is your right?" Recruit (looking at his hands for a moment)—"I'm blowed if I know I've gone and mixed 'em!"

Minister—"My dear little boy, why don't you get an umbrella?" Jakey—"Since pa has stopped going to church he never brings home any more umbrellas."

BRUIN'S BUTTONS.

The inspector in a certain school
asked the boys he was examining:
"Can you take your warm over-
coat off?"
"Yes, sir," was the response.
"Can the bear take his warm
overcoat off?"
"No sir."
"Why not?"
There was silence for a while, and
then a little boy spoke up:
"Please, sir, because God's made
him without any buttons."

Trial is Inexpensive.—To those
who suffer from dyspepsia, indiges-
tion, rheumatism or any ailment
arising from derangement of the di-
gestive system, a trial of Parmelee's
Vegetable Pills is recommended,
should the sufferer be unacquaint-
ed with them. The trial will be in-
expensive and the result will be an-
other customer for this excellent
medicine. So effective is their ac-
tion that many cures can certainly
be traced to their use where
other pills have proved ineffective.

Mamma—"I am delighted at the
interest my boy is taking in his
writing. He spends two hours a
day at it." Visitor—"Really? How
strange! How did you get him to
do it?" Mamma—"Oh, I told him
to write me out a list of everything
he wants for his birthday, and he's
still at it."

As gloomy as Sunshine after a storm is the relief
when an obstinate, pitiless cough has been driven
away by Allen's Lung Balm. No opium in it.

TRAPPED

ONE TO MARY JANE.

Mrs. Tartly and Mary Jane had
arrived at the parting of the ways,
and the mistress thought she could
with safety indulge in a few caustic
remarks.

"Now that you are going, Mary
Jane," she said, "I hope you will
leave in a respectable manner. You
remember when you came your box
was brought in a wheelbarrow. I
would not have mentioned it, but
I am afraid some of our friends
might see you."

"That's all right, mum," answered
Mary Jane serenely. "My new
master and missus are waiting for
me in their motor-car down the
street."

"Why don't they drive up to the
front door?" asked Mrs. Tartly.

"Well, mum," said Mary Jane
blandly, "I expect they don't want
people to think they are visiting
here!"

Holloway's Corn Cure is the me-
dicine to remove all kinds of corns
and warts, and only costs the small
sum of twenty-five cents.

The small streams that feed a
river make its smooth water.

By Brining the Nerves with opium you may
stop a cough, but the inflammation goes from bad
to worse. Allen's Lung Balm, containing no
opium, goes to the root of the trouble and cures
deep-seated affections of throat and lungs.

Beautiful Widow—"Do you know,
I am forty years old to-day?" Gal-
lant Bachelor—"Madam, you are
just twenty. I never believe more
than half of what I hear."

of its kind, given with such satisfaction.

Some people's only aim in life is to look for a larger target.

Minard's Liniment for Sale Everywhere.

TRAPPED.

Of the two men standing at a street corner, one was one of those smart fellows who are always aching to display their smartness.

"Watch me take a rise out of him," he muttered to his companion as a ragged old tramp hove in sight, and started to recite the usual tale of pathos.

"Why, that's not the same story you told me last time you accosted me," said the brainy one, when the vagrant had run down.

The latter looked at him in sorrowful silence for a moment. Then he asked:

"Mebbe not-mebbe not? But I don't remember speaking to you. When was it?"

"Last week."

"That explains it. I'd forgotten meeting you," was the tramp's quiet retort. "I was in prison all last week."

TASTED GOOD.

William and Lawrence were in the habit of saving a part of their dessert from the evening dinner for consumption the next morning, and in accordance with this custom two small cakes had been placed in the cracker-jar for them. William, being the first up, on the following morning and being hungry, went to the jar. He found only one cake, and a large piece had been bitten out of that. Full of wrath, he went upstairs and roused his brother.

"Say," he demanded, "I want to know who took that big bite out of my cake?"

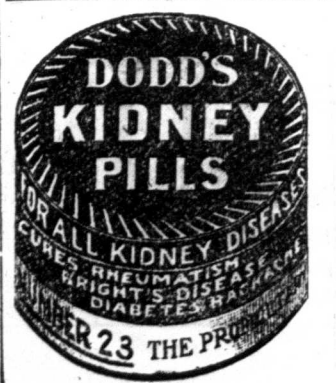

"I did," sleepily answered Lawrence.

"What'd you do that for?"

"Well, when I tasted it I found it was your cake, and so I ate the other one."

As the Oil Rubs in, the Pain Rubs Out. Applied to the seat of a pain in any part of the body the skin absorbs the soothing liniment under brisk friction and the patient obtains almost instant relief. The results of the use of Dr. Thomas' Electric Oil have surprised many who were unacquainted with its qualities, and once known it will not be rejected. Try it.

Tommy—"We're going to move soon." Sammy—"How do you know?" Tommy—"How do I know? Didn't me mother lemme break a winder t'other day and didn't say nothin'?"

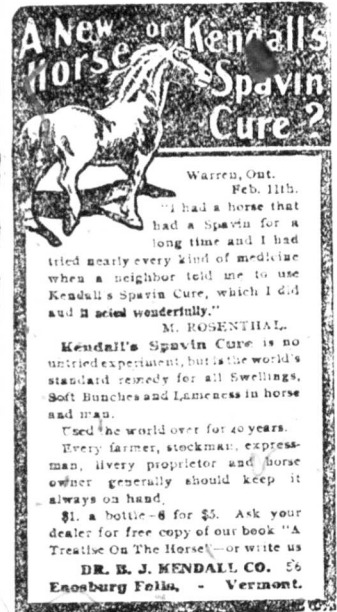

Miss Fisher—"Quite a confidential that you were having with Miss Kulcher. I fear you'll find me dull by comparison." Mr. Blunt—"Not at all. It's a relief to talk to a girl who isn't clever—that is—er—not at all. Not at all."

Kidneys Wrong?

If they are, you are in danger. When through weakness or disease the kidneys fail to filter the impurities from the blood, trouble comes at once. Backache, Rheumatism, Sciatica, Gravel, Diabetes, Gall Stones and the deadly Bright's Disease are some of the results of neglected kidneys. Dr. Morse's Indian Root Pills contain a most effective diuretic which strengthens and stimulates the kidneys so that they do their work thoroughly and well. Try

BRONCHITIS

If Neglected, it soon reaches the Lungs and may Prove Fatal.

Mr. G. L. Carrow of 116 Millicent St., Toronto, writes under date of September 13, 1908, "One year ago this spring I contracted a severe cold in the chest, which developed into Bronchitis. I took three kinds of medicine and found no improvement. Afraid of mine advised me to try PSYCHINE and in three days I felt like a new man again. I desire to let others know what a valuable cure you have in PSYCHINE for it cured me where all other medicines had failed. I am more than thankful to be well again, and for the sake of others who may be ill, you may publish this testimonial."

Stop that cold or the results will be serious. You can do this by tuning up the system with PSYCHINE.

\$ Growing \$

Hardwood Timber

Every reader knows the increasing scarcity of Hardwood Timber and its consequent increase in value in the near future.

Hardwood today is as absolutely necessary to the manufacturers, as coal, iron and steel. It simply must be had or the nations greatest industries are at stake.

There are dollars wrapped up in every stick of Hardwood that can be grown to 10 inches or over in diameter—anytime anywhere—but when it can be grown to this size in 10 years and grown too right on the main lines of railway and within easy reach of the two greatest manufacturing cities on the Western coast, there are still greater values obtainable.

Would you invest, say \$500, if we could prove to you by a series of absolutely correct records of Liriodendron Timber growths? 1st. That these trees will grow to over 10 inches in diameter by 10 years and are worth from \$5 to \$5 each. 2nd, that the wood is as hard and durable as our Canadian Oak or Hickory, and 3rd, that thousands of dollars are being made by growing this Timber, and 4th, that you are guaranteed three times your original investment at the end of ten years. Would you? Could you? Then write at once to W. E. Dyer, 114 King West, Toronto.

THE COAL STRIKE IS ON

Miners in Bituminous Fields of United States to Fight For Increase of Pay.

A despatch from Indianapolis, Indiana, says: Three hundred thousand organized miners of the bituminous coal fields of Pennsylvania, Ohio, Indiana, Iowa, Missouri, Kansas, Oklahoma and Arkansas quit work on Thursday night. The miners, members of the United Mine Workers of America, declared the walk-out was not a strike, but merely a suspension of work pending an arrangement between themselves and the operators for a wage scale for another year, the old scale having expired with the month of March.

The men demand an increase of pay in some instances of five cents a ton, and in other instances more, and certain changes in working conditions. Confidence was expressed by the operators that there would

be no general coal famine, large supplies of fuel having been secured in anticipation of the walkout. While the miners predicted the suspension would be cut short by a prompt signing of wage scales, some of the operators maintained that the mines might be kept closed for a month or sixty days or even longer.

The first victory for the men came in an announcement from Brazil, Ind., the centre of the Indiana block coal district, where it was announced the men's demand for a five-cent increase would be granted. President Lewis said he was satisfied that the suspension of work beginning on Thursday night will continue only a few days, and that the miners will have little trouble in making their new contracts with the operators.

FIVE C. N. R. CARS BURNED.

Saskatchewan Express Wrecked Near Regina.

A despatch from Regina says: The engine and tender of the Saskatchewan Express on the Canadian Northern Railway, which left Regina at 8 o'clock on Saturday evening, were derailed at a point about 22 miles east of the city. The conductor immediately secured means of coming to Regina for another engine, as there is no telegraph office at Jamieson. While the conductor was en route to Regina, however, an explosion took place in the baggage car, as a result of which the cars caught fire. The fire spread with such rapidity that it was not under control until five coaches had been destroyed. Wet blankets were hung between the cars in an effort to confine the fire, but these were of no avail. Steadily the flames gained on those who fought them and it was not until early Sunday morning that it was extinguished. All the passengers on the train were more or less seriously shaken up, and the whole train was delayed at Jamieson for some twelve hours. On Sunday morning the injured men were brought to the Grey Nuns' Hospital Regina, where they are being treated. The injured are: Garfield McKay, baggage man, of Winnipeg; Antoine Moskow, section man, of Jamieson; Aylmer Travis, passenger, a farmer from Sintaluta; Grant Holt, an American passenger from Chicago; J. O. Olson, an American passenger from Zealandia, formerly of Petoskey, Michigan, also F. J. Hutchinson, brakeman, Winnipeg.

TREED BY WOLVES.

Three La Tuque Men Have Unpleasant Experience.

A despatch from Ottawa says: According to a story sent to a local paper on Friday by William Middle of La Tuque, Que., he, Dr. Michael Bourdeau and H. P. Kinney of that place had a thrilling experience with wolves last Sun-

Boudreau had one of his toes frozen during the anxious hours of waiting for daylight.

COAL NORTH OF G. T. P.

Country Through Which Railroad Runs is Rich.

A despatch from Toronto says: The country through which the Grand Trunk Pacific runs is supposed to be highly mineralized and has already attracted considerable prospecting. Mayor Larry Connor, of Sudbury, who is in the city, stated on Friday that the samples found along the Metagami River averaged 46 per cent, carbon, 30 per cent, volatile and 5 per cent, ash. It was known, he said, in 1872, that coal was to be found in this country, but prospectors considered it unprofitable to go into the regions as there were no transportation facilities at the time. The rich country, Mr. Connor claimed, was about 60 miles north of the railway, but he believed that in addition to coal, nickel, iron and probably gold would be found on either side of the Grand Trunk Pacific.

HISTORY REPEATS ITSELF.

The High Cost of Living Crusade in 1804.

A despatch from Butler, Penn., says: Records yellow with a century's age were unearthed in the office of the clerk of courts on Friday, which show that a high cost of living crusade was in progress in 1804. A document filed with Judge Moor in that year is signed by one hundred citizens, petitioning the court to "set a stipulated price on provisions for man and horse and on liquors in the taverns of the country." The petitioners prayed for redress and asserted: "It is the consensus of opinion that 25 cents for a meal of victuals and 12 cents for a half pint of whiskey is an extortion."

IN PAIN FOR YEARS

"FRUIT-A-TIVES" BRINGS RELIEF

MRS. FRANK EATON

Frankville, Ont., Sept. 27, 1909.

"I suffered for years from headaches and pain in the back, and I consulted doctors and took every remedy obtainable without any relief. Then I began taking 'Fruit-a-tives', the famous fruit juice tablets, and this was the only medicine that ever did me any real good. I took several boxes altogether, and now I am entirely well of all my dreadful headaches and backaches."

(Signed) MRS. FRANK EATON.

50c a box, 6 for \$2.50 or trial box, 25c. At dealers or from Fruit-a-tives Limited, Ottawa.

\$5.60; bulls at \$4.50 to \$5.60. Stockers and feeders strong at \$4.80 to \$5.25. Sheep and lambs easier, but Spring lambs, which are now coming in, were quoted up to \$10 each. Hogs after keeping up to the \$10 mark for over a week declined 25 cents. Selects were quoted at \$9.50, f.o.b., and \$9.75 fed and watered at the market.

THIRTEEN FIREMEN HURT.

Explosion During Conflagration in Montreal.

A despatch from Montreal says: A fire which broke out on Saturday night on the premises of J. H. Waldman and Co., cloak manufacturers, St. Paul Street, resulted in a loss of over \$100,000 and the injury of 13 firemen who had a miraculous escape from death. When the fire was at its height there was a loud explosion, and the firemen who were working on the outside of the building saw a number of their comrades caught in the burning pile. The explosion was caused by a back draught on the lower floor of the building, and so great was its force that several of the firemen were blown clean out of the place, while others were knocked down and had to be dragged in an unconscious condition out of the building.

"WHY BE SO THIN?"

Thinness is Embarrassing. Unhealthy and Not Natural—Formula Now Used Which Adds From One to Three Pounds a Week.

Every one ought to have some extra flesh on the bony structure of the body, both for the sake of health and self-esteem.

Most thin people are sensitive to the harsh, unfeeling criticisms which are constantly being hurled at them by the more fortunate well-figured persons.

Every one pities a thin, bony horse, but horses don't know it—while thin people are both pitied and ridiculed. It ought not to be, but it is.

A well rounded figure, be it man or woman, excites admiration; not only for the figure but for the bright eyes, pink cheeks, red lips, and vigorous carriage which accompany a well-nourished body.

Strength, health, beauty and sound flesh abound, if the blood and nerves get enough nourishment out of the food eaten.

This prescription aids nature; helps absorption, digestion and assimilation; helps distribute the blood and nerve elements which make sound flesh. Get the ingredients and make it at home, and see how very fast you gain in weight.

In a half pint bottle, obtain three ounces of essence of pepsin, three ounces syrup of rhubarb. Then add one ounce compound essence cardiol, shake and let stand two hours; then add one ounce tincture cadomene compound (not cardamom). Shake well and take a teaspoonful before meals and one after meals. Also drink plenty of water between meals and when retiring. Weigh yourself before beginning.

G. T. PACIFIC BRANCHES.

Contract Let for Line From Regina to Boundary.

TREED BY WOLVES.

Three La Tuque Men Have Unpleasant Experience.

A despatch from Ottawa says: According to a story sent to a local paper on Friday by William Midlge of La Tuque, Que., he, Dr. Michael Bourdeau and H. P. Kinney of that place had a thrilling experience with wolves last Sunday night. While walking in the woods five miles from La Tuque they were pursued by a pack of wolves and compelled to spend a cold night in the branches of a tree. Midlge says that they were followed at first by three wolves, and although unarmed they were not greatly frightened by them. A little later, however, a second pack of eight or nine wolves came up, and the men hurriedly climbed a small tree. All night long they huddled together there until at daybreak the wolves slunk away. The night was bitterly cold, and Dr.

horse and on liquors in the taverns of the country. The petitioners prayed for redress and asserted: "It is the consensus of opinion that 25 cents for a meal of victuals and 12 cents for a half pint of whiskey is an extortion."

SHOT SHERIFF AND SUICIDES

Tragedy in British Columbia—Result of a Love Affair.

A despatch from Vancouver, B. C., says: Word comes from Northport of the shooting of Marshal J. Dietrich by a man named Martin Close, who committed suicide when a sheriff's posse was after him. Close, aged 45, was paying unwelcome attentions to a Miss Jellison, and the Jellison home being dynamited, Close was suspected. Dietrich went to arrest him. Close shot him in the shoulder with a rifle, and when the officer fell, again shot him in the body, killing him.

BALLOON SWEEPED TO SEA

Three German Aeronauts Lost Their Lives on Baltic Coast.

A despatch from Stettin, Germany, says: The German balloon Pommern, which made an ascension here on Sunday afternoon, met with a series of accidents which ended in a disaster under most tragic circumstances in the Baltic Sea. Three men lost their lives, including the Radical member of the Reichstag, Werner Hugo Delbrueck. Herr Delbrueck and another member of the party were drowned, a third occupant of the car was picked up unconscious and died from his injuries, while the fourth was rescued in a serious condition.

The Pommern carrying Delbrueck who was acting as pilot; a bailer, Herr Semmelhardt; an architect, Herr Benduhn, and a man named Hein, ascended on Sunday afternoon at the gasworks. The wind was blowing a hurricane, and the Pommern broke away before she had been completely ballasted.

A chapter of accidents began immediately. The balloon collided with telegraph wires, which broke, almost overturning the basket. It

then dashed into the roof of a neighboring factory, destroying the smokestack. With the basket swaying wildly, and half of its ropes cut, the balloon soared to a great altitude, and disappeared in the clouds at a terrific speed.

Thousands of onlookers, including a detachment of military, which had assisted in the ascent, ran along the roads, expecting the basket to break away. The balloon, however, was not seen again until it reached Swinemunde, 36 miles northwest of Stettin, over which it passed, at a height of 6,000 feet, in the direction of the sea.

Tugs followed in its tracks and one of them which had outdistanced the others, was almost directly under it, when suddenly the balloon fell into the sea. The tug steamed to the spot quickly, but the work of rescue was difficult. Already Delbrueck and Benduhn had disappeared, but Semmelhardt and Hein were clinging to the ropes, and they were dragged aboard the vessel.

BECAUSE LIVING IS HIGH

United States Railroads Increase the Wages of Their Employees.

A despatch from Philadelphia says: Following the lead of the Pennsylvania Railroad Co., which has just given a six per cent. wage increase to 195,000 employees on all railroads connected with its vast system east and west of Pittsburg, came an announcement from the office of the Philadelphia & Reading Railway Company late Wednesday afternoon of a similar advance in wages to its men.

Like that of the Pennsylvania, the Reading's increase affects all employees who receive less than

\$3.00 a month. The Reading's advance, however, does not include those employed whose wages have been adjusted within the last 90 days. From time to time during the last three months the Reading has adjusted wages of certain classes of trainmen and other employees. Including these, the increase on Wednesday affects about 37,000 employees.

The general prosperous condition of the railroads and the high cost of living are given as the reasons for the increases announced by both companies.

Beans—Car lots outside, \$1.85 to \$1.95, and small lots at \$2.10 to \$2.20 per bushel.

Honey—Combs, dozen, \$2 to \$2.50, extracted, 10½ to 11c per lb.

Baled Hay—No. 1, \$14.75 to \$15.50 on track, and No. 2, \$11.50 to \$12.50.

Baled Straw—\$7.50 to \$7.75 on track, Toronto.

Potatoes—40 to 45c per bag on track.

Poultry—Turkeys, dressed, 18 to 19c per lb.; chickens, 15 to 16c, and fowl, 11 to 12c.

THE DAIRY MARKETS.

Butter—Pound prints, 21 to 23c; tubs and large rolls, 20 to 21c; inferior, 16 to 18c; creamery, 29 to 30c, solids, 26½ to 28c per lb.

Eggs—19 to 20c per dozen.

Cheese—13 to 13½c per lb. for large and at 12½c for tubs.

HOG PRODUCTS.

Bacon—Long clear, 15½ to 15¾c per lb. in case lots; mess pork, \$25 to \$26; short cut, \$30 to \$31.

LIVE STOCK MARKETS.

Montreal, April 5.—Choice steers brought \$6.75; fair to good, \$5 to \$5.50; fair, \$4.50 to \$5.25; hogs, \$10.25 to \$10.50; sows, \$9.25 to \$9.50; sheep steady at \$4.75 to \$5; lambs are firm at \$7.

Toronto, April 5.—Prime picked steers and heifers sold at \$6.50 to \$7, good to choice butchers at \$5.50 to .55; medium at \$4.90 to \$5.35; choice cows were firm at \$4.75 to

cardamom). Snake well and take a teaspoonful before meals and one after meals. Also drink plenty of water between meals and when retiring. Weigh yourself before beginning.

G. T. PACIFIC BRANCHES.

Contract Let for Line From Regina to Boundary.

A despatch from Montreal says: That the Grand Trunk Pacific is determined to enter into active competition with the Canadian Pacific for traffic between western Canada and the States of the middle west is shown by the announcement made at the Grand Trunk Pacific headquarters on Wednesday morning that a contract had been awarded to the J. D. McArthur Company for the construction of a branch line south from Regina to the boundary near Portal, while contracts have also been let for the completion of a line north from Regina to Melville on the main line of the Grand Trunk Pacific.

SEVEN BODIES IN MORGUE.

Two Men Found in the Montreal Canal.

A despatch from Montreal says: There were seven bodies in the Morgue on Friday, four of which were brought in during the night. On Thursday night the water was let out of the canal to make repairs. Two bodies of men were found. Two young children's bodies were found, one in Notre Dame Church was hidden under a seat, and the other under melting snow in a field in the north end. A boy was killed by a car on Thursday. The day before a man suicided dependent from being out of work, and an unknown woman fell dead on the street.

THIS MAY SAVE YOU MONEY.

Very often the cheapest and poorest production yields most profit. Some dealers with their own profit in view try to "push" inferior preparations when Zam-Buk is asked for. They talk about "just as good," or "practically the same." Not one dealer knows what is in Zam-Buk! If any dealer tells you that something else is "just as good," ask him how he knows! When buying Zam-Buk be sure and see the name on the packet. The name is protected by law, and therein lies your safety.

BURIED BY FALLING WALL.

Starford Mill Owner Suffers Serious Injuries.

A despatch from Stratford says: Between 1 and 2 o'clock on Sunday morning fire was discovered in the woollen mills owned by Dufton's Limited, and before it was got under control the buildings and contents were almost destroyed. The fire apparently originated in the rear of the mill, where a considerable quantity of wool and stock was stored, and had gained such headway when discovered that the firemen were unable to save much. While trying to remove some of the stock a serious accident befell Mr. E. T. Dufton, the proprietor. A portion of the brick wall fell, burying him in the ruins. He was badly crushed and burned, but it is thought he will recover. The loss will probably be upwards of \$50,000 partially insured.

HAPPENINGS FROM ALL OVER THE GLOBE.

Telegraphic Briefs From Our Own and Other Countries of Recent Events.

CANADA.

Less than 2,000 liquor licenses will be issued in Ontario this year. The C. P. R. has announced plans for very extensive improvements at Montreal.

The German steamship lines running to the St. Lawrence will enter the first-class passenger trade. The Grand Trunk proposes to build a new station and shops at Stratford if the city will construct a subway.

William Burnett of Redvers, Sask., committed suicide by drowning, his mind being affected by the death of his wife.

An explosion of dynamite at Black Lake destroyed the boiler-room of the asbestos works and injured the fireman severely.

The Railway Committee at Ottawa reported a bill incorporating a company to build a line from Montreal to Hudson's Bay.

Mrs. J. P. Parker of Stratford was thrown down, tied to a stove-leg, and robbed of five dollars in broad daylight by two men who called at the house on Saturday.

Dr. Siao, Secretary of the Chinese Consulate at Ottawa, was grossly insulted by a local doctor who approached him on the street.

The Hamilton Steel Works have been shut down owing to a strike. The strikers showed up at the works and the police had to charge them with batons to disperse them.

Winnipeg fruit importers have petitioned the Dominion Government to allow the free importation of fruit and vegetables during the winter months.

Mrs. Henry Taylor of Mount Elgin fell down cellar with a lighted lamp in her hand and was so seriously burned that she died from her injuries. Mr. Taylor and a son were badly burned in trying to help her.

A lot of workmen in the Tilbury East oil fields are affected by the raid of Patriarche & Co.'s office in Toronto. They have not been paid for some time and are now filing liens against the property to protect themselves.

The locomotive engineers' Executive meeting at Ottawa will petition for a law to restrict trainmen's hours to fourteen a day in case of emergency. They also favor a law compelling everybody to come to a stop at unprotected railway crossing.

GREAT BRITAIN.

Miss Marie Corelli is dangerously ill at her home in Stratford-on-Avon.

Mr. Asquith, in the House of Commons, moved that his resolutions for the shortening of the life of a Parliament and for the abolishing of the veto of the Lords be considered in committee of the whole.

In the House of Commons Lord Hugh Cecil proposed to reform the House of Lords by making the number of members 400, 350 of these to be appointed by the King from the hereditary Peers and 50 to be the

OVER NIAGARA BANK.

Otto Slengl Has Remarkable Escape From Death.

A despatch from Niagara Falls says: Otto Slengl fell 150 feet over the Niagara River bank on Thursday night, and still lives, although he sustained severe internal injuries. Slengl was walking along the bank on the American side, near the lower steel arch bridge, and fell over the precipice. He fell a sheer one hundred feet, then his descent was impeded by stones and bushes. The fall was observed from the bridge, and the unconscious man was brought up and conveyed to the hospital by two policemen. Slengl is a Pole from Lewiston. He will recover.

MONTREAL IS FIRST.

Customs Revenue is \$16,315,000 — Toronto Follows.

A despatch from Montreal says: Of the sixty million dollars which constitutes the Customs duties collected in Canada during the fiscal year, the port of Montreal will contribute \$16,315,000, being the largest item in the aggregate. Toronto will follow with \$12,600,000. Other large contributors will be Winnipeg, \$7,000,000, and Vancouver, \$4,000,000. The latter port now collects an aggregate exceeding the total of Quebec, St. John and Halifax, clearly showing the development of Pacific trade and the growing demands occasioned by the filling of the West.

SWEPT AWAY BY THE ICE.

Cofferdam in the St. Mary's River Was Demolished.

A despatch from Sault Ste. Marie, Ont., says: The ice in St. Mary's River started to go out suddenly on Friday afternoon, and in its mad rush carried away the cofferdam which had been constructed with infinite care around the sunken steamer Steinbrenner. Several tugs which were tied alongside narrowly escaped being carried down the river, as all their coal had been consumed during the wrecking operations. The loss of the cofferdam will greatly delay the raising of the Steinbrenner.

CRATERS POUR OUT LAVA.

Cinders Falling Over Area Extending to the Sea.

A despatch from Catania, Italy, says: The eruption of Mount Etna has increased in violence, and new craters have been opened. The director of the Mount Etna Observatory says that over 30 craters are now active, and from all of them lava is pouring out in cascades, while cinders and lapilli are falling over an area extending as far as the sea. The stream of lava is advancing toward Catania, but the town is in no danger, as the stream must later on be deflected toward the sea. Mr. Perret considers that the eruption is following the natural course, and will continue as it is until the internal pressure has been exhausted. This may last for six months.

A CANADIAN INVENTOR.

To Test New Brake on United States Warship.

ONE HUNDRED MILLIONS

Revenue of the Dominion Reaches High Water Mark.

A despatch from Ottawa says: The total revenue of the Dominion for the fiscal year which closed on Thursday has passed the hundred-million-dollar mark, an increase of about four millions over the previous record year of 1906-07. The final figures will not be known for some weeks yet, but from statements of Customs and other sources of revenue already available it is safe to state that the total will be a little over \$100,000,000. This is an increase of about two and one-half millions over Hon. Mr. Fielding's estimate of revenue, as made in his budget speech of December last, and should bring the

surplus for the year up to the record figure of nearly nineteen millions.

The Customs revenue of the Dominion for the fiscal year ending Thursday will, it is estimated, total over \$61,000,000 when the final figures are in. This is an increase of nearly three millions over the highest previous record, namely, \$58,331,000 for the twelve months ending March, 1908. As compared with last year, it is an increase of a little over thirteen millions. The receipts for the month ending Thursday total \$5,979,989, an increase of \$1,232,697, or about 25 per cent. as compared with March of last year.

BUTTER BOYCOTT IN BERLIN

Three Million People to Abstain From Its Use in Germany.

A despatch from Berlin says: The boycott campaign against the Union of Butter Merchants because of the increased price of that commodity to 36 cents per pound, is spreading in Germany. The number of those who have signed the pledge to abstain from the use of butter at the present price is now 120,000. If the Social Democrats join in the boycott, it will mean that the number of people who will pledge themselves not to use butter will reach the total of 3,000,000. The butter merchants deny that

they are responsible for the high price. They assert that the increase of 10 cents a pound, from 26 to 36 cents, is due to the actual scarcity of the commodity, which was brought about by last year's poor fodder harvests.

The president of the Industrial Union of Unions declares that the boycott is chiefly the effect of the disgust among the working classes at the general rise in the cost of the necessities of life which has resulted in the recent finance and reform laws.

PREPARE FOR EMERGENCY

A French Admiral Says Great Britain Needs a Great Army.

A despatch from Paris says: In the course of his reminiscences now being published Admiral Fournier, commander of the Mediterranean squadron of the French navy, declares that the time has arrived for France and Great Britain, as allies to strengthen their forces of defence and offence; France by adding a powerful fleet of battleships and torpedo boats to her already strong fleet, and England supplementing her fleet with a great army.

This course, the admiral adds, is essential to safeguarding the future; and to enable France, Great Britain and Russia to combat the forces of the triple alliance should hostilities between the United States and Japan occur, or in the

event that the tactics of Germany unchain a world war.

Among the interesting statements of Admiral Fournier is his assertion that the real cause for Germany's nagging of France over Morocco was Emperor William's resentment at the failure of Germany to secure a place on the international commission of enquiry, which decided the dispute between Great Britain and Russia, growing out of the action of the Russian Baltic squadron in firing on the Gamecock trawling fleet under the delusion, as alleged, that they were Japanese torpedo boats. Admiral Fournier who was president of the commission, says the emperor felt, though without justification, that M. Delcasse, then French foreign minister, blocked his majesty's pet plan.

A CANADIAN INVENTOR.

To Test New Brake on United States Warship.

A despatch from Washington says: To stop a 10,000 ton battleship going at full speed within her own length is the problem which the United States Navy Department has set for a Canadian inventor. He has an arrangement like barn doors on the side of a ship, which he guarantees to fulfil this function. The department has authorized a trial of the device on the battleship Indiana off the Delaware Capes on April 17, the cost to be defrayed by the inventor.

DEEP-SEATED COUGH CURED IN 5 HOURS.

New Home-Made Syrup.
(Cut this out.)

From Boston Press.

Progress in medical compounds never ceases, and now it is stated by a prominent medical man that any deep-seated cough or cold on the lungs can be actually cured in five hours by the clock. Opium and morphine have been resorted to in the past, as relief measures. But now it is learned that the system must be treated to rid it of inflammation and congestion. A tonic laxative cough syrup does the work so quickly and thoroughly as to be almost magical. What heretofore has taken weeks to cure can be accomplished in hours. Get this formula filled or mix it at home and always keep it on hand: One-half ounce fluid wild cherry bark, one ounce compound essence cardiol and three ounces syrup white pine compound. Shake the bottle and take twenty drops every half hour for four hours. Then take one half to one teaspoonful three or four times a day until the system is purified and tones up. Give children less according to age. One filling will usually cure a whole family, as the dose is small.

MINERS ACCEPT TERMS.

Strike Which Involved One Million Men Averted.

A despatch from Cardiff, Wales, says: The threatened strike of the South Wales miners and which would have involved 200,000 miners and 1,000,000 workmen, has been averted. At a meeting on Wednesday the miners' federation decided to recommend that the colliers accept the proposals of the mine owners. This recommendation will undoubtedly be accepted by the miners.

RUN DOWN BY CAR.

Boy Killed—His Sister Probably Fatally Injured.

A despatch from Montreal says: A boy named Antonio Bovrett, five years of age, was killed, and his sister, aged four, seriously hurt on Thursday afternoon by a street car on St. Catharine street. The children were crossing the street when they were run down by the car. The boy was frightfully mangled and the girl is so seriously injured that she is likely to die.

...ing not with a great army. This course, the admiral adds, is essential to safeguarding the future, and to enable France, Great Britain and Russia to combat the forces of the triple alliance should hostilities between the United States and Japan occur, or in the

RUSH OF IMMIGRANTS.

30,000 Will Sail for Canada During April.

A despatch from London says: It is stated that 30,000 immigrants will sail from Liverpool for Canada on 23 steamships during April. This increasing proportion of people with capital is a subject for comment here. Interest is aroused in Liverpool by a suggestion that a hostelry be provided for immigrants who have to wait before the shipping offices open, and are often exposed to inconvenience by lack of accommodation.

HOMESTEADING IN WEST.

Increase of 890 Entries Over March of Last Year.

A despatch from Ottawa says: During the month of February 2,254 homesteads were entered for in the Canadian West, an increase of 830 entries over the corresponding month of last year. The entries represented 5,676 souls, 239 entries were made by people from Eastern Canada, 679 by Americans, 30 by Canadians from the United States, 298 by English, 77 by Scotch and 33 by Irish.

CZAR AT A CONCERT.

Attends Theatre in Capital for First Time in Several Years.

A despatch from St. Petersburg says: For the first time in several years the Czar attended a theatre

...as alleged, that they were Japanese torpedo boats. Admiral Fournier who was president of the commission, says the emperor felt, though without justification, that M. Delcasse, then French foreign minister, blocked his majesty's pet plan.

The Foolishness of it

Spending hundreds of dollars in building a splendid home or barn and then deliberately allowing it to suffer for paint.

Martin-Senour Paint

100% Pure, Preserves

It feeds the hungry open pores of the wood with pure linseed oil, lead and zinc-making the surface absolutely impervious to climatic changes.

It seals wood from dampness—prevents it from splitting, cracking, from sun and frost, blistering heat and blowing dust, which help the processes of decay and ruin. Good pure paint buys more than 100 cents worth of insurance against the ravages of time.

The ingredients of a pure paint are well known. In the main they are Carbonate of Lead, Oxide of Zinc, pure Colors, well ground by specially adapted machinery, and thinned with pure linseed oil and pure turpentine dryer.

A building owner who fails to recognize the great importance of selecting the right paint, will see his property value decrease while he grows aged and peevish wondering why.

Notify us if your dealer cannot supply you, we'll gladly direct you where our paints can be had.

Refuse All Substitutes

Vapo-Cresolene

Established 1879
FOR WHOOPING COUGH, CROUP, ASTHMA, COUGHS, BRONCHITIS, SORE THROAT, CATARRH, DIPHTHERIA

Vaporized Cresolene stops the paroxysms of Whooping Cough. Ever dreaded Croup cannot exist where Cresolene is used. It acts directly on nose and throat, making breathing easy in the case of colds, soothes the sore throat and stops the cough. It is a boon to sufferers of Asthma.

Cresolene is a powerful germicide, acting both as a curative and a preventive in contagious diseases. Cresolene's best recommendation is its thirty years of successful use.

For Sale by All Druggists.
Send Postal for Descriptive Booklet

Cresolene Antiseptic Throat Tablets, simple and soothing for the irritated throat, 10c.

Leeming, Miles Co., Limited, Agents, Montreal, Canada.

OTTAWA NEWS.

Misapprehension Exists.
There is a great deal of misapprehension as to the size of the vessels

telligible the proposed vessels are as follows:

Niobe, armoured cruiser, 11,000 tons displacement; 435 feet long, 69 feet beam, 26 feet draught; 15,500 indicated horse-power; speed 20 knots; cost originally \$1,741,415; coal capacity, 1,000 tons; complement 600 men; 16 6 in. guns, 14 12-pounders, 5 3-pounders, 2 machine guns, two torpedo tubes.

This vessel is to be purchased from the British government, and will be first stationed on the Atlantic side, and be used as a training ship. It is a part of the scheme to train Canadians for a naval career, pending the construction of the permanent vessels of the fleet. This will meet the aspirations of a great many young men who have already signaled their intention of entering the navy.

Rainbow, armoured cruiser. This is a vessel of 3,600 tons purchased from the British Government to do service on the Pacific as a training ship, in the same way as the "Niobe" will be on the Atlantic.

It is contemplated that the Niobe and Four Bristol, armoured cruisers, each 4,800 tons displacement; 430 feet long, 47 feet beam, 15 1/4 feet draught, 22,000 indicated horse power; speed, 25 knots; complement each 20 officers and 371 men.

These are the latest type of fast cruiser being constructed by the British Admiralty. So recent are they that the latest particulars with regard to them have not been given out. The particulars of construction and armament will not be divulged.

Six Destroyers of the latest improved river class. The very latest type adopted by the British Admiralty. They will be about 225 feet long, 23 1/2 feet beam, 9 feet 6 in. draught, twin screw; 600 tons displacement; 7,500 indicated horse power, over 25 knots speed. Complement, 30 officers 546 men.

Substantial Fighting Force.

The navy will thus consist of twelve vessels, about 65 officers and 2,500 men. As to the armament it cannot be mentioned now with any certainty, as details of this description are not given publicly, but the fleet will be a formidable fighting unit, and of the greatest service to the Empire in case of emergency. As coast and commerce protectors they are the very same class of vessels used for a similar purpose by Great Britain and are recommended to Canada as the most useful type for the purposes required.

Approximately this navy will cost \$11,500,000 to build and about \$3,000,000 a year to maintain.

Admiralty Suggested It.

The entire scheme was based upon the specific recommendations of the British Admiralty. The object sought was to relieve the British fleet of the task of defending commercial routes in time of war. The cruisers, it was pointed out, would by reason of their great speed, be enabled to know the whereabouts of an enemy and give timely warning to the heavier battle-ships. At the same time their own armament will be of such strength that they can take care of themselves in an

date character. It is true there will be no Dreadnought yet, but all the other vessels are the best modern science has evolved.

Different From Canada.

Much has been said about Australia and New Zealand giving Dreadnoughts to the British navy. It should be remembered that while Australia provides an unit, Great Britain contributes \$1,250,000 a year towards the expense of it. As to New Zealand, it was arranged that the Dreadnought provided by her should be stationed on the China station, and only the smaller vessels of the unit be maintained in New Zealand waters.

Australia the Same.

There is another point about which much misunderstanding exists. Criticism has been directed against the Canadian government because the Canadian fleet does not pass automatically under British control in case of war. It appears that Australia has a similar provision in the law to that of Canada. To set the matter at rest, Admiral Kingsmill cabled the Australian government as follows:

Parliament Must Consent.

"Please inform me by telegraph, as soon as possible, whether, in the event of war, vessels of Australia's navy pass automatically, without any action, under control of Admiralty."

To the above cable the following reply was received by Admiral Kingsmill:

"With reference to your telegram, transfer control to the Admiralty is not to be automatic, but subject to approval of Commonwealth Government on declaration of war."

The objections urged in this regard to the control of Canadian parliament have no force.

Young Men Will Join Navy.

It is confidently anticipated that many applications will be made by young Canadians ambitious to make a career in the Canadian navy. To them it may be said, that not only is the ambition laudable, but in the Canadian navy they will have the same opportunity as would be available in any first-class navy in the world.

It is true that Canada at this time cannot offer positions upon Dreadnoughts, but this is not a serious drawback. Cruisers form the largest part of every navy; they are more mobile, and on board of them the recruit sees more service than he would upon a mere fighting machine.

Honorable Career Offered.

The Canadian navy offers an honorable career to young men who seek the profession of the sea. The vessels of the Canadian navy are the very best and latest of their type, and experience upon one of them will count in any navy in the world.

It is a crime to discourage ambitious young men from joining the navy upon the ground that the boats are small and insignificant. This is not the case. The Canadian cruisers are the equal of any afloat of their type, and superior to most cruisers of any other recognized fleet in the world to-day. This can readily be seen by reference to any naval annual.

No Tariff War.

There will be no tariff war with the United States. The able diplomacy of the Canadian ministers has averted what promised at one time to be a very serious condition.

To comprehend the situation it must be understood that unless Canada were included in the President's proclamation issued on Thursday last, there would be 25 per cent ad valorem added to the existing duties against Canada.

President's Difficulty.

As the matter stood during the negotiations, as a matter of law the President could not interpret the Aldrich-

THE CENTAUR COMPANY, 77 MURRAY STREET, NEW YORK, N. Y.

Bigger Than His Traducers.

It will occur to most people that Mr. Monk would measure up favorably with the writer of the News article, under almost any conditions. In the meantime Mr. Borden speaks in Halifax and expresses views the very contrary of those entertained at the time the Naval policy was decided upon.

MAKING ICE.

The Process Is Simple, Though It Puzzled the Negro.

A sailboat in which were a white man and several negroes had just left the wharf near an ice factory at the foot of Main street, Annapolis, and was headed out the mouth of Severn river, toward a point on the Chesapeake.

"Ye-e-th, thir," an old time colored man was hisping. "I like to git a job workin' round that air ice plant and see 'em make ice with fire."

"I'll tell you how it is done, if you would like to hear my explanation," said the white man.

"Ye-e-th, thir, I like to hear 'bout it." "Well, in the first place, they have a tank of ammonia, to which a small amount of heat is applied. It does not take much heat to convert the ammonia into vapor, and even that heat is used up in causing the liquid to expand into a gas, or become latent, as it is called, so that the temperature is not materially affected.

"Now, suppose the ammonia gas occupies a hundred times as much space as the liquid. It is evident that the liquid contains a certain amount of

OTTAWA NEWS.

Misapprehension Exists.

There is a great deal of misapprehension as to the size of the vessels which it is proposed shall form the nucleus of a Canadian navy. Conservatives have made it appear that the entire scheme is upon such a trivial plan that no future is presented for the youth of Canada to enter upon the naval profession.

First Doubt

Doubt has been presented in two forms. First that the proposed navy was of the "tin pot" variety, so insignificant that no career was presented to young Canadians to join it, because it offered no attractions.

Second Doubt.

Second—Because the navy contemplated did not meet with the approbation of the British Admiralty.

These two suggestions are without any foundation in fact. It may be said first, that the vessels are of great size, tonnage and strength; and secondly, that they are the very type selected by the British admiralty.

The Canadian Navy.

To make the subject more in-

teresting, it is pointed out that the object was to relieve the British fleet of the task of defending commercial routes in time of war. The cruisers, it was pointed out, would by reason of their great speed, be enabled to know the whereabouts of an enemy and give timely warning to the heavier battle-ships. At the same time their own armament will be of such strength that they can take care of themselves in an emergency.

Compare With United States.

These are the vessels described by Conservatives as a "tin pot" navy. For purposes of comparison it may be stated that the Niobe is 3,000 tons larger than the two largest of the United cruisers, and 8,000 tons larger than most of the others.

Compare Bristols.

The Bristols will be exceeded in size by only three United States cruisers—(two being those referred to above which are themselves 8,000 tons smaller than the Niobe). The Bristols will be larger by several thousand tons, than thirty cruisers of the United States navy, and be only exceeded in size by three United States cruisers.

If the Canadian navy is "tin pot" what of the United States navy?

Compare With Other Navies.

Another point of comparison is that the Canadian cruisers are larger than any cruiser in the navies of the Argentine Republic, Brazil, Chili, China, Denmark, Netherlands, Norway, Portugal, Sweden, Turkey.

Canada's cruisers are larger than 32 out of 37 French cruisers.

Canada's cruisers are larger than 45 out of 51 German cruisers.

Canada's cruisers are larger than 22 cruisers of the Italian fleet.

Canada's cruisers are larger than 27 out of 30 Japanese cruisers.

Canada's cruisers are larger than 9 out of 10 Spanish cruisers.

Navy To Be Proud Of.

It is evident that the Canadian navy bears comparison well with the cruisers of any other marine power in the world. Cruisers are a very important part of a navy, and, as Canada followed the suggestions from the British admiralty with regard to the type of vessels which would be of the greatest assistance to the empire in case of hostilities, it stands to reason that Canada has the nucleus of a navy of which any country would be proud.

How About Destroyers?

As to the destroyers, those for the Canadian navy are larger than any similar type in the navies of the Argentine Republic, Austria Hungary, Chili, China, Denmark, Greece, Italy, Japan, Netherlands, Portugal, Norway, Sweden and Turkey.

France, Germany and the United States have some destroyers larger than those of Canada, but the Canadian ones are vastly superior to many of those belonging to either of the countries mentioned in tonnage, indicated horsepower and speed.

Career for Young Men.

The few particulars given here, which may be found by reference to official sources, indicate that Canada will have a navy of the most up-to-

\$100 Reward \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, getting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address F. J. CHENEY & CO., Toledo, O. Sold by all Druggists, 75c. Take Hall's Family Pills for constipation.

To comprehend the situation it must be understood that unless Canada were included in the President's proclamation issued on Thursday last, there would be 25 per cent ad valorem added to the existing duties against Canada.

President's Difficulty.

As the matter stood during the negotiations, as a matter of law the President could not interpret the Aldrich-Payne bill so as to include Canada in those countries enjoying the minimum tariff of the United States.

Slight Concessions Only.

It became necessary then to make some slight concessions so as to pave the way for the proclamation. These concessions are thirteen in number, and do not materially affect the situation from a tariff standpoint, but the fact that they have been given makes it possible for the President to interpret the law in favor of Canada and give to us the benefit of the United States minimum tariff.

Future Reciprocal Arrangements.

In addition to this the way has been prepared for certain negotiations in the future having in view a broad scheme of reciprocal trade. This is a condition greatly to be desired, and the fact that a tariff war, with its baneful consequences has been averted, should be the subject for mutual congratulation on the part of the Governments involved.

The opinion is prevalent that even if Canada "stood pat" she would be included in the proclamation in any event, without making any concessions. This may be true, at the same time between nations it is much better to proceed upon the lines of compromise so long as the course of national honor may not be deviated from.

Settlement Was On Wiser Lines.

Mr. Fielding probably realized that in future negotiations with the United States, a pleasant termination of the present difficulty would have an important bearing. In this view he will be sustained by the thinking people of Canada, after the first feeling of disappointment has passed away.

United States Friendly.

The hope expressed by the United States of future reciprocal trade arrangements with Canada is an encouraging sign. Heretofore Canada has gone to the United States, but Canada has grown since then, and now the United States comes to Canada.

What Tories Will Claim.

Conservatives will, of course, claim that there has been a surrender. In fact that prejudiced and untrustworthy publication, the Toronto Mail and Empire, has already made the claim. Substantial business men, irrespective of politics, will see in an amicable settlement another evidence of the statesmanship of Sir Wilfrid Laurier. There is no doubt his was the hand that guided the entire negotiation and to his astuteness, and broad minded policy, the satisfactory results achieved may be attributed.

No Conservative Leadership.

Conservatives are falling into a worse and worse condition each day. In the house there is no leader but several would be leaders. Every man speaks as he likes without regard to his party or his party's policy.

News Fights Its Party.

The Conservative paper, the Toronto News, is employed just now in lambasting Mr. Monk. First, Mr. Monk is credited with views looking to the dethronement of Mr. Borden as leader of the Conservative party. Following this Mr. Monk is castigated by the News, and held up as a person of no consequence, no political weight, no political force in the party. Mr. Monk is ridiculed as a man of mediocre political intelligence, with no initiative, no ideas of the slightest use to the party.

amount of heat is applied. It does not take much heat to convert that heat into vapor, and even that heat is used up in causing the liquid to expand into a gas, or become latent, as it is called, so that the temperature is not materially affected.

"Now, suppose the ammonia gas occupies a hundred times as much space as the liquid. It is evident that the liquid contains a certain amount of heat, which is afterward distributed over a hundred times the space first occupied. A cubic foot of the liquid becomes a hundred cubic feet of gas, and it is plain that a cubic foot of gas will contain only one-hundredth part of the heat originally in a cubic foot of liquid; hence the gas is much colder than the liquid.

"Now, this gas or vapor is allowed to flow through pipes covered with salt water, which becomes extremely cold, but does not freeze, owing to the presence of salt. The fresh water desired to be frozen is put into large metal cans and placed in the cold salt water and allowed to freeze.

"There is nothing mysterious about the process. It is, in fact, very simple. Do I make myself clear? Do you understand my explanation?"

"Ye-e-ith, thir, yo' esplanation's plain, but I suttently would like to see 'em make that air ice with fire."

—Washington Star.

His Quaint Suggestion.

A Frenchman who appears to have been of a thrifty turn of mind conceived the idea in 1878 that too much valuable time was being wasted in cleaning sardines when preparing them for the market. He found a way of preparing them without cleaning them, and on this he took out letters patent. Apparently he had some slight misgivings as to whether the public would be perfectly suited with his invention, and so in his claim he makes this parenthetical entry:

Fish put up by this process may be slightly unpleasant to the customer at first, but he soon gets used to it.

A Wife's Early Lesson.

A curious custom used to accompany an Anglo-Saxon betrothal. After the giving of the ring the father gave the son-in-law one of his daughter's shoes, with which the son-in-law bit his wife on the head to teach her subjection! Later on a more moderate (?) castigation was suggested, and three blows with a broomstick became the custom! —"The Month of the Year," by Rev. Pemberton Lloyd.

A New Scheme.

"Sued for breach of promise, eh?" "Yep." "Any defense?" "Temporary insanity, and I expect to prove it by the love letters I wrote." —Louisville Courier-Journal.

Protracted.

"Hello, Barker!" said Smithkin, meeting his friend on the street. "How goes it?" "All right, I guess," said Barker. "Seen Bobbie Sponger lately?" "Yes; Bobbie is down at my place at Westhampton now. I invited him down for the week end." "Why, I thought that was three weeks ago!" "It was," said Barker, "but, you know, Bobbie is an expert at making both ends meet." —Harper's Weekly.

Summers, Box 851, Windsor, Ont.

SIR MARK'S HOTEL BILL.

Relic of an Early Nineteenth Century Election in Ireland.

—During the time of a contested election in Meath, Ireland, in the early part of the last century, Sir Mark Somerville sent orders to the proprietor of the hotel in Trim to board and lodge all that should vote for him, for which he received the following bill, which he got framed, and it still hangs in Somerville House, County Meath:

April 16th, 1826.

MY BILL.
£ s. d.
To tenting sixteen freeholders above stairs for Sir Mark, at 3s 3d a head, is to me 2 12 0
To eating sixteen more below stairs, and two more after supper, is to me 2 15 9
To eighteen horses and five mules about my yard all night at 13s every one of them, and for a man which was lost on the head of watching them all night, is to

lieve my own eyes till I saw Broca.) I have seen people who had grass green emeralds instead of eyes and topazes and rubies for eyes. And I have seen races with blue hair.—Cor. Lafcadio Hearn in Atlantic.

TRICK ANIMALS.

Sometimes the Trainer Has to Do His Work Quickly.

"You wouldn't believe how fast you have to work to train an animal," said the man who has broken everything from elephants to geese the other day. "Why, I can tell just how many hours it is going to take to break in any kind of animal you might mention.

"A woman came to me the other day and said: 'I want a trained goose for my magic act. How much will you charge me to break one?'

"Sixty dollars," said I.

"Well, how do you figure that out?" she asked.

"Why, it's very simple," I said. "It's \$1 an hour, and it will take me just sixty hours."

"Yes, sir; I can train a goose—that is, to follow me around and do some simple tricks—in sixty hours, a pig in thirty hours, and so on. But as for a peafowl and a guinea hen—they can't be trained in a hundred years.

"Now, you take a troupe of trained dogs. That doesn't take half as long to do as people suppose. No, sir; a man with an animal show has got to work fast. Why, maybe the boss comes around on a Monday morning and says: 'Here—here's a bunch of six dogs. Now make an act out of it for next Monday's show.'

"There are six green dogs to make into a troupe in a week. Can't be done, you say? Sure, it can! One dog—one trick—one day. That's the principle, and you can do it too. Each dog will learn a trick each day all right. One will learn a back somersault, one a front somersault, one to walk on his hind legs, one on his front legs, one to roll over, and so on. Then by the end of the week you've got a nice little act, and all the people are acclaiming about your years of patience and that sort of stuff. Patience is a good thing, of course, but the secret is just 'know-how,' that's all." —New York Post.

A LAUGH ALL AROUND.

And, as Usual, Those Who Laughed Last Laughed Best.

"Common decency is cheap abroad," said the man who had just returned from his first trip to Europe. "During all the time I was on the continent I was subjected to discourtesy in but one instance, and I think I got away with it then, at that.

"We were crossing one of the Swiss passes by diligence, or coach, and stopped off for luncheon at some little town. It was hot, and I suppose I made rather a comical sight in my shirt sleeves and black glasses, with a handkerchief over my collar, as I stepped out of the vehicle to the road. I suppose, too, that the brand of French in which I tried to ask questions was pretty ragged.

"Anyway, a group of young Frenchmen waiting in a carriage while their team was changed saw in me their long lost original scenario, and the way they laughed was convincing, if not flattering. They weren't backward about pointing out the real, racy bits in the picture either, and they only laughed harder when I glared at them mildly. Another American and I trudged off for lunch, and when we came back there was the bunch ready to take up the howl at me again. I looked at my compatriot and he at me. I don't think either of us put the idea in words, but we began

just wilted. First they closed their mouths; then they lost their grins, then each one began squinting at the other, trying to make out what was wrong. Before we'd been at it two minutes they all discovered they needed a drink and sneaked off to the little hotel. We laughed till we saw the last of them, and then we laughed at the way we had turned the trick." —Chicago Tribune.

SPOILED ITS EFFECT.

A Speech to the Jury That Was Effectively Answered.

A well known English barrister, whom we will call Mr. K., was a most eloquent speaker, and his voice, particularly in its pathetic tones, was melody itself. His power over a jury was astonishing, and it was very seldom that he failed to secure a verdict for his client.

On one occasion, however, he was beaten and in such a ridiculous manner that a crowded court and even the grave judge were convulsed with laughter at the burlesque of the result.

The case was a charge of murder. Mr. K. was for the defense. His peroration was exceedingly touching and beautiful.

"Gentlemen of the jury," said he, "if you can find this unhappy prisoner at the bar guilty of the crime with which he is charged after the arguments to the contrary which I have laid before you, pronounce your fatal verdict. Send him to the dungeon, awaiting the death which he is to receive at your hands. Then go to your families, lay your heads on your pillows—and sleep, if you can!"

The effect of the closing words was really thrilling. But presently the counsel for the prosecution rose and said:

"Gentlemen of the jury, I should despair, after the affecting speech which has been made to you by my learned brother, of saying anything to do away with his eloquence. I never heard Mr. K. speak that better than when he spoke it now. Once I heard him speak it in a case of stealing at Leeds and again in a case at Manchester, and the last time I heard it was when two men were tried for pocket picking. But I never knew him to speak it so affectingly as just now."

This was a poser. The jury looked at one another, whispered together, and the speaker saw instinctively that he had them. He stopped at once, closing with a single remark:

"If you can't see, gentlemen of the jury, that this speech fits all cases then there's no use my saying anything more."

Telling Eggs.

The problem of tellings eggs is not an easy one by any means. Very few of us know how to do it properly. On the other hand, there are those who think they should not be told at all, but that is old fashioned nonsense, inspired entirely by false modesty. It is safe to say that eggs should be told at as early an age as possible consistent with their temperament. If allowed to go too long there is grave danger that the egg will become bad, and when an egg becomes bad it is hopeless. The world is full of bad eggs which might have been saved if they had been told in time.—Lippincott's.

Wasted Effort.

At a fire recently a brave fireman came gasping and panting from the burning building with his beard and eyebrows singed in the flames. Under one arm he carried a small but heavy box, which he deposited in a place of safety with the air of a man who had saved a box of government

To appreciate the beauty of colored skins it is not simply enough to travel. One must become familiar with the sight of them through months and years. (So strong our prejudices are!) And at last when you perceive there are human skins of real gold (living statues of gold with blue hair, like the Carib half breeds) and all fruit tints of skins, orange and yellow and peach red and lustrous browns of countless shades, and all colors of metals, too—bronzes of every tone—one begins to doubt whether a white skin is so fine. (If you don't believe these colors, just refer to Broca's pattern books, where you will find that all jewel colors exist in eyes and all fruit colors and metal colors in skins. I could not be-

"Well, sir, that bunch of Frenchmen

ZAM-BOOK

Zam-Buk spells saving to you! Suppose husband, wife or one member of the family sustains a cut or a bad scratch, which festers or turns to blood-poisoning. Result—off work! What does that mean at pay day? Zam-Buk prevents wounds, cuts or injuries "turning the wrong way." Apply it immediately, and it kills the poison and starts healing.

There is another aspect. If you have in the family, e. g. ma, ringworm, ulceration, or any skin disease, try Zam-Buk first—don't spend money on experimenting! You will have to get Zam-Buk eventually. Do it now; and save cost of the other things. Hear these persons:—

"I proved its value."

Mr. A. A. Brooks, Wellington Street, Steelton, Ont., says:—"If only I had got Zam-Buk at first, it would have saved me scores of dollars; as well as hours of agony." Mr. Brooks has been cured of eczema. He says:—"My neck, chest and body were covered with the terrible disease. The itching, burning and smarting I suffered, none who has not gone through it can tell! Doctors' lotions, salves and prescriptions didn't do me a bit of good; and from one thing to another I passed, only to find them useless. With Zam-Buk it was different, and without going through a long story, I can say that a few weeks' treatment with this great healing balm healed the sores, and rid me of the terrible eczema, which had held me in its grip for over

"I had I applied Zam-Buk in the first place instead of trying the other preparations, I would have saved myself a lot of money." Says Mrs. B. E. Bedwell, of 337 Provencher Ave., St. Boniface, Winnipeg. Mrs. Bedwell had a cut finger, which became poisoned. She says: "It became swollen and discolored, and my whole hand became inflamed violently. I called in a doctor, and he said the only way to cure it was to amputate. I can't even imagine how I suffered, and despite the doctor's treatment the finger became festered, and got so bad that the doctor advised me to go into the hospital. I feared, if I did, they would cut it off, and I might never be able to try Zam-Buk. We left off everything else and gave this balmin' trial. Well, it only took about four days to draw out the soreness! Then, bit by bit, it began to heal, and in less than three weeks from first applying the Zam-Buk the finger was as healthy and perfectly healthy. If only I had used Zam-Buk."

All skin injuries and diseases are cured by Zam-Buk. Eczema, eruptions, pimples, ulcers, piles, inflamed patches, cuts, burns, soap sores, chaps, etc., cannot resist its healing virtue. 50c. box, all druggists and stores, or post free from Zam-Buk Co., Toronto, for price. Refuse all imitations.

This was a poser. The jury looked at one another, whispered together, and the speaker saw instinctively that he had them. He stopped at once, closing with a single remark:

"If you can't see, gentlemen of the jury, that this speech fits all cases then there's no use my saying anything more."

And there wasn't. He had made his case and got his verdict.—Exchange.

Rules of Good Behavior In the Early
Eighteenth Century.

In a work entitled "Youth's Behavior," published in 1706, there is this injunction to young gentlemen, "Put off thy Cap or Hat to persons of Desert as are Churchmen, Justices and the like, turning the Cap or Hat to thyself; making a Reverence, bowing thyself more or less according to the custom of the better bred."

In the midst of remarks which indicate the utmost refinement we come suddenly upon such directions as this: "Tis not manners as soon as you are set at Table to bawl out, 'I eat none of this, I eat none of that, I care for no Rabbit; I love nothing that tastes of Pepper, Nutmeg, Onions,'" etc.

After stating that "some have been so refined in Foreign parts that they will neither be covered, nor sit with their backs to the picture of an eminent Person," the writer goes on to remark that "there are some who eat with that eagerness and impatience, they eat themselves out of breath and will pant like a broken winded Horse, but these are not to be indured"

He also warns his pupil thus: "When you are talking to any one do not continually punch him in the side, as some people do; who, after every sentence keep asking the person they are conversing with, 'Did I not tell you so?' 'What say you, sir?' and in the meantime they are every moment jogging and thrusting him with their elbows, which cannot be considered as a mark of respect."

Employees of the Krupp works can easily be distinguished, even when attired in their Sunday best. Every workman on his enrollment is presented with a curiously fashioned scarfpin composed of a miniature artillery shell made of platinum and set in silver. After twenty years' service he receives a second pin modeled on the same lines and mounted in gold. The higher grades of employees, including the engineers and those employed in the counting house, wear their shells in the form of sleeve links. The workmen are very proud of this distinction, which they call the Order of the Shell and wear on every possible occasion.

How the Frost Fence "Gives" and "Takes" Like a Spring

ANY "coilless" Fence is liable to snap in certain weather conditions.

But the Frost is a coil Fence. In Winter, when steel Wire contracts, Frost coils "give" their surplus, instead of snapping like "coilless" Fence.

And in Summer, when the Wire expands, that surplus returns to the Frost coils, instead of sagging and causing the Fence to lose its shape.

And no matter how often contraction or expansion is caused, the Frost Fence always acts the same, like a Spring.

Merely Excuses

Lots of other Wire Fences have a Tension Curve or Kink, as an excuse for "Give" and "Take." But the number of these "Gives" and "Takes" is limited. They cannot keep it up. It isn't in the Wire or the method.

Both the Frost Field-Erected and the Frost Woven Fence have extra provisions for "Give" and "Take." But no others have it. You simply cannot find another Fence which will retain its shape like the Frost.

Make Our Own Wire

We are the only Fence Makers in Canada who Make and Galvanize Wire exclusively for Fence purposes.

Wire, to give satisfactory service in Canada, should be made especially to fit off the peculiar Canadian climate, which

simply knocks the very life out of most Fences. But all Wire is not made with Canadian conditions in view.

The Wire formerly used for the Frost Fence was made in the States. But we had it made especially for us. It gave better satisfaction than most Wire, but we wanted far better.

For that reason we decided to Make and Galvanize our own Wire. So we built a Mill for Wire-making, and another for Galvanizing, and installed the most modern Machinery in use.

Then we obtained the services of one of the most Expert Wire-Makers in America. A man with 25 years of Wire-Making experience back of him.

The new Frost Wire is Annealed so scientifically that it possesses the proper temper for Canadian conditions.

Every inch is of uniform temper, and stronger than any other No. 9 wire.

It will not snap, regardless of peculiar Canadian weather variations.

more, who took advantage of the concealment of his own face to study the reflection of Fox's cards in the large polished steel buttons which he wore upon his coat.

At the corner of Bolton street and Piccadilly was Watier's club, which Byron records was a "superb club" in 1815. Beau Brummel played here regularly for ten or twelve years, but the club eventually fell into disrepute through the want of proper supervision of the admissions to membership.

Swinburne says in his "Courts of Europe" that it was in this club that a player upon seeing the witty Lord Alvanley enter the room and, dreading his satirical tongue, laid down his cards and pulled out a pair of pistols, which he laid on the table beside him. The only comment of Alvanley was:

"I hope you don't expect your adversary to follow suit?"

Every visitor to London who has passed down Piccadilly has probably remarked the imposing home of the Devonshire club at the southwest corner of St. James' street. Within this building the highest gambling in the world has probably taken place, the sums won and lost at Monte Carlo being nothing to those that changed hands here. The entrance was originally from the Piccadilly side, and many changes have been made in the interior arrangements, but some of the gilt chairs that were used by the high rollers of seventy years ago are still preserved in the clubrooms.

The proprietor of this club was originally a small fishmonger named William Crockford, who had a shop near Temple Bar. His first venture in club proprietorship was to take Watier's old house, where hazard, the American game of craps, was the chief attraction. In this he had a partner named Taylor, and they both made money, but at the end of a year they separated, and Crockford went to St. James' street where he prospered so well that he instructed the Wyatts to prepare plans for a new building.

This was opened in 1827, and, although it was a proprietary club, Crockford was shrewd enough to invest a committee with the right of election to membership, a move to which many persons attribute his immense success. Among the first of the names presented was that of the Duke of Wellington, and almost every man of note in England was either a member or a guest at some time or other.—Chicago Record-Herald.

The Aged and Infirm One.

The Haldane family has always been noted in England for its famous walkers, and the present head of the family tells this story of one of his ancestors:

This old gentleman, having been prayed for by a clergyman as "thine aged and infirm servant," immediately suggested a little walk with his surprised clerical friend. The latter consented, and the "aged and infirm" Mr. Haldane took him for such a tremendously long walk, that when the clergyman returned, utterly exhausted, he fell asleep and could only with difficulty be awakened to conduct a religious service.—London M. A. P.

A Model.

"Oh, no," declared the younger one, "my husband never goes to clubs or any other places of amusement unless he can take me with him."

"Dear me! What a splendid man! How long have you been married?"
"It'll be seven weeks next Tuesday."

Children Cry
FOR FLETCHER'S
CASTORIA

plus 120 to 160 sheets of the original paper and is four and one-half to five inches in thickness. All resemblance to paper has been lost, the block in weight, density and solidity approximating the finest grained, heaviest metal.

To complete the wheel there are required a steel tire, a cast iron hub, wrought iron plates to protect the paper on either side and two circles of bolts, one set passing through the flange of the tire, the other through the flange of the hub and both sets through the paper. The paper blocks are turned on a lathe, which also reams out the center hole for the hub. Two coats of paint are applied to keep out moisture. The various parts are next assembled, and the paper car wheel is complete.

As may be readily understood, paper which has received the treatment described may be used for almost any purpose for which metal or wood is used if not too much exposed to dampness, and to all practical purposes it is fireproof.—Harper's.

A Pert Reply.

A story told of Sir John Fisher and Lord Charles Beresford when both were stationed in the Mediterranean will bear repeating. A competition had been held at Malta for a prize annually presented by Sir John. It is known as the Malta cup, and, having so far always been won by a crew belonging to the admiral's flagship, it was fully expected by Sir John that this record would be maintained. On this particular occasion, however, a crew of the Ramillies, commanded by Lord Charles Beresford, carried it off instead. A day or two later the fleet was practicing maneuvers, and Admiral Fisher, whose reputation as a stern disciplinarian is well known, was dissatisfied with the performance of the Ramillies. He signalled accordingly to its commander the message, "Explain your reason for being late in executing maneuver." Without a moment's delay the answer came, "We are towing the Malta cup."—Dundee Advertiser.

A Cruel Joke.

Oswald, a witty and original Parisian, had a mania for practical joking. He was very amusing to his friends, but when his talents were exerted to avenge some wrong there was more bitterness than fun in his wit. One evening when a man who had not treated him politely gave a reception he revenged himself cruelly. The man was slightly deformed. All the hunchbacks of Paris, 500 in number, presented themselves at his reception. They had received notices from Oswald that if they should go to this address on this evening they would learn of a legacy which had been left them.

Damascus of Marvelous View.

The view of Damascus from the mountain where Mohammed made his great renunciation is one of the marvelous views of the world. Again and again I deserted the mosques, the bazaars, the marble baths, the courts of the fountains, the shadowy khans and the gardens by the streams for that bare height on which Abraham is said to have had the unity of God revealed to him.—Robert Hichens in Century.

Imitation.

"Why, Gladys, you are spolling your dolly."
"No, mamma; I am painting its cheeks with the same color that you use."—Judge.

An aspiration is joy forever, a possession as solid as a landed estate.—Robert Louis Stevenson.

THE LAST RESORT

When all else failed, the Doctors said, "try Fruit-a-tives"

And "Fruit-a-tives" cured Mrs. Cadieux

PLANTAGENET, ONT., JANUARY 31ST, 1910.

"About March 1st 1909, I was taken deathly sick with Stomach Trouble, Backache and General Breakdown. I failed from 125 pounds down to 80 pounds, was confined to bed for eight weeks, and was unable to eat or keep anything on my stomach, vomiting nearly all the time. I expected to die, and took many remedies as well as employing different physicians. The doctors said they could do nothing for me and, as a last resort, one of the doctors told me "to try Fruit-a-tives"—if they would not cure me, nothing would."

MDE. LAURENT CADIEUX

My husband bought "Fruit-a-tives" from Mr. Arthur Rolcan, merchant of Plantagenet, and I started taking them at once, and inside of ten days, I was able to leave my bed. My stomach got strong and I could eat and retain my food. I gained rapidly and soon had my usual good health back again, and today I weigh as much as ever, 125 pounds."

MDE. LAURENT CADIEUX.

Even the doctors are recommending "Fruit-a-tives". They realize now that these wonderful fruit juice tablets will positively cure all Stomach Troubles, Indigestion and Dyspepsia—and they are using "Fruit-a-tives" in their practice.

Few people realize the vital importance of keeping their blood pure. Impure blood is the chief cause of Stomach Trouble, because it is from the blood that the stomach obtains the fluid which digests food. When the blood is laden with impurities, the dissolving fluid (or Gastric Juice) will be impure. These impurities may come from a congested liver, from Constipation, from weak kidneys, from an inactive skin, or from all four. Naturally, the ordinary "digestive powders" and "pepsin tablets" will not cure the trouble, because they only help to dissolve the food—they do not go to the seat of the trouble. "Fruit-a-tives" is the greatest remedy ever discovered for all forms of Indigestion, Dyspepsia and other Stomach Disorders, because "Fruit-a-tives" is unequalled as a blood-purifying medicine. "Fruit-a-tives" acts directly on the liver, regulates the bowels, strengthens the kidneys, stimulates the skin, and thus rids the whole system of all impurities. "Fruit-a-tives" will positively cure you of any kind of Indigestion. "Fruit-a-tives" is sold by all dealers at 50c a box, 6 for \$2.50 or trial size, 25c. If you are unable to obtain "Fruit-a-tives" conveniently, do not accept substitutes but send to "Fruit-a-tives" Limited, Ottawa and the regular size packages will be mailed you, postpaid, on receipt of price.

Freaks of Language.

A peculiar kind of blundering known as "folk etymology" is responsible for some of the queerest freaks of language. An easy example will make this clear. Our American word "carryall" for a kind of vehicle is not a compound of "carry" and "all," but a slight distortion of the French "carriole," a diminutive car. The change was made in obedience to the universal tendency to assimilate the unknown to the known, to make words mean something by associating them with others which they resemble in sound. Often there is no etymological relation between the words associated, as when sparrowgrass is made out of asparagus. This particular corruption was once in such good colloquial use that Walker, the lexicographer, wrote, "Sparrowgrass is so general that asparagus has an air of stiffness and pedantry."

His Critic.

What astonishes the visiting Briton most is the manner in which every kind of immigrant to the United States adapts himself to the prevailing

ideas about Englishmen. In the course of conversation with the noble Italian who condescends to brighten shoes the visitor informed the bootblack that he was an Englishman—and Englishmen had a great respect for Italians and had entertained Garibaldi in grand style.

"Ingleses! Ha, ha! Ingleses!" said Diego in soft, musical tones. "Ha! They spic no good. Dey droppla da blatch!"—Exchange.

No Encouragement.

The family had stood the long strain of Uncle Hobart's illness well, but the peculiarities of the physician chosen by Uncle Hobart himself had been, to say the least, trying. "Do you really think he will recover, Dr. Shaw?" asked the oldest sister of the invalid, who had borne with his vagaries patiently for years.

"I know how you feel, with Thanks-giving coming on, and all," said the doctor, peering at her from under his shaggy eyebrows, "but it's too soon to tell. He may get well, and then again he may not. I can't encourage you yet either way."

OLD GAMBLING CLUBS

Famous Resorts of the Betting Fraternity in London.

THE WAY FOX WAS TRICKED.

A Scheme That Allowed Him to Be Cheated by Lord Barrymore—Watier's, Commanded by Lord Byron and Patronized by Beau Brummel.

In America such a thing as a proprietary club owned and managed by one man is almost unknown. In London it is the usual thing, and almost all the medium sized clubs which are devoted to some special purpose, such as card playing, are proprietary.

In the old days this was a money making enterprise, and some immense fortunes were piled up by the proprietors of London card clubs. But now whenever a club shows signs of unusual prosperity the members get together and insist on forming some sort of governing body which shall have power to pass upon the proposals for membership. They also see to it that the proprietor spends a proper proportion of his profits on the comfort of the members instead of putting everything in his pocket.

The fashions in the card clubs continually change with the years and with the games that are the rage. A century ago it was against the rules in many of the best clubs to play cards before dinner, whereas nowadays the principal play is between the hours of 4 and 7. The income of the proprietor today is from the annual subscriptions and from the fixed fees for card money. In the old days the largest source of revenue was from the counters picked up from the floor after the game was over.

George Raggett, the owner of White's, one of the most famous gambling clubs in the world, situated on St. James' street, made it his rule to attend to his guests in person whenever exceptionally high play was in progress, knowing that he would be well repaid for his time. Upon one occasion, after picking up counters to the value of nearly \$1,000 from the floor, he received a gift of almost as much from Harvey Combe, who had been playing from Monday evening until 11 o'clock on Wednesday morning. Sir John Malcolm, Tippoo Smith and Ward, the member of parliament for London, being the other players at the table.

Some of the proprietary clubs adopted curious rules to attract and keep their customers. One of the chief difficulties then, as now, was to insure a game from any one that might happen to drop in at odd hours. One of these, nicknamed the Nerve Ending club, had a bylaw that no player should quit a table until a fresh arrival was ready to take his place.

One very popular feature was to provide light silken curtains which could be drawn between the faces of the players so as to conceal from an adversary any unguarded expression of disappointment or of triumph upon picking up a hand or following the course of play.

It was at this club that Fox lost a large sum of money to Lord Barrymore, who took advantage of the concealment of his own face to study the reflection of Fox's cards in the large polished steel buttons which he wore upon his coat.

At the corner of Bolton street and Piccadilly was Watier's club, which

SICK HEADACHE

A Symptom of Troubles Which are Removed by Dr. Morse's Indian Root Pills.

Sick headaches are not merely afflictions to be borne as patiently as possible—they are danger signals. They never come unless the digestive system is out of order, and their regular recurrence is proof positive of serious trouble and a warning that should be heeded promptly.

These terrible headaches permanently banished by Dr. Morse's Indian Root Pills.

Sick headaches are caused by Indigestion, Biliousness or Constipation, and no amount of "headache powders" will do more than temporarily relieve them. The only way to get rid of them entirely is to cure the Constipation or Indigestion that is causing them, and nothing will do this quicker or more effectively than Dr. Morse's Indian Root Pills.

Dr. Morse's Indian Root Pills are purely vegetable in character, and are free from any harmful drug. For over fifty years they have been in constant use in Canada, and have proved most effective in regulating the bowels, aiding digestion, banishing sick headaches and restoring vigorous health.

Dr. Morse's Indian Root Pills have stood the test for over fifty years, 25c. at all dealers. W. H. Comstock Co., Ltd., Brockville, Ont.

PAPER CAR WHEELS.

Safer and Stronger but More Costly Than Other Wheels.

We naturally think of paper as something lacking in strength and of a paper article as being fragile, so are somewhat alarmed when an encyclopedic friend remarks that the wheels of the car on which we are slipping along at the rate of a mile a minute are made of paper. This opportunity to be alarmed occurs, however, on only the best of railways, as paper car wheels, though safer and longer lived than any others, are also more expensive. The principal advantage of wheels made from this unpromising material is found in the fact that they are not injured by the violent vibrations to which car wheels are subjected.

The paper used in the manufacture of these wheels is known as calendered rye straw board, or thick paper. It is sent to the car wheel shops in circular sheets measuring twenty-two or forty inches in diameter, and over each of these sheets is spread an even coating of flour paste. A dozen sheets are placed one on the other and the lot subjected to hydraulic pressure of 100 tons or more. After two hours' pressure these sheets, which have now become a solid block, are kept for a week in a drying room at a temperature of 120 degrees, after which a number of blocks are pasted together, pressed and dried for a second week. A third combination of layers is then made, after which there is an entire month of drying. The final block contains 120 to 160 sheets of the original paper and is four and one-half to five inches in thickness. All resemblance to paper has been lost, the block in weight, density and solidity approximating the finest grained, heaviest metal.

"What astonishes the visiting Briton most is the manner in which every kind of immigrant to the United States adapts himself to the prevailing

doctor, peering at her from under his shaggy eyebrows, "but it's too soon to tell. He may get well, and then again he may not. I can't encourage you yet either way."

Hear the best Talent at its best through the Edison Phonograph

The world's best entertainers, the head-liners of the vaudeville shows, the stars of the operas, the good composers, band leaders and orchestra conductors are making Records for the Edison Phonograph. All of them are represented in our catalog.

Why do they consent to make Records for the Edison Phonograph? Because they believe that the Edison Phonograph will do them real justice, giving them the most artistic reproduction.

When you listen to an Edison Record played by an Edison Phonograph, you hear the original just as it was sung or played. Can you do this with any other instrument?

Edison Phonographs can be had from \$16.50 to \$162.50
Edison Standard Records - 40
Edison Amberol Records (play twice as long) - 65
Edison Grand Opera Records - 85c to \$1.25

There are Edison dealers everywhere. Go to the nearest and hear the Edison Phonograph play both Edison Standard and Amberol Records and get complete catalogs from your dealer or from us.

FOOLED HIS SUPERIOR.

An Astonished Pasha and a Lieutenant Who Won Promotion.

Kassim Pasha when minister of war for Egypt was very particular in regard to the personal appearance of his officers and issued stringent orders that they should never appear unshaven in public. One day he met upon the street a lieutenant who had bearded the pasha and disregarded his orders. "To what regiment do you belong?" Demanded the indignant minister. "To the — regiment, at Abas-euh," replied the frightened lieutenant. "Get into my carriage at once so that I can carry you to the encampment and have you publicly punished." was the stern command which followed.

The young man obeyed, and the twain rode along gloomily enough for some time, when the pasha stopped his carriage and entered an office where he would be detained for some time on business. Seizing the opportunity, the culprit sprang from the vehicle, darted into a neighboring barber's stall and regained his post before the return of his jailer minus his beard. For the remainder of the route the officer buried his face in his hands and seemed the picture of apprehension.

Abas-euh was reached at last, and all the officers were assembled to witness the degradation of their comrade, who all the while kept well in the rear of his chief. "Come forward, you son of a dog!" cried the irate pasha, when there stepped before him an officer with a face as clean as a baby's and a look of the most supreme innocence. His excellency gave one look of blank astonishment and then, with an appreciative smile breaking over his war worn features, turned to the assembled officers and said, "Here, gentlemen, your old minister is a fool, and your young lieutenant is a captain."

THE HOMEMAKER.

Man's Chivalry to the Fried Goddess of the Fireside.

As we men frequently admit, it is our chivalrous regard for woman which leads us to desire that she shall confine her wholly admirable energies to the making of our home and the keeping of our houses. She is tender and frail, and so we urge that she shall not for a moment drop her role as the goddess of the household. There is nothing that so rouses our almost sacred admiration as to see our own particular goddess with a dishrag in one hand and a frying pan in the other. Let us never desert this high ideal of womanhood and its lofty purpose in life.

Particularly let us not do so because if a woman does not keep the house it will not be kept. Would we men engineer and prepare 1,005 meals in one year? Would we wash dishes 1,005 times, wipe them 1,005 times, sew, darn, mend, devote our lives to a gray monotony of treadmill effort? Not on your life! Our chivalrous regard for adored woman would not permit it. And we would go crazy within six months if we tried. I know of nothing that we should cling to more closely than this chivalrous regard for our womankind. It saves the cost of many and many a hired girl.

I have penned this little tribute to man's chivalrous regard for woman because anybody can see that it deserves it. Woman, the housekeeper (and nothing else), the fried goddess of the fireside, the queen of her domestic domain, with a stewpan for a tiara and a stove hook for a scepter, let us together pledge her, while we register our chivalrous vow that we will keep

WORTH MOUNTAINS OF GOLD

During Change of Life, says Mrs. Chas. Barclay

Graniteville, Vt.—"I was passing through the Change of Life and suffered from nervousness and other annoying symptoms, and I can truly say that Lydia E. Pinkham's Vegetable Compound has done for me during this trying period. Complete restoration to health means so much to me that for the sake of other suffering women I am willing to make my trouble public so you may publish this letter."—MRS. CHAS. BARCLAY, R. F. D., Graniteville, Vt.

No other medicine for woman's ills has received such wide-spread and unqualified endorsement. No other medicine we know of has such a record of cures of female ills as has Lydia E. Pinkham's Vegetable Compound.

For more than 30 years it has been curing female complaints such as inflammation, ulceration, local weaknesses, fibroid tumors, irregularities, periodic pains, backache, indigestion and nervous prostration, and it is unequalled for carrying women safely through the period of change of life. It costs but little to try Lydia E. Pinkham's Vegetable Compound, and, as Mrs. Barclay says, it is "worth mountains of gold" to suffering women.

FAIR VIEW.

Some farmers have commenced seeding.

Mr. and Mrs. George Rooks, spent Monday at S. Loucks.

Samuel Shannon, spent Thursday, at S. Loucks.

Robert Bartley and Carl Bell spent Friday at Camden East.

Mr. and Mr. Asselstine spent Easter at W. H. Cadmen's.

Samuel Maniel spent last week at Hay Bay.

Herbert File has moved to his new home.

MAKYSVILLE.

We are having lovely spring weather and the farmers are busy making maple syrup.

Mr. and Mrs. B. McGuinness spent Sunday with friends at Chambers.

Mr. and Mrs. L. Reid, Shannonville, spent Sunday with Mr. and Mrs. S. Campbell.

Mr. and Mrs. M. Sexsmith spent Thursday with their daughter, Mrs. J. Russell.

Miss Mary McGuinness entertained a few of her friends on Sunday evening. Mrs. J. Ryan spent Easter at her home in Lindsay.

Mr. J. Fahey returned to Coteau on Wednesday after spending Easter at his home here.

Mr. J. Drummey is helping himself to a new roof for his barn.

CROPS FOR SHEEP.

The wise shepherd in planning his crops for the year has regard to the needs of his flock. He recognizes the

DOWN IN MEXICO.

New York, April 4.—Little by little the details of the recent smash up of the United States Banking company of the City of Mexico and the connection therewith of the Bank of Montreal are being received in this city.

It appears that President Ham, of the defunct bank, is incarcerated in the famous Belem prison on the outskirts of Mexico, where so many prisoners have entered never again to be heard of, dead or alive. In fact, so far as the reputation of the place is concerned the old French Bastille was a paradise in comparison.

A day or two before the smash Mr. Ham went to the Bank of Montreal, and, stating that he had three-quarters of a million of dollars in gold deposited in a New York banking institution, asked to have a draft cashed for that amount. Mr. Saunders, manager of the Canadian bank, and his advisory board, having explicit confidence in Ham, cashed a draft for \$600,000.

A few days after they discovered that, although Ham had shown them a pass book with the amount of three-quarters of a million on deposit in New York, as he had alleged, not one cent was forthcoming, and this is why Ham is now languishing in prison, where his lawyer alone can see him, and only at rare intervals.

When the "run" started the Bank of Montreal, having no idea of the bank's condition, took charge of the wreck and paid out some \$500,000 more to the depositors, which, as a manner of fact, was so much good money thrown after bad.

There is also another phase of the question, inasmuch as some depositors seeing the Bank of Montreal in possession, did not withdraw their money, and now threaten action against the Canadian bank, alleging that had the latter not allayed their fears they would have withdrawn their money, which has now gone where the good Ethiopians go.

Mr. Saunders, who was in charge of the branch of the Bank of Montreal at the City of Mexico, is a Torontonian, a brother of Dyce Saunders, the well-known Toronto cricketer.

Several prominent officials of the Bank of Montreal, including Mr. Stavert, have been despatched to Mexico to look into the financial catastrophe, and until they report definitely there appears to be no method of finding out just how hard the Bank of Montreal has been hit by the downfall of Mr. Ham's financial combination.

It is also rumored that Mr. Saunders is to be relieved of his position, owing to his having placed implicit confidence in a fellow Canadian.

The prime losses are understood to have occurred by investment in Mexican propositions which have been overestimated.

Lax-ets 5 C Sweet to Eat

MISS E. BOUVARD
WAS TAKEN SICK FROM CATCHING COLD PE-RU-NA RELIEVED.

MISS ERNESTINE BOUVARD, Duck Lake, Saskatchewan, Can., writes:

"At the close of 1903 I took sick as the result of catching cold. I became very weak and could not do anything.

"I consulted a doctor who had me take various kinds of medicine, but I did not find any relief from my suffering. At the advice of a friend, I wrote to you and you advised me.

"After I had taken two bottles of Peruna there was noticeable improvement. I combined the use of Peruna, Manalin and Lacupia and after taking several bottles of each I find myself entirely cured.

"I can certify that it was through your medicines that I recovered my health. I advise every one who is similarly afflicted to obtain Dr. Hartman's advice and be benefited."

Mrs. Wilda Mooers, R. F. D. No. 1, Lents, Oregon, writes:

"For the past four years I was a wretched woman, suffering with severe backaches and other pains, leaving me so weak and weary that it was only with difficulty that I was able to attend to my household duties.

"I used different remedies, but found no relief until I had tried Peruna.

"Within two weeks there was a chance for the better, and in less than three months I was a well and happy woman.

"All the praise is due to Peruna." Peruna is not a local remedy, but an internal systemic remedy. It will relieve catarrh in its most obstinate form.

Stolen Joke.

The shade of the ice baron had introduced himself to Charon on the river trip.

"Quite a roomy bit of water, this Styx," he commented. "Never freezes over, does it?"

"Not so's to interfere with navigation," said Charon smilingly, "and, by the way, that very fact gave Mephisto the idea for his favorite joke."

"You don't say! What's the gag?"

"Why, when a guest in hades complains of the scarcity of ice the old boy explains that it's due to the unprecedented perversity of the past winter!"—Buffalo Times.

BLOOD DISEASES CURED

man's... because anybody can see that it deserves it. Woman, the housekeeper (and nothing else), the fried goddess of the fireside, the queen of her domestic domain, with a stewpan for a tiara and a stove hook for a scepter, let us together pledge her, while we register our chivalrous vow that we will keep her where she is; unless we men need her as a stenographer or something else, in which event our chivalrous regard may stretch a few points—California Monthly.

NOTHING WAS LOST.

An Omission in a Wedding Ceremony That Didn't Count.

A distinguished officer of the United States navy once told this story on himself:

At the time of his marriage he had been through the civil war and had had many harrowing experiences aboard ship, through all of which he kept courage and remained as calm as a brave man should. As the time for the ceremony came on, however, his calmness gradually gave way. At the altar, amid the blaze of brass buttons and gold lace marking the full naval wedding, the officer was all but stampeded, and what went on there seemed very much mixed to him. Fearing the excitement of the moment would temporarily take him off his feet, the officer had learned the marriage ceremony letter perfect, as he thought, and he remembered repeating the words after the minister in a mechanical sort of way.

After the ceremony was over and all was serene again, including the officer's state of mind, the kindly clergyman came up to him and touched him on the shoulder.

"Look here, old man," he said; "you didn't endow your wife with any worldly goods."

"What's that?" asked the bridegroom with something of astonishment in his voice.

"Why, I repeated the sentence 'With all my worldly goods I thee endow' several times, and despite my efforts you would not say it after me."

The bridegroom seemed perturbed for a moment, and then a beaming light came into his face.

"Never mind, sir," he said. "She didn't lose a blessed thing by my failure."—Exchange.

the wood-finish that endures—

M L Floorglaze renovates shabby furniture—makes worn woodwork look new—finishes floors with beautiful gloss that lasts—has a hundred uses right in your home. And it is so very easy to apply!

Floorglaze

Won't fade—won't crack—won't mar easily

Comes in little and big tins. Seventeen handsome solid enamel colors to choose from—also seven shades of Lacs that simulate hardwood finish—also a Transparent natural finish. Gallon coats 500 sq. feet. Good for use outdoors, as well as in. Ask your paint dealer or drop us a line for interesting news of M L Floorglaze.

CROPS FOR SHEEP.

The wise shepherd in planning his crops for the year has regard to the needs of his flock. He recognizes the advantage of providing not only a variety of foods but a succession of succulent crops the season through. Bulletin No. 12, "Sheep Husbandry in Canada", published and issued free by the Live Stock Branch at Ottawa, takes up this subject in a practical and thorough manner. Under special crops for sheep it deals with clover, alfalfa, vetches, rape, cabbage, turnips, mangels, corn and the several classes of grain. Each is treated separately in regard to method of cultivation and manner of feeding. Dealing with vetches the bulletin says:

"Vetches, or tares as they are also called, make excellent fodder for sheep, either as a soiling crop or as cured hay. This crop much resembles peas in habit of growth and requires about the same kind of cultivation. Its vines are more slender than pea vines and stand up better when grown with a stiff variety of oats. Vetches are grown extensively for sheep feed in Great Britain, and to some extent in Canada for the same purpose. The writer, while raising sheep, always grew a small area of tares with oats for coiling the show flock, and in case of a shortage of clover vetches were cured for hay. The crop being fine in vine and very leafy is much relished by sheep and constitutes a rich diet.

"Two varieties of vetches are grown for fodder. The common vetch is the chief sort cultivated, but the hairy variety is receiving some attention. The latter produces the heavier yield but so far the seed having to be imported is very expensive and few care to bother with it.

"The soil for vetches should be clean, mellow and rich. The seed may be sown in drills or broadcast. A good seeding for either soiling or hay is about three pecks of vetches and four pecks of oats per acre. The vetches are ready to feed any time after the crop comes into blossom and before the seed commences to ripen. For soiling the crop may be hauled to racks, or be distributed on the sod of a pasture field as soon as cut, or it may be allowed to wilt in the swath for a few hours. Vetch hay is made in much the same manner as clover or timothy is handled. Vetches may be pastured by sheep, but this is a wasteful practice, as much of the crop is destroyed by tramping."

Sheep raisers who do not already possess a copy of this bulletin would do well to order one from the Live Stock Commissioner at Ottawa.

Profanity of His Profession.

"Who is that scientific gent in your 15?" asked the scrub lady.

"I dunno," answered the broom gentleman. "But he's a funny one to swear. You ought to hear him. When he saw a lot of mold on top of his ink he said, 'Beillus' just that way."

Safer.

"Those two statesmen are so angry they won't speak."

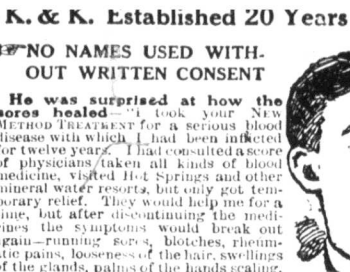

"Well," answered Senator Sorghum, "that's better than starting a controversy."—Washington Star.

Quite Fresh.

She—Did you see many fresh faces at the opera the other night? He—Oh, yes. Some of them had only just been made that evening.—Boston Transcript.

BEFORE TREATMENT

AFTER TREATMENT

He was surprised at how the sore healed. "I took your New Method Treatment for a serious blood disease with which I had been afflicted for twelve years. I had consulted scores of physicians (taken all kinds of blood medicine, visited Hot Springs and other mineral water resorts, but only got temporary relief. They would help me for a time, but after discontinuing the medicines the symptoms would break out again—running sores, blotches, rheumatic pains, looseness of the hair, swellings of the glands, pains of the hands swelling, itchiness of the skin, dyspeptic stomach, etc. I had given up in despair when a friend advised me to consult you, as you had cured him of a similar disease 8 years ago. I had no hope, but took his advice. In three weeks' time the sores commenced to heal up and I became encouraged. I continued the NEW METHOD TREATMENT for four months and at the end of that time every symptom had disappeared. I was cured 7 years ago and no signs of any disease since. My boy, three years old, is sound and healthy. I certainly can recommend your treatment with all my heart. You can refer any person to me privately, but you can use this testimonial as you wish."

W. H. S.

THE LAW OF SACRIFICE.

To Use Our Lives in Any Way for the Enriching of All Lives Is True Living.

"A living sacrifice—your rational services."—Romans xii. 1.

An altar is an eternal necessity. All who live give. Sacrifice is spontaneous to the upward moving life. The higher the self the more will it give in self-sacrifice. Men may have made their oblations often to please their deities, but they have always also sought out some object upon which they might joyously bestow the best and deepest of themselves.

This is the heart and essence of all true religious worship, whether it be that of a harmonious life constantly offering itself to some great being or aim or that of the special period when men seek to give expression to their religious aspiration and devotion. Both are parts of the process of the glad giving of the richest and best of oneself, to some higher and nobler being or aim.

Deeper than the law that leads us to getting and gaining is this law of giving, of sacrifice. It runs through all our living. It guides our social organization. It makes possible the home where the larger lives delight to serve the lesser ones and all find the true joy of living in self-giving. It makes the pains and restrictions of motherhood and fatherhood the real enriching of these lives.

FRIENDSHIP

is the spirit finding its way to give itself to some other, the outflow of life of thought, sympathy, cheer, the exchange of the inner gifts and light; each life expanding as it bestows itself on the other. And some service we are able to render for a stranger makes us more truly his debtor than he can be ours, for he has afforded us a chance to sacrifice.

The word sacrifice gains a new glory; the old dread or horror of a bloody victim led unwillingly to propitiate the gods is changed to the great privilege, the crowning glory of our kind, that life is so truly our own that we may use it for others, that we catch this divine attribute and find ourselves lifted into a higher atmosphere, tasting sweeter living as we learn this law of enrichment through giving.

And so the spirit of man, coming to a sense of the great spirit of all,

the source of life and the fountain of all love, goes out to that life and love with longing, with desire to give itself to the most high. The passion for the divine has been something nobler and more real than anything presented in neurotic sentimentality; it is the eternal in us seeking the eternal.

The true man gives to this great and all embracing life not because he hopes to win some child's reward, and still less to blind omniscient eyes to his shortcomings, but because there is in him something that answers to that greater life with love, with desire to come into fellowship, to taste the friendship that finds itself in sacrifice.

Wherever our lives are set forth in ways that we know to be high, wherever we seek to make living a true business of self-giving in harmony with the great spirit of life, there the whole world becomes our altar and every moment one of worship.

A LIVING SACRIFICE

is not a life led out and offered in death, but a life led up and offered by the process of living.

The world wants live saints, living sacrifices. Love offers not its worst but its best. If we love God and love our fellows we will cease to talk of living anything less than our best, our whole, sane, healthy, joyous and joy giving lives.

No man worships anywhere who does not thus worship everywhere. He makes no offering to high heaven at any time who is not offering himself with all his powers and possessions always to carry out the will of the highest, to make heaven real and present. And where men are so living life becomes too real and serious for its time to be spent in speculations as to whether the recording angel sees us or not.

Here is the great altar, my city, my home, my daily ways of life. Here is the great and sanctified period of worship, all my days and hours. Here burns the blessed incense, the glow of affection, the joy of mutual helpfulness, the warm currents of human love. And here is the seat of true communion, fellowship, and partnership with the most high in the divine privilege of love.

HENRY F. COPE.

11-15. The principle established here is that the messenger of Jesus is not a beggar. The blessing he brings is of such a nature that it is considered an honor to be worthy to receive him. Let him, therefore, salute such a house with the words: "Peace be to this house." The dust of an unworthy house, or city, is to be stamped from the feet, as if it had brought a heathen's defilement.

40-42. To receive hospitality a true envoy of Christ, or to do the humblest service for one, is to receive Christ himself. Thus does Christ identify himself with those who faithfully do his work.

THE SECRET EXPLOSIVE

"Miss Balfour, sir."

"Say I'll be down in one moment, Griffiths," replied Kenneth Graham.

"Miss Balfour has come up, sir."

Kenneth, Lord Mapledon's private secretary, was locking away the papers on which he had been working late at the War Minister's residence, and glanced up with a look of surprise on his handsome, alert, clean-shaven face. Having to return to Berkley Square to finish some work on the night of Lady Glamorgan's reception, he had arranged with Muriel that she should pick him up on her way there, and had promised to be ready at ten o'clock to join her in the carriage.

"Muriel!" he exclaimed, his surprise deepening into astonishment as she entered, dressed not for the reception, but in a plain walking costume, and wearing a thick veil.

She stood close to the door until the servant went out, and then, with a sigh which ended in almost a sob, she made a gesture of profound distress.

"My dearest, what is the matter?" he cried, quick to take alarm as he hurried to her with outstretched hands.

To his further dismay she appeared at first to shrink from him. "Muriel, my dearest," he said again, striving to take her hands. But the next moment his own were seized, a pair of handcuffs were snapped upon his wrists, and the barrel of a revolver was thrust close to his head.

"Don't try to make trouble, Graham. I'm dangerous."

"Alec!" It was Muriel's younger brother, a dissipated wastrel, with an evil reputation.

"Yes, I'm Alec," was the reply, spoken with a grin, as the young fellow pushed up the veil which had concealed his thin, weak features. "I knew Muriel was coming so I borrowed a dress of hers. I want the secret of that new explosive. I know the papers are here, and I mean to have them. If you don't give them up, I'll blow your brains out and take them for myself."

Always cool and collected in face of a crisis, Kenneth checked the impulse to call for assistance. A moment's reflection showed him that if the papers were taken Muriel herself would be involved, as the servants had been fooled by

him with a gloating smile as he counted them off.

Kenneth threw up his hands and rose slowly with a heavy sigh. "You'll ruin me, Alec," he murmured.

The young fellow, completely deceived by this apparent obedience, was falling back a step when Kenneth with a sudden rush seized the revolver in his two hands and wrested it away. A short, sharp struggle followed, in which Kenneth, by far the more powerful of the two, had much the better of it, despite the help of the manacles.

"Don't force me to brain you, you young idiot," he cried; but the other paid no heed, fighting desperately to release his right hand and hitting out viciously with his left. But he was forced back across the room to the door, and Kenneth seeing no other way, had raised the revolver for a heavy blow, when they heard Lord Mapledon's sonorous, penetrating voice.

"This way, Miss Balfour."

With a groan of terror Alec gave in and dropped on his knees. But the scandal of the thing had still to be averted, if possible.

"I can save you, you fool," whispered Kenneth, dragging him to his feet. "Get these infernal things off my wrists."

There was only time for Alec, who was now trembling in a sweat of fear, to find the key and unfasten one of them; and Kenneth dashed back, closed the bureau, and slipped on his overcoat. "Pull down your veil and hold your tongue, mind, whatever happens." With that he put his hand in Alec's arm, the better to conceal the handcuff, snatched up his hat and turned to the door just as Lord Mapledon and Muriel entered the room.

The latter started violently at seeing him with his arm linked in his companion's; but Kenneth, cool and ready-witted, assumed an air of pleased surprise. "Muriel!" he cried. "Why I was just coming for you, as Alice said you couldn't come here. This is Miss Balfour's younger sister, Alice, my lord," he explained, inventing the relationship for Lord Mapledon's benefit.

"Alice!" exclaimed Muriel sharply, indignant at finding her lover in this compromising situation; and she was about to repudiate it when he interposed.

"We were just going, sir, unless you want me," he said, as the great man bowed gravely to Alec, who was shaking so violently that he would have fallen had it not been for the strong grip on his arm.

"No, Mr. Graham. I met Miss Balfour at the door and merely brought her up," said his lordship; and with that the situation would have changed to comedy but for Muriel's justifiable anger.

"There is some mistake," she began. "I must know—"

"A very happy mistake, too, Muriel," broke in Kenneth. "I was afraid you were ill." And he added in a whisper, edging to her: "For God's sake, trust me."

She disregarded the appeal, however, and an angry reply rose to her lips; but it was checked as she stared fixedly at her "sister's" dress. She started, and then laughed hysterically. "Alice is — is always — always playing tricks," she said, in hesitating, faltering tones, as she leant for an instant against the lintel and then turned and led the way unsteadily out of

THE SUNDAY SCHOOL

INTERNATIONAL LESSON,

APRIL 10.

Lesson II. The Mission of the

Twelve, Matt. 9. 35 to 10. 15,

40-42. Golden Text,

Matt. 10. 8.

Verse 35. This verse sums up the ministry of Jesus—teaching, preaching, healing.

9. 34, is in keeping with this. John enjoyed a long and glorious ministry, but James was early martyred. These first four were granted an unusual intimacy with Jesus; one of the fathers calls them "the most elect of the elect."

3 Philip—See John 1. 44; 6. 5 (Was he a sort of "commissary of subsistence" to the apostolic band?); 12. 21; 4. 8; also Acts 8.

Bartholomew—The meaning of the word is "Son of Tolmai," and he was probably Nathanael, who would fittingly be sent out on the mission with Philip, the man who brought him to Jesus. Compare the mention made by John (who

Lesson II. The Mission of the Twelve, Matt. 9. 35 to 10. 15.

40-42. Golden Text.

Matt. 10. 8.

Verse 35. This verse sums up the ministry of Jesus—teaching, preaching, healing.

36. He was moved with compassion—For he saw the multitudes as none other (John 2. 25), and he saw that the bare limitations of time made it impossible to cope single-handed with the needs of so many—ignorant, diseased, spiritually lost—like sheep not having a shepherd (quoted from Numbers 27. 17), worn out with travel (literal meaning of distressed), and scattered (an easy prey, therefore, for their enemies).

37, 38. Jesus seems to change the figure suddenly and to refer to the multitude as a plenteous harvest, to which the few laborers are unequal. But Matthew probably introduces into this connection a saying of Jesus uttered on another occasion (Luke 10. 2). It is, however, a fitting prelude to the calling of the twelve to the apostolate.

Chapter 10, Verse 1. His twelve disciples. These specially chosen followers are variously designated in the Gospels as "the twelve disciples," "the twelve apostles," "the twelve," and sometimes simply, "the disciples." Matthew speaks four times of "the twelve disciples," and only once of "the twelve apostles." There were various stages in the gathering together of these men. Five at least had already been summoned to leave their ordinary pursuits and become companions of Jesus. Peter, James, John, Andrew, and Matthew. Philip and Nathanael had also enjoyed intimate relations with him. The number correspond to the ancient tribes.

Calling them. In this chapter it appears that Jesus gave the disciples not only authority to cast out "unclean spirits" (see note on "demons" in lesson for March 13), and to heal, but also fellowship in his suffering (v. 20), assurance of necessary equipment (v. 10, 20), and identification with him (v. 10).

2. Twelve apostles. The name is introduced at this point, inasmuch as the disciples were now sent forth for the first time upon a definite mission. Later the term was extended to Paul, Barnabas, and others.

Simon. He received the name Peter (v. 3), at the time of his apostolic call (John 1. 42), and was the spokesman of the apostles. Impulsive, ever eager, he was, nevertheless, able at the last to make earnest protestations of his love for the Master (John 21. 15), a love that found expression in two years of faithful service as an apostle. Evidence is not wanting that he died a martyr at Rome, crucified, at his own request, head downward (since he deemed himself unworthy to die like his Lord). Andrew his brother, and he were fishermen of Bethsaida, and had met Jesus early in his ministry at Bethany, beyond Jordan. Andrew is said to have been crucified in Achaia.

James. — and John. Two other brothers, sons of Zebedee, a prosperous fisherman, with whom the son was in partnership. Since their mother was sister of Mary, they were own cousins of Jesus, after the flesh. They were called, from their vehemence or their fiery eloquence, Sons of Thunder. Luke

was like a sort of "commissary of subsistence" to the apostolic band (12. 21; 4. 8; also Acts 8).

Bartholomew—The meaning of the word is "Son of Tolmai," and he was probably Nathanael, who would fittingly be sent out on the mission with Philip, the man who brought him to Jesus. Compare the mention made by John (who never speaks of Bartholomew) of Nathanael, who is never mentioned in the other Gospels (John 1. 45; 21. 1, 14).

Thomas—Called Didymus (John 11. 16), which, like Thomas, means "the twin." Tradition gives him the name of Judas. John's references to him give us the picture of a despondent, pessimistic type of man, yet a man of courage, and possessed of a dogged devotion to the Master.

Matthew—This was the name given Levi, the publican, after his call. The other lists of apostles make no reference to his hated previous occupation, and when Mark and Luke tell of the early summons of Levi they charitably omit to identify him with the future apostle, though Matthew publishes the identity (see notes on lesson for March 20).

James—David Smith and others conjecture that Alphaeus, the father, is identical with Clopas (John 19. 25), and that his wife, Mary, was one of those at the cross; further, that Levi and James may have been brothers. This James is called by Mark "the little," to distinguish him from James the son of Zebedee. His companion, Thaddaeus, is called by Luke "Judas the son of James." He also went under the appellation of Lebbaeus. Only once does he figure in the Gospels (John 14. 22).

4. Simon. The margin gives "Zealot" for Canaean. The Zealots were the opposite extreme from the publicans like Levi; for they were patriots to the death, and were bitterly opposed to the Roman rule.

Judas Iscariot.—So called because he was from the village of Kerioth, in southern Judah. Though branded "thief" (John 12. 6), "betrayed" (Matt. 10. 4), "traitor" (Luke 6. 16), "a devil" (John 6. 70), and "son of perdition" (John 17. 12), he must have been a man of apostolic proportions to have been called by Jesus.

5, 6. Here is indicated the sphere in which the apostles were to work. Gentiles and Samaritans were excluded, because, while the ultimate aim was a world wide kingdom, it was necessary for Jesus to secure a strong base of operations among the chosen race. This was according to the divine programme, which we find illustrated again and again in the method of Paul.

7, 8. The nature of their work. It was to be gratuitously performed, in accordance with the authority and assurance of strength which they had freely received. No instance is recorded of their raising the dead on this mission; but even that was accomplished in the later labors of the apostles (Acts 9. 40; 20. 10).

9, 15. Instructions concerning method of procedure and equipment.

10. Their purses, or girdles, were to contain no gold, and they were to carry no wallet (10), or "provision-basket." One coat and sandals were to suffice; they were to be without even a staff to help them on their toilsome journeys. Why? First, their mission was too urgent for them to be cumbered with extra luggage; second, their work was worthy of their sustenance.

you don't give them up, I'll blow your brains out and take them for myself."

Always cool and collected in face of a crisis, Kenneth checked the impulse to call for assistance. A moment's reflection showed him that if the papers were taken Muriel herself would be involved, as the servants had been fooled by the impersonation. His own wit must save the situation, if it could be saved.

"Quick, Graham, which is it to be?" demanded Alec threateningly, but weakening under Kenneth's steady gaze and stronger will. "It's got to be one or the other, and it's a matter of minutes. I'm desperate for money; and Muriel herself will be here soon."

The last sentence gave Kenneth his cue—to make delay. "How much?" he asked.

"Thousands more than you can pay. Don't try to fool me."

"The papers are in that bureau yonder and the keys are on the bunch in my pocket. I can't give you either keys or papers while I'm handcuffed. Take these off, and I'll get you what you want."

"Very likely," was the sneering reply. "Turn round," he added truculently.

Kenneth obeyed, and the keys were taken from his pocket. "Now go over to the bureau, and show me the key."

They crossed the room, Kenneth having pointed out the key, and the young fellow made a nervous, rapid search.

"You are trying to fool me," he cried angrily, the search proving futile.

"They are in the safe concealed behind that secret panel at the back. It opens with secret springs, and the two keys are on the bunch there."

"Open the panel then, and be hanged to you."

"How can I, like this? There's a spring on each side of the bureau, and I can't stretch my arms to reach them with my hands fastened."

Alec turned on him with an oath. "You are only trying to waste time. Tell me how to do it, without any more fooling."

Kenneth observed that the hand which held the revolver was trembling nervously. "I'll tell you, of course. I've no choice," he said, with an affection of great alarm. "Take that shelf out and you'll see the springs—wooden knobs—one on each side. You'll see I can't possibly reach them."

Alec shot a glance of suspicion at him, and then tried unsuccessfully to move the shelf with one hand, while holding the pistol with the other. "You pull out your end," he said sharply.

Kenneth shook his head. "I—I can't," he said hesitatingly.

"If you refuse I'll fire, by G—."

Will you do as I tell you?"

"I—I daren't, Alec."

"You'd rather lose your life, you mean?"

"You can't get what you want. You couldn't even if you were to shoot me," was the reply in the same faltering tone.

"I'll see about that." And once again the barrel of the weapon was thrust against Kenneth's forehead. But he gauged the other's indecision.

"For Heaven's sake don't fire," he murmured, and sank into a chair as if overcome by fear.

"I'll give you ten seconds. No more," cried Alec, standing over

ever, and an angry reply rose to her lips; but it was checked as she stared fixedly at her "sister's" dress. She started, and then laughed hysterically. "Alice is always—always playing tricks," she said, in hesitating, faltering tones, as she leant for an instant against the lintel and then turned and led the way unsteadily out of the room.

Kenneth followed, keeping his manacled hand concealed in Alec's arm and helping his stumbling steps down the broad stairway. He drew a deep breath of relief as soon as they were safely in the carriage.

As they started Muriel's anger revived. "Who is this—this person?" she asked.

"Your brother Alec. It was touch and go that we were not all ruined. But we're safe now, thank heaven." And another sigh of relief broke from him.

A full explanation followed; and a few days later Alec left England to start as a "remittance man" in America, having confessed everything about those who had bribed him to steal the secret of the new explosive.

These men were dealt with by the agents of the Government; and Kenneth's shrewdness and discretion in unearthing the plot secured for him an appointment which enabled him to fix the day for his marriage with Muriel. — Pearson's Weekly.

CURED BY SUNSHINE.

Few People Properly Estimate Value of Sunshine.

It is really astonishing how few people there are who properly estimate the value of the sun's rays. A valuable lesson on this point may be learned by observing the lower animals, none of which ever neglect an opportunity to bask in the sun. And the nearer man approaches to the primitive condition the more he is inclined to follow the example of the animals. It is a natural instinct, which civilization has partially destroyed in the human race. The effect of sunshine is not merely thermal; its rays have chemical and electrical functions. It is more than possible that sunshine produces vibrations and changes of particles in the deeper tissues of the body as effective as those of electricity. Many know by experience that the relief it affords in wearing pain, neuralgia, and inflammatory, is more lasting than that of any application whatever. Those who have face ache should prove it for themselves, sitting in a sunny window, where the warmth falls full on the cheek. For nervous disability and insomnia the treatment of all others is rest in sunshine.

ATE RAT PIES.

During the siege of Paris rat pies were largely eaten. The Paris Journal, in the month of December, 1870, gravely published directions for catching the rats, which swarmed in the sewers of the city. "Take," said the Journal, "a long line and a large hook; bait with tallow and gently agitate the rod. In a few minutes a rat will come and smell the savory morsel. It will be some time before he decides to swallow it, for his nature is cunning. When he does, leave him five minutes to meditate over it; but be calm, and do not let his excitement gain on you; draw him up—and behold your dinner!"

HOME.

DAINTY DISHES.

Fried onions are a delicious vegetable. Choose some small onions, parboil them, and then fry whole till perfectly tender. Scatter pepper and salt over, and serve with stews, etc.

Potato Salad.—Slice cold boiled potatoes thin and mince an onion fine. Alternate layers of potatoes and onions. Season each layer with salt, pepper, melted butter, and a little vinegar. Let stand an hour or two before serving.

Apple Cake.—Roll out some baker's dough to the thickness of half an inch, cover half with chopped apple, sweeten and scatter ginger over. Cover, and bake in a quick oven.

Carrot Ginger.—Scrape and boil some carrots and mash them, and to each pound of pulp allow three-quarters of a pound of sugar, and to every three pounds of pulp the grated rind of a lemon and two ounces of powdered ginger. Boil for half an hour and you will have a delicious jam.

Mashed cabbage is excellent now, when people are apt to be tired of the plain vegetable. Boil the cabbage till tender, then drain and chop it very finely. Return it to the pan with a teaspoonful of butter, half a teaspoonful of vinegar, and a good seasoning of pepper and salt. Make very hot, and serve in a mound on a hot dish.

A Vegetarian Dish.—Boil some cabbage till tender, chop small, and place it in a pie-dish, with little knobs of butter. Then cover with a layer of grated cheese, and bake in the oven for half an hour.

If cooking apples, peel and core six apples, place them in an enameled dish, filling up spaces with Demarara sugar, lemon-peel, cloves, and butter. Put small pieces of butter all over top, and cover with buttered paper. Bake until perfectly soft, and serve cold.

Scotch Shortbreads.—Mix well together half a pound of butter and a quarter of a pound of sugar; then add one pound of flour, and roll out into cakes of size required and bake in a slow oven. For a richer quality add an egg; while a tablespoonful of rice-flour will impart crispness.

OYSTERS.

Steamed Oysters.—Drain and wash one quart of fresh oysters. Put them in a steamer over boiling water and allow them to cook over a moderate fire for twenty minutes. Melt slowly one-half cupful of butter in a saucepan. Add to it one teaspoonful of grated horseradish mixed with a little water, one teaspoonful of Worcester sauce, one-half teaspoonful salt and pepper. Place the oysters in a dish, pour over them the sauce and serve.

Broiled Oysters.—Dry the oysters in a cloth, dip each one in melted butter well peppered, then in beaten egg, then in bread or cracker crumbs, also peppered. Broil on a wire broiler over live coals four minutes. Drop over each a little melted butter. Serve hot.

Oysters and Macaroni.—One cupful of minced raw oysters, two

Get a move on you in the right direction, then keep going.

Everybody appreciates goodness—if it's the real thing. dirt can be removed from windows and mirrors by putting a few drops of ammonia on a piece of paper and rubbing.

To remove the odor of fish or onions from pans, wash in good suds, then place pan inverted over flame of gas range or put in hot oven for a few minutes.

To make squash pie without eggs, take 1½ cups dry mealy squash, 1 cup boiling milk, ½ cup sugar, 1 cracker rolled fine, ½ teaspoon each salt and cinnamon.

Before taking nauseous medicine, such as cod liver oil, or anything with a strong taste, chew a small piece of lemon peel, and the disagreeable taste will not be noticed.

When fat catches fire while frying, do not move the pan about, or pour water into it, but rather scatter a little sand, or flour in it. Either of these will quench the flames.

When gilt frames or moulding of rooms have specks of dirt from flies or other causes upon them they may be cleaned with white of egg applied with camel-hair brush.

Many inexperienced cooks—and some careless ones—have difficulty in making smooth gravy. If the flour is stirred in with a fork instead of a spoon there will be no lumps.

When baking cake let the mixture come well to the corners and sides of the pan, leaving a slight depression in the centre, and when baked the cake will be perfectly flat on top.

To make rye gems, take one cup flour, 2 cups of rye meal, 1 tablespoon sugar, 1 tablespoon melted butter, 1 teaspoon soda, 1 egg, 1½ cups sour milk, little salt.

To remove the bitter taste from cooked cranberries, before taking from the fire add a pinch of baking soda. Then skin off the scum, put through a sieve, and it is ready for use.

Bits of bacon may be satisfactorily used in many ways. Chop them finely and add to rissoles, stews, and hashes. Try frying beef steak and chops with finely chopped bacon, and you will have a very tasty dish.

Pouring hot fruit into glass dishes is likely to result in breaking the latter. To prevent this, stand the glass dish on a cloth wet with hot water and then pour the fruit into it.

To prevent eyeglasses from steaming in cold weather rub the glasses thoroughly on both sides with a little vaseline or cold cream, then rub with tissue paper or cloth to clear the glasses.

To clean white all wool suits, to one gallon of gasoline add one cup of flour, tablespoon of baking soda; rub soiled places with soap, wash well, and rinse in clean gasoline, shake out and dry.

A tender steak is not always procurable. Before cooking it should be beaten well with a rolling pin. Dust it over with salt and pepper, and then brush over with salad oil. Leave it then for an hour.

A restless patient made much more comfortable in the corners of the "under sheet" are carefully pinned to the under side of the mattress with safety pins. Draw the sheet tightly and pin it securely.

GIVE YOUR BOY ADVICE

THINGS HE SHOULD BE TOLD ABOUT.

Trouble and Disease Caused Through Ignorance When Sowing "Wild Oats."

The following from the pen of Ella Wheeler Wilcox is timely. She says:

Are you the father of a young son? Are you sending your son away to college, or into the world to work, without giving him any instruction which may save him from lifelong disaster?

Of course you will say that boys will be boys, that you do not expect your son to be a paragon of virtue; that you know he must learn what life is, in his own way; and that he must sow his wild oats, and reap the harvest and then settle down to sensible, serious things.

CONDITIONS ARE DIFFERENT.

But have you realized just what the harvest may be that your son will reap?

Long ago, in some small village or little town, you perhaps scattered a few wild oats; and they never brought you any heavy harvest of trouble.

You know other men who learned life's lessons in their own way, without the direction of parents; and so you think your son will come through all right if left to himself.

But, my dear sirs, do you know how our land is changing, and how very many new dangers are menacing it from every side?

OLD WORLD VICES.

We are in touch with old world and old world culture, old world customs and old world vices.

Every country in the world which has grown in opulence, and become luxurious in its tastes, and extravagant in its habits, has finally degenerated through its excesses and its vices.

Old Egypt, Rome, Greece, have paid the price; and our own country is on the road to the same goal, unless our great men rise to the occasion and show the race its dangers and show it, too, the way out into safety by the paths of altruism and hygiene.

ASK THE DOCTOR.

Our medical men are being very frank in their accumulation of statistics. If you want to know just what dangers your son may encounter, in his pleasant task of sowing wild oats, go to any prominent and respectable physician and ask him to tell you what he knows about the physical condition of a large percentage of men in America to-day. You may have heard of the "White Slave traffic;" you may be aware that girls are being sold all over our land to traders in women's bodies; and that the old evil of the earth is rampant in our midst.

RUNS A RISK.

In sowing his wild oats your son does not merely break a moral law, and learn a lesson and reform.

He runs the risk of life-long disease; and not only disease for himself, but for his wife and children.

He runs the chance of escaping with temporary illness himself, and then of producing blind, crippled,

On the Farm

CARE OF SOW AND PIGS.

With porkers selling at present prices, "pigs are pigs," in reality, and the problem of saving the youngsters on their arrival, and keeping them growing steadily, is an important one. In the case of litters coming in March, comfortable quarters are a necessity. If the pen is not close enough to exclude frost and drafts, it will pay to put in a temporary lining to the outside wall where the sow makes her bed, and a temporary covering of boards overhead may also be necessary to keep the place sufficiently warm. The bedding should not be too plentiful, and short wheat straw is preferable, as in long straw the piglets find difficulty in getting out of the way when the mother lies down, and are in danger of being overlaid and smothered. An attendant should be on the watch when the youngsters are coming, but should not interfere unduly as long as things are going on normally, though circumstances may be such as to require attention. It is a good plan to get the sow used to being handled and petted before the time for parturition arrives, so that she will not be frightened or disturbed when it is necessary to place the young pigs beside her for warmth and nourishment. If the sow is nervous or excitable, and persists in rising during the ordeal, it is well to have a basket on hand, with some chaff or short straw in it, in which to place the pigs, covering them with a blanket, until all the litter are born, when, by scratching the sow on the back and gently rubbing her udder, she may be induced to lie down, when the pigs may be quietly placed with her. The sow should then be left undisturbed for at least 12 hours, and, perhaps, as well for 24 hours, before offering her any food, and then only a warm drink of swill, with perhaps a little bran in it. Feed her lightly for the first three or four days, and gradually increases the bulk of her feed as the pigs get stronger and need more milk. As the pigs grow older, and the milk supply larger, care should be taken that both sow and pigs have room to move about each day for exercise, as there is danger of constipation in the sow, and of the pigs becoming too fat from the heavy supply of milk. They should grow without getting fat while young, as an accumulation of fat is liable to hamper the action of the heart and circulation of the blood in many cases, causing the ailment known as thumps, the symptoms of which are quick breathing, and the working of the sides, like bellows, a condition which can seldom be relieved, and commonly results in the death of the finest of the litter in a day or two after being noticed. If the weather is not suitable for turning them out for a few minutes for exercise daily, they should be forced to move around in the pen or the feeding passages, and for this purpose an old broom may serve a good purpose in getting them to go where wanted. When the pigs are two or three weeks old, a low trough should be placed where they

Broiled Oysters.—Dry the oysters in a cloth, dip each one in melted butter well peppered, then in beaten egg, then in bread or cracker crumbs, also peppered. Broil on a wire broiler over live coals four minutes. Drop over each a little melted butter. Serve hot.

Oysters and Macaroni.—One cupful of minced raw oysters, two-thirds cupful of finely broken cooked macaroni, one cupful of cracker crumbs, small lump of butter, one level teaspoonful each of salt and pepper, one beaten egg. Mix these ingredients thoroughly and shape into croquettes, dip into beaten egg, then in cracker crumbs. Fry a golden brown in hot fat and garnish with celery. Makes a fine luncheon dish.

Corned Oysters.—One can of corn, yolks of three eggs, salt and pepper to taste; add six crackers rolled fine; beat the whites of the eggs separately and add the last thing. To each oyster drop a tablespoonful of this mixture into boiling lard. Serve hot.

FRAGRANT SCENTS.

For note paper: Powder together one-half ounce each starch and orris root, add four drops attar of roses, and keep in tiny bags in writing desk.

For linen goods: Pound into a powder one ounce each cloves, bay-leaf seeds, and allspice and four ounces dried rose leaves. Mix with this one ounce common salt (dry) and put into little bags.

For clothes: Pulverize one-half ounce each cloves, cedar, and rhubarb. Sprinkle in chest, drawers, or clothes press, it will prevent moths as well as creating a beautiful scent.

WORTH KNOWING.

For cracked lips, from which so many suffer at this time, try the application of honey and glycerine in equal parts.

Raw beef bones should never be thrown away; for, broken into small pieces, they make an excellent foundation for soup.

If your milk pan or any utensil holding cold liquids has a small hole in it, melted paraffin is a good remedy if the soldering stick is not handy.

To peel a large quantity of onions without discomfort put them in a pan and pour a kettle of boiling water over them; then peel them at once.

When ironing cloth seams rub each on the inside with yellow soap before pressing with the iron.

Next best to having a thin felt under your carpet is to have several thicknesses of newspaper.

Rice water should never be thrown away. It makes excellent stock for vegetable soup.

To keep taffeta silk from cracking soften by ironing with a hot iron before making up.

When rugs are to be beaten, fasten them to the lines with the largest sized safety pins.

Natural wood kitchen tables and sink boards can be kept cleaner if you rub them with the cut half of a lemon.

Rub pan first with vinegar then with butter when baking fish, and it will not break or stick to pan when removing it.

Wash and scrape carrots, cook until soft in boiling salt water, pour over thin cream sauce, and pour the whole over a hot broiled steak, serving at once.

Finger spots and all grease and

then brush over with salad oil. Leave it then for an hour.

A restless patient is made much more comfortable if the corners of the "under sheet" are carefully pinned to the under side of the mattress with safety pins. Draw the sheet tightly and pin it securely.

OFFICIAL LOTTERIES.

Germany and Spain Both Go In for This Sort of Gambling.

Most persons would not assume to trace any distinct resemblances between Germans and Spaniards, but they meet on one common ground and that is gambling. The lottery is as great an institution in Germany and as eagerly participated in as ever the Spanish variety. In both countries there are official as well as private lotteries.

There is this difference: The lottery tickets in Spain are peddled everywhere. In the streets the small boys crying the newspapers offer lottery tickets if you do not care to read. In the theatres, if you have no desire for cakes or sweets, there are always lottery tickets to be had.

In the clubs and the cafes there is great excitement in Spain after the broadside containing the winning numbers comes out. The boys run around the streets hawking these sheets like newspapers, and those who cannot afford to buy them crowd around the small tobacco shops where lottery tickets are sold to see if by chance they have drawn a prize. In the cafes, you see men cramped over these sheets, comparing the numbers with bundles of the papers which may represent fortunes.

The Spanish illustrated weeklies always make a feature of the drawings for the big lotteries, such as the Christmas drawing. They seek out the possessors of the fragments of the main prizes, because almost never has the winning ticket been held entirely by one person. There are always stories of how Senora X, having dreamed of a certain number combination, exhorted her husband to buy this, and how he bought a thirty-second part of the ticket and behold! it won a prize of 4,000 pesos. There are always, too, stories of how some person, convinced that he would not win, gave away or sold very cheaply part of the ticket that took the big prize.

In Germany things are quieter, but none the less determined. The tickets for the Government lotteries are sold in regular licensed stores, which do no other business. The investors buy their way into four or five successive drawings, convinced that as the speculators who won small or large prizes are eliminated there is more room for them.

The German lottery is different from the Spanish in that way. There is one big drawing every once in a while in Spain, for which a ticket is good only once. The German sort is in series, good for, say, five drawings, limiting the field for the last drawing, because every number that wins a prize is paid off and eliminated, after the successive drawings.

There are any number of unattached drawings, too, in Germany, and all the big cities have lotteries, for various purposes. There are lotteries for the benefit of charities and so on.

It's easy to be a cheerful giver—theoretically.

RUNS A RISK.

In sowing his wild oats your son does not merely break a moral law, and learn a lesson and reform.

He runs the risk of life-long disease; and not only disease for himself, but for his wife and children.

He runs the chance of escaping with temporary illness himself, and then of producing blind, crippled, deformed and insane children, to swell the lists of the world's unfortunates.

Statistics prove that 25 per cent. of all blindness in children can be traced to the diseases of the father; diseases gained while "sowing his wild oats."

The sympathetic friends of many seemingly good men who die before middle age of paralysis, insanity, locomotor ataxia and Bright's disease wonder at "God's will" in so afflicting suffering mortals; while the physician in charge knows that these maladies were induced by the men in their youth; in the oat field.

WOMEN SUFFER.

Eighty-five per cent. of the deaths of women who die of diseases peculiar to the sex are the result of poisoned systems—from the same cause.

It is one of the awful laws of nature that innocent women and children must suffer from the sins of men, bent upon sowing their wild oats.

TRAINING BOY FOR HUSBAND

Boy Waited Upon in Youth Apt to Grow Up Selfish.

It is the aim of every thoughtful mother to bring up her daughter in such a way as to faithfully and honorably fulfill the duties of a wife when she comes to marry the man of her choice, but it seldom occurs to either parent to train a young son with the same praiseworthy intention, and the boy is too often allowed to grow up thoughtless, selfish and sometimes even vicious. He may be bright and clever at school, and his duties in office or workshop may be executed to the best of his ability, but more than this is fit him to fill the duties of husband. A boy ever-indulged in youth, waited upon by mother and sisters, invariably grows into a selfish man, who demands that everyone should give way to his own undisciplined desires. The result is seen in the pages of every newspaper we take up. Homes are wrecked and wives weakened and worn with the long strain of misery and neglect, fill an early grave—or a worse fate befalls them.

This sad state of things could be greatly minimized if parents would look into the future and train their boys to be honorable in all their dealings and to weed out every trace of selfishness or vice before the roots are firmly fixed. Many an aged mother has reason to be thankful that she had so brought up her boy when she looks around upon his happy and prosperous home and sees the content which reigns therein.

LITTLE SATISFACTION.

"Did you have a good day's shooting?"

"Great!"

"Kill many rabbits?"

"No, I only got one. But I think I wounded at least 20."

And a frenzied financier is a chap who rocks the financial boat.

day or two after being noticed. If the weather is not suitable for turning them out for a few minutes for exercise daily, they should be forced to move around in the pen or the feeding passages, and for this purpose an old broom may serve a good purpose in getting them to go where wanted. When the pigs are two or three weeks old, a low trough should be placed where they may be given a little warm milk apart from the sow, and a little ground oats, with the hulls sifted out, may be gradually added. For best results, the pigs should not be weaned before they are eight weeks old, though, if they are eating well, and it is desired to breed the sow again for an early autumn litter, they may be weaned at six weeks of age. It is desirable that fall litters come not later than September in order that they may have plenty of exercise out of doors, and gain strength of bone and vigor of constitution to endure the necessary confinement in the finishing period in the winter months. With present and prospective prices, it will pay to give attention to the adoption of methods of treatment which keep the pigs going on from start to finish.—Farmer's Advocate.

SENTENCE—SERMONS.

You never get near to God by running away from men.

We can usually trust our friends to discover Providence in our troubles.

The better men see the faults of others the more blind they are to their needs.

One true man in a false faith is better than a score of false men in any true faith.

Some men measure their truthfulness by their dexterity in juggling with the truth.

Some people who think they are grounded on the faith are only stranded on its shoals.

No man ever paid too little for a selfish indulgence or too much for the joy of sacrifice.

Some are so anxious about their endings they never get around to making a beginning.

Some men will not be content with their polish until they have ground all principle away.

It's a common delusion that we are overcoming our own sins by advertising those of others.

FACT AND FANCY.

A friend in need is a friend to dodge.

Italy produces yearly 70,000,000 gallons of olive oil worth \$120,000,000.

Many a man in love with a dimple makes the mistake of marrying the whole girl.

Keep your feet dry. The best chest protector is worn on the sole of the boot.

It is better to get wisdom than gold. It is also easier.

Meat is only three cents a pound in Australia, and a good workman's meal costs a dime.

Though courtship is the intoxication of life, it is not necessarily true that marriage is the sick headache.

A sensible man doesn't care if he isn't good looking; he knows that there are others.

People who live in glass houses should raise early vegetables.

The best cure for worry is to find some one who needs your help.

SERVANT GIRL HEROINES

BRAVE WOMEN WORTHY OF GREAT REWARDS.

Felled a Burglar Senseless—Gave Her Savings to Save Her Master from Ruin.

"You acted with remarkable bravery—I may even term it heroism. Had it not been for you, your master would probably not have been here to-day to tell the story he has."

Those words were spoken a few weeks back by one of His Majesty's judges sitting on the Bench of a criminal court, and he was addressing a young girl who had been giving evidence against the scowling ruffian in the dock, a burglar, says London Tit Bits. The girl had, it appeared, been alarmed by a strange noise in the house in the middle of the night. She had slept soundly and had at first heard nothing of the desperate struggle her master had been making against the midnight enemy he had found in his room. Grappling with him, he had been dashed to the floor and his wife had fainted. Creeping to the room, the servant-girl had appeared on the scene unexpectedly, armed with a poker, and had dealt the burglar so sturdy and unlooked-for a stroke that she had felled him to the floor unconscious. She had saved her master's life at the risk of her own. There was an outburst of applause in the court at the judge's praise that he did nothing to restrain, and the youthful heroine, blushing with the unexpected admiration she was receiving, looked, as one of the reporters said, "a pretty picture of delight and embarrassment."

DEVOTION TO HER MISTRESS.

Many a family could tell of heroism and self-sacrifice on the part of their servants of services performed for them that are not only "not reckoned for in the wages," but that no money could adequately reward.

"In addition to the sum of two hundred pounds a year to be paid to the said Mary Garnett during the term of her life, I also bequeath to her the sum of one thousand pounds as a mark of my gratitude for her devotion to my deceased wife and to myself upon an occasion when other friends failed me."

These words were part of the will of a rich gentleman, named Miller, who died some three years ago. Miller had lived in a northern suburb of London and had done fairly in Stock Exchange speculation. Then came disaster. One evening he arrived home with a pale face. He was ruined! From that evening his wife went about the home, that had previously been so happy, a broken woman. Tradesmen in the neighborhood scented danger as regarded their accounts. Rumors spread abroad, and quickly reached the ears of the servant in the unfortunate villa, Mary Garnett. Having talked the matter over with her "young man," the servant-girl came to a brave resolve. The two had about £120 in the bank, and the girl insisted on her astonished master and mistress taking the money and "seeing what

revealed her to him in the most unexpected manner. She was a young servant-girl, who, amidst all the peril that threatened her, remained calm and collected and possessed apparently of only one thought—to save a little fair-haired youngster five years of age, whom she had confided to her. In that moment when they were quitting the sinking ship West's eyes, resting on the pale-faced girl speaking courageous words to the boy clasped to her bosom, found the girl he sought.

AGAINST STRIKE LOSSES.

Germany Has System of Insurance for Employers.

Insurance against strike losses is an institution of recent date in Germany. The numerous strikes which have taken place in Germany have caused industrial employers to use all means for self-protection and self-preservation against the attacks of labor. While the workmen must suffer deprivation during a strike, they have nothing to lose. When the funds of the union are exhausted, the striker is supported by contributions from other labor organizations.

Severe material damage is done the employer by a strike. The factory lies idle and suffers depreciation from want of use. Production ceases and the employer in these days of keen competition is exposed to the danger of being driven out of the market which he has with difficulty acquired. As the stoppage of work generally takes place at times of greatest prosperity, when orders are most numerous, he is likely to lose all his custom to competitors.

This unfavorable position of industry as compared with labor, which is supported by its system of organization, has brought about industrial insurance against loss by strikes. The extent to which it prevails may be judged from official statistics just published. According to the bureau of statistics, there are in all forty-eight companies, namely thirteen strike-indemnity insurance companies, twenty-six employers' associations for strike insurance and nine in which indemnity is from occasion to occasion granted.

The conditions under which a strike indemnity are paid is different in the several companies. Assistance is granted in case of strikes and generally in lockouts. But this is subject to fixed conditions, the most important of which is that the stoppage of work has not been produced by the fault of the employer himself.

The obligations of the companies or associations to their members begin after a fixed interval, in most cases three months, but many vary up to one year. The regulations are also different as to whether after the lapse of this period relief shall be granted from the first day of the breaking out of the strike or only after a later juncture or period. Some of the companies make the granting of the indemnity upon further conditions, for instance, the number of the strikers.

The whole institution, however, is still in its infancy. The number of its adherents, nevertheless, increases from year to year, showing its economical usefulness. The fact that it strengthens the position of the employer against the attacks of labor is evidenced by the diminished number of strikes, with

THE POVERTY PROBLEM

HOW THE WORKLESS FARE IN FOREIGN CLIMES.

The Chinese Poor are Looked After—Happy Life of the Beggar in Brazil.

The sad way in which Britain neglects her homeless and unemployed is a dark blot on her otherwise fair fame, says London Answers.

There is a lesson for us to be drawn even from China. It is surprising, no doubt, but the Chinese Government have great consideration for those who struggle. In Peking, for instance, there are numerous buildings, resembling barns, with floors covered with layers of multi-colored feathers. They are called "ki-mas-fans," and are open all night. By paying half a cash—a hundred cash are equivalent to 7 cents of our money—the homeless and weary can obtain a comfortable night's rest.

The beds on which they sleep are the feathers, and so soon as the allotted number of inmates are installed in the houses, attendants throw over them

HUGE FELT BLANKETS.

The lights are then put out, after which conversation is forbidden. The majority of the "ki-mas-fans" are for men only, but one or two are set apart for women and girls.

The homeless need not starve in the Flowery Land. If a poor man knocks at the door of a wealthy citizen and asks for food, he generally finds a good meal and a drink ready for him in the kitchen. And it is seldom that he is asked to chop wood or cut the grass of the front lawn in return for the meal provided. A cash or two is also given him by the head of the house.

You will never see in Brazil the miserable wanderers so common a sight in British towns. Out there the lazy and the penniless take to begging, and if they are blessed with a little cunning they will always have their bread well buttered. Rio Janeiro is the happy hunting-ground of the professional beggar, and he can be seen

HIDING ABOUT ON A MULE,

sitting comfortably in a wooden chair on wheels, which is pulled along by a diminutive black boy, or reclining lazily in a hammock strung from a pole and borne by two full-grown negroes. One of these beggars admits making twice as much money in a week as a good mechanic can in a month in England. As the authorities make no particular effort to stamp out this state of affairs, begging is one of the commonest professions in the country, and, in consequence, homeless men and women are almost unknown.

In the Austro-Hungarian empire the same thing is prevalent. If a man falls out of work and cannot obtain fresh employment he joins a "beggars' school," and there are one or more such establishments in each big town. Here he goes through a regular course of instruction, and is taught a number of set phrases which are sure to draw money from the pockets of the sympathizer. And what is more, he is

HINDOO BOMB-THROWERS

VEGETARIANS ARE BECOMING BLOOD-THIRSTY.

Editors Deplore the Spread of Anarchy in the Provinces of India.

The assassination of Arthur Mason Tipetts Jackson, Chief Magistrate of Nasik, in the Presidency of Bombay, India, on December 22, emphasizes the curious fact that this date was a day of assassination or violence in St. Petersburg, Secul, and Bucharest, as well as Bombay. The times of revolutionary violence are evidently not yet passed away, and in the case of India the native editors and publicists are asking whether the vegetarian nirvanic Hindu, world-famed for his scruples against taking life, is actually degenerating into a vulgar bomb-thrower?

Speaking recently in England Mr. Surendra Nath Bannarji, who is called by his countrymen, "The Father of Indian Unrest," and who takes great pride in this title, remarked:

"I re-echo the sentiments of the vast majority of my countrymen—that we deplore these anarchical incidents and have condemned them with

THE UTMOST EMPHASIS.

The mind, the judgment, and the conscience are arrayed against them. I regard them as a passing phase of excitement which will disappear under the soothing effects of progressive and conciliatory measures."

One Hindu editor, Shyamaji Krishnavarma, who has been accused by many well-informed Englishmen and East Indians of instigating Madan Lal Ohingre to assassinate Lieut.-Col. Sir William Hutt Curzon-Wyllie on the night of July 1 last, does not treat the bomb movement in India with such lofty contempt. In his vitriolic sheet, the Indian Sociologist, published from Paris, he rejoicing writes:

"After surveying the situation we come to the conclusion that our enemies are exceedingly disconcerted on finding that our doctrines are effectively put into practice by the advanced Nationalist party in India and elsewhere."

Bal Gangadhar Tilak, a native editor, who is to-day in jail convicted of fomenting unrest in India, wrote an article some months ago in his propaganda organ, the Marhatta (Poona), extolling terrorism as vindicating the Bengali character. To quote:

"The Bengali youths engaged in bomb-making and bomb-throwing have committed

A NUMBER OF BLUNDERS.

But we fancy they have probably one clear motive in engaging in bomb and revolver practice, and that purpose must be declared as served. The purpose was to avenge the Bengali nation upon Macaulay; and that is done for all time to come. National calumny is one of the most unpardonable crimes that writers are liable to commit. Such a crime was committed by Lord Macaulay when he penned his infamous libel upon the Bengali in his essay on Lord Hastings. The calumny struck and being caught

reached the ears of the servant in the unfortunate villa. Mary Garrett. Having talked the matter over with her "young man," the servant-girl came to a brave resolve. The two had about £120 in the bank, and the girl insisted on her astonished master and mistress taking the money and "seeing what they could do with it." It was a big sum for the young couple to spare, and they had saved it with a view to being married.

"Do you know," asked Miller, "that if this money is to be of any use to me I shall have to speculate with it and I may lose it all?"

"If you do, I shall have done my best," replied the girl. "But I don't believe you will lose it."

He did not. From that day the evil fortune that had hung over the family melted away like mists before the sun. Miller became rich and he was not ungrateful.

AT GREAT RISK.

It was a Cardiff girl, named Margaret Evans, who, walking with her little charge, a child of five years of age, saw suddenly at a turn of the road a dog coming towards them, pursued by a crowd uttering the terrible cry, "Mad dog!" There was no time to escape. The brave girl hurriedly thrust the child behind her in a doorway and, pulling off her shawl she was wearing and wrapping it round her arm, stood over the precious mite calling on Evans, with some sense of strange danger, to protect it. Springing on her, the dog buried its fangs in her wrapped arm, while she gripped at its throat with her other hand. The next moment one of the crowd, rushing up, dealt the beast a blow on the head that laid it lifeless. At what cost had Margaret Evans saved the child? She had fainted. Bending over her, one of the rescuers tore away the shawl and the slave of her dress. The dog's fangs had not penetrated to her flesh! She was safe! When Margaret Evans struggled back to her senses she heard the sound of wild cheers around her. Relieved from their terror concerning her, the crowd were giving expression to their joy at her escape. A gentleman who had arrived on the scene in his carriage took her and her little charge into it to drive them home, and their way was made slow by the cheering throng that surrounded them, escorting the servant-girl home to her master's door as if she had been a hero returned from war crowned with glorious deeds. She had risked her life for the child she loved! No hero could have done more.

A NURSE-GIRL.

I was the devotedness of a nurse-girl to a child in her charge that resulted in a remarkable wedding a couple of years ago in New York. On a ship named the Clito, a passenger vessel, a certain Mr. Emanuel West, a young fellow and the son of an enormously wealthy American, was travelling when the vessel encountered a terrible storm and was wrecked, and the unfortunate passengers on board were driven to seek safety in the boats. It was a time when the human soul betrays its heroism or its meanness. Young West had travelled far, one of his objects being to discover, if possible, some young lady whom he might deem worthy of his love. He was almost giving up his quest when the wreck of the Clito

reached the ears of the servant in the unfortunate villa. The whole institution, however, is still in its infancy. The number of its adherents, nevertheless, increases from year to year, showing its economical usefulness. The fact that it strengthens the position of the employer against the attacks of labor is evidenced by the diminished number of strikes, with their unhappy consequences.

CATERPILLARS MADE USEFUL.

In China They are Made into a Fertilizer for Trees.

"Catch a caterpillar, smash it, and then pour on the lime; allow to ferment for a few hours and plough under."

This is the recipe for a new fertilizer sent over by Wilbur T. Gracey, American Consul at Tsingtau, China. The secret was discovered by some Germans who have been conducting experiments in afforestation on the barren hills around that ancient city.

The first plantings of trees were made about eleven years ago. The varieties used were pine, larch, walnut, oak, ash, maples and alders. So rapidly have the trees grown says the Van Norden Magazine, that timber is being sold at fancy prices. Small branches are in great demand for firewood, and the larger wood is being used in mines. The sale and exportation of acacia are expected to become quite an industry in the next few years.

It is considered very remarkable that these experiments should have succeeded in the least degree. Practically every known difficulty was encountered, and the chief one was the caterpillar.

Girdles of glue, so effective in this country, were placed around the trees, but the energetic worms huddled them without apparent trouble. Thousands of Chinese women and boys were employed to destroy the caterpillars and insects by hand. Mr. Gracey reports that in 1905 more than 7,000,000 caterpillars were gathered, smashed, covered with lime, and afterward used as fertilizer.

Most of the plantations have been saved, but up on the mountain sides the caterpillars have almost won their fight. The acacia withstands the attacks of these little enemies of plant life better than any other species, and it is now being planted on the summits of the mountains in an effort to check future destruction.

Chinese Government officials are so impressed by the success of the experiments that they are establishing forestry schools and placing them under the direction of the Germans. The first school was opened at Mukden, Manchuria, two years ago.

RAVAGES OF ABSINTHE.

Major Henri Robert, in the course of an address in Paris on alcoholism, and especially on the abuse of absinthe, spoke in moving terms of the terrible ravages caused by the "green demon." The drink curse was, he declared, the direct cause of the decrease in the birth rate and of the physical and moral degeneracy observable in the French race. In the most contaminated districts the recruiting counsels had to refuse as many as 50 per cent. of the young men called to serve with the colors.

man falls out of work and cannot obtain fresh employment he joins a "beggars' school," and there are one or more such establishments in each big town. Here he goes through a regular course of instruction, and is taught a number of set phrases which are sure to draw money from the pockets of the sympathetic. And what is more, he is

TAUGHT TO BE POLITE.

Thus it happens that the men who solicit alms in the towns of Austro-Hungary have the reputation—not an enviable one, perhaps—of being the politest beggars in existence, and this politeness gains for them a very good living indeed.

When a country does not look upon begging as a criminal offence the homeless are few and far between. France has a small army of beggars. Those too idle to work, and these who cannot obtain work—and there are more of the latter than the former—flock into the cities and beg alms from passers-by.

There used to be an office in Paris kept by an old German-Jew. This man was in the habit of employing "out-of-works" to collect the names and addresses of the charitably-disposed in the Gay City and its suburbs. He had the names and addresses printed on long slips, which he sold to beggars at so much a slip, to the mutual advantage of himself and his numerous work-shy clients.

SPEED OF WILD DUCKS.

In Dead Calm They Average 58 Miles an Hour.

My observations were made with mallard and widgeon just off the sea, and coming in at the evening flight, such birds not having got fully under way, having travelled only about two miles or a mile and a half, according to the state of the tide, says a writer in the Scotsman. The times varied from 10½ miles an hour in the teeth of a hurricane to 180 miles an hour with half a gale driving them forward, their speed with a full gale being below this.

In a dead calm they averaged 55 miles an hour, but as I have mentioned they were not travelling at top speed. Other species of duck fly much faster than this, the speed of a merganser going down wind being something terrific, and if I mentioned my rough calculations made as to his speed with a stiff breeze behind him no one would believe me, so I will refrain from doing so.

One day in March, when a fresh breeze was blowing down the Hoy Sound in Orkney, mergansers were lost sight of in five seconds after passing the point upon which I was sitting. They are without doubt the fastest of our web footed birds, although other of the diving ducks, such as the goldeneye, fly at an enormous velocity.

The speed at which birds are travelling is very deceptive, for instance swallows appear to be going very fast, but rarely attain a speed of 30 miles an hour, whereas wild geese appear to be travelling very slowly when seen at a distance, but see them passing over you at dawn about fifty yards overhead and their wings look like flywheels, giving the birds the appearance of huge bees in the half light, so fast are their wings vibrating.

the Bengali nation upon Macaulay; and that is done for all time to come. National calumny is one of the most unpardonable crimes that writers are liable to commit. Such a crime was committed by Lord Macaulay when he penned his infamous libel upon the Bengali in his essay on Lord Hastings. The calumny struck; and being couched in attractive words was eagerly repeated and handed down from one generation of Englishmen to another as the quintessence of a sociological truth. But Nemesis was working an antidote slowly. She took more than fifty years to complete her work. But it is now nearly finished and is on view in Bengali."—Literary Digest.

LOST THINGS IN LONDON.

A Branch of Scotland Yard Appreciated by Forgetful People.

"That lost and found property department at Scotland Yard is one of the best things they have in London," said a woman who has spent much time in England. "Last summer I had experience with it."

"I fell into a sort of habit of losing things. First it was a valuable umbrella. I did not miss it until I got to my hotel after an afternoon supper. The next morning I made my husband take me to the theatre and the two restaurants where we had been the night before, but without result."

"Then an American friend suggested Scotland Yard. I went there, and there it was. It had been turned in by a cab driver."

"Twice afterward I lost that umbrella, and got it back in the same fashion, each time leaving as a reward for the cab driver a percent. of the value of the umbrella, as required. Then I lost a fine pair of opera glasses and I got them back."

"It is an excellent system the police over there have of encouraging honesty. A cab driver who finds anything in his vehicle is required to turn it in, and he knows that if the owner claims it he will be rewarded."

SENTENCE SERMONS.

No day is too short to be kind. A man of words is seldom a man of his word.

A little act may be larger than a great big aspiration.

Many present problems are past follies getting ripe.

Life is never art until through duty it passes to delight.

A man's wind in church gives no clue to his weight outside.

Too many want to be sirens where lighthouses are needed.

Happiness is in the discovery of the things that really matter.

You may know many men by the motives they see in others.

We would never learn to pray if all our prayers were answered.

Essays on problems are always more popular than essays at them.

It is more important to get ready to live than to be prepared to die.

It is better to be a man striving up than a god with nothing more to be.

One fool sets a fad and you know the rest by their trotting after him.

Folks who are always gilding the commandments often are dodging behind them.

They who make a success of attempting nothing always sneer at the great souls who fail.

GREATEST CONCENTRATION OF ENERGY.

Eminent Scientist Tells All That Science Knows About New Element.

Sir William Ramsay gave an illuminating address on radium and its emanations recently before the Authors' Club in London, England. Sir William touched on practically every phase of the subject as known to modern science.

Radium produces the most concentrated form of energy yet discovered. The energy is in the force of rays which the radium gives off. There are three varieties of rays.

The Alpha and Beta rays are something like minute particles shot out from the radium. The first are rays which can easily be kept in a glass tube. The second can pass through glass. Gamma rays are not particles at all, but waves or undulations of ether. These rays pass through six inches of lead, and possess the power of discharging an electroscope. Lead is, in fact, moderately transparent to the Gamma rays or undulations.

CONCENTRATED ENERGY.

The Alpha emanation of radium is the most concentrated form of energy known. The Austrian Government sometime ago entrusted one-fifty-fifth of an ounce of radium to Sir William for his private use. He and Dr. Gray performed the experiment of isolating the Alpha emanation; they enclosed it in a glass tube much finer than the finest thermometer tube ever made. They compressed it and liquefied it.

When liquefied it shone with a purplish light, though it was quite transparent, like water. It shone with a light of its own. When reduced to a temperature of minus sixty centigrade it solidified, and then it glowed with an extremely brilliant light like a miniature arc-light.

EXPERIMENTED.

The quantity they had was extremely small, but they ascertained its boiling point, its melting point and its specific gravity, and all this was done with a smaller quantity than the point of the finest needle. Of course they used a microscope.

It was a substance which went on changing into other things, to which various names were given. These substances were named radium A, radium B, radium C, and so on up to radium F. Some of them had a very short existence, lasting only half an hour or three-quarters of an hour, and he had never seen them.

GREAT HEAT.

During these emanations radium gave a great deal of energy, generally manifested as light, but as a matter of fact radium kept itself hot. There was a great deal of heat generated. It could be calculated; and it was found that it gave off about 3,500,000 times as much heat as would be given off by the oxyhydrogen blowpipe, which gave a temperature of over 2,000 degrees Centigrade. There they had surely, the greatest concentration of energy ever known. He doubted if ever they would get anything greater.

Passing Away of Old Customs and Elaborate Ceremonies.

Forty years ago it was a very trying ordeal to attend a wedding in China on account of the fearful din made by the band of musicians with their cymbals, flutes, fifes, drums, etc., to say nothing of the loud popping of firecrackers and skyrockets.

All this is being rapidly changed, says the North China Daily News. The band is still employed for such festive occasions, but is only allowed to play now and then, when desired. New China celebrates the nuptials of her sons and daughters at the home of the bride, instead of as in the old days when the young lady was taken in a closed sedan to the house of the bridegroom for the wedding festivities.

On one particular occasion the spacious hall was tastefully decorated with cedar chains wrapped around the large wooden pillars with strings of colored paper and flowers. A raised platform was at one end of the hall, on which stood a piano and an organ. The mother of the bride, being a widow, sat on the rostrum with two male relatives, the nearest of kin.

The bride was attired in the red silk robe and skirt as was the custom in former days, but it was a relief to her not to be blinded by the heavy red veil. Now she has only to wear the bride's crown with its hanging strings of beads. The mother read the marriage ceremony from a paper and placed it on the table, where it was signed by the bridal couple, the two kinsmen and herself. Congratulations were then offered to the bride and bridegroom by formal bows, after which the three elders stepped aside, allowing the generation below them to come upon the platform and offer their good wishes to the happy pair. The younger members of the family and relatives walked up with smiles and bows; all the old prostrations of past years have gone by forever.

The next thing on the programme was the presentation of written congratulatory papers. The first was presented by a gentleman, but following him came four ladies with papers written in beautiful literary style by their own hands and read by themselves.

Lastly, about twenty little girls from 4 to 8 years of age, ornamented with large satin rosettes, stood in a row before the bride and bridegroom and sang several verses of a kindergarten ballad. The bride and bridegroom, who had stood all this time on the platform, then stepped down to leave the hall.

SURGERY TO BE PAINLESS.

Operations Also Without Loss of Blood.

In the Boston (Massachusetts) Medical and Surgical Journal announcement is made of the discovery by Dr. John J. Hurley of this city, of a new method of producing conscious anaesthesia, both bloodless and painless, in human beings which promises a world-wide revolution in surgery, especially that of the brain and head.

The most delicate operations may be performed, he claims, on the brain and any part of the head, the eyes, the ear, the nose, and throat, with absolutely no discomfort to the

SIMPLE REMEDIES TO USE IN EMERGENCY.

Cold Water for Burns or Scalds—Virtues of Boric Acid are Many.

The following simple remedies will save you a lot of pain and trouble, if used in time:

If you burn or scald your fingers, plunge the hand instantly into cold water—the colder the better—and keep it there for five or ten minutes. The cold water removes all pain, and as long as the hand is kept there no pain—or practically none—will be experienced.

Sever burns of the body are often treated by plunging the sufferer, clothes and all, into a tepid, or warm, bath. But the best thing to do in this case until the doctor comes is to apply carron-oil, and dress the part in cotton-wool. Carron-oil—a bottle of which should be in every house—consists of linseed-oil and lime-water. Any oil, or vaseline, can be used.

But better even than carron-oil is carbolic-oil, which soothes pain and acts as an antiseptic.

BED FOR BURNS.

Severe burns cause a great shock and the healthiest and strongest person becomes exceedingly weak. Therefore, put the sufferer in bed at once, rolling him in warm blankets, and applying a hot-water bottle to the feet.

Cuts are often poisoned by being covered with not over-clean rags, cobwebs, stamp-paper, and other things, which are sure to have any number of microbes upon them. The proper treatment is to wash in cold water thoroughly, then wait until the bleeding moderates or ceases, and then bind round, not too tightly, with a piece of scrupulously clean cotton or linen. This should be steeped in a solution of boric acid, or sprinkled with dry boric acid.

To stop bleeding of the fingers, hand, arm, or foot, raise the part as high as possible. The best plan, in the case of, say, the hand, is to put it under the cold-water tap for a minute or half a minute, and then raise it above the head.

To cure corns, get from the chemist either five cents of salicylic plaster, or, better still, a small bottle of salicylic acid dissolved in ether, with a little Indian hemp to remove the pain. If either of these is applied steadily for a week or two the corn will disappear.

Colds in the head can generally be cut short if attended to at once.

A teaspoonful of whisky, or a small quantity of water with ordinary salt dissolved in it, or a saturated solution of boric acid—made by putting into hot water as much of the powder as will dissolve in it—should be squeezed* from a piece of cotton-wool into each nostril until the liquid runs down to the throat. Your cold will be gone in the morning.

BORIC ACID.

The virtues of boric acid, by the way, are not so well known as they should be. You can get a quarter of a pound for five cents, and it will effectually cure a dozen slight ailments.

controllable rage.
The painted warriors became
panic-stricken; they forgot their
chief and all thoughts of loyalty;
and fled on the instant, fear lifting
their heels high in the air.
But Naglyema and his son did
not fly. They caught the tails of
my coat, and we began to dance
from side to side, a loving triplet,
myself being foremost, to ward off
the blows savagely aimed at my
"brothers," and cheerfully crying
out:

"Hold fast to me, my brothers!
I will defend you to the last drop
of my blood! Come one, come all!"

Presently the order was given,
"Fall in!" and quickly the men
stood in two long lines in beautiful
order. Ngalyema relaxed his hold
of my coat tails, and crept from be-
hind, breathing more freely.

"Eh, mamma!" he exclaimed.
"Where did all these people come
from?"

"Ah, Ngalyema," I said, "did I
not tell you it was a powerful fe-
ish! Let me strike it again, and
show you what else it can do."

"No, no!" he shrieked. "I have
seen enough."

AN INDESTRUCTIBLE SNAKE.

A South American Lizard Met Its Match.

Snakes on the pampas of South
America have many enemies. Bur-
rowing owls feed on them, and so
do herons and storks, which kill
them with a blow of their javelin
beaks. The tyrant bird picks up
the young snake by the tail, and
flinging to a branch or stone, us-
ing the reptile as a flail until its life
is battered out. The large lizard
of the pampas, the iguana, is a
famous snake-killer. It smites the
snake to death with its powerful
tail. Mr. Hudson, in his "Natural-
ist in La Plata," tells this story:

One day a friend of mine was rid-
ing out, looking after his cattle.
One end of his lasso was attached
to his saddle, and the remainder of
the forty-foot line was allowed to
trail on the ground.

The rider noticed a large iguana
lying apparently asleep, and al-
though he rode within a few inches,
it did not stir. But no sooner had
the rider passed than the trailing
lasso attracted the lizard's atten-
tion.

It dashed after the slowly moving
rope and dealt it a succession of
violent blows with its tail.

When the whole of the lasso, sev-
eral yards of which had been pound-
ed in vain, had passed by, the igu-
ana, with uplifted head, gazed af-
ter it with astonishment. Never
had such a wonderful snake crossed
its path before.

THE MAN

Who shoots wild animals in Afri-
ca has a perfectly killing time;

Who sails up into the clouds in
his airship has a high old time;

Who seals up beer bottles has a
corking time;

Who plays golf in a cow pasture
in a red coat has a bully time;

Who reads Pickwick Papers has
the Dickens of a time;

Who slips on the ice and tears
his trousers has a ripping time;

Who is arrested for overspeeding
his motor has a fine time;

Who holds his fiancée on his lap
has a fair to middling time.

not. There was a great deal of heat
generated. It could be calculated;
and it was found that it
gave off about 3,500,000 times as
much heat as would be given off by
the oxyhydrogen blowpipe, which
gave a temperature of over 2,000 de-
grees Centigrade. There they had
surely, the greatest concentration of
energy ever known. He doubt-
ed if ever they would get anything
greater.

What did this energy do? It sent
out the Alpha rays at a velocity of
about 40,000 miles a second, and
these particles naturally carried a
great deal of energy. The Beta
rays, although only about one-thou-
sandth the size, also carried great
energy, owing to their enormous ve-
locity, which was still higher than
the Alpha rays.

DECOMPOSING POWER.

There were plenty of things they
could do with this energy. They
could decompose water and metal-
lic substances, and in these decom-
positions they found elements pro-
duced which they did not imagine
to exist in the substances so treat-
ed. For instance, in decomposing
ordinary copper sulphate they were
surprised to discover lithium in
what remained and no trace of the
copper salt. He had repeated this
experiment five times. The experi-
ments were still going on.

The phenomena which he had de-
scribed were hardly capable of ex-
planation. He had nothing to do
with it. He could only describe it
as an act of God. An act of God
had been described by an eminent
lawyer, who was a Scotsman, as an
act which no sensible man would
believe God would have performed.

CURATIVE PROPERTIES.

Dealing with the therapeutic pro-
perties of radium, Sir William re-
marked that it had been said that
radium cured cancer. He did not
believe it to be by any means cer-
tain. It was exceedingly doubtful,
though it had never been rightly
tried, and all one could say was
that there were things which had
been favorable to that suggestion.
In this week's *Lancet* there was an
account by Sir Lauder Brinton of
a case of cancer which was at least
ameliorated and life prolonged by
radium emanations. The Radium
Institute was making enquiries of
that kind with large quantities of
radium, and under efficient con-
trol. He thought they might post-
pone their decision as regarded the
cure of cancer, but there was no
necessity to postpone it with re-
gard to the cure of rodent ulcer.
It was a certain cure for that.

GERMANS TO RAISE MEAT.

Statistical tables are used to il-
lustrate the importance of meat
production in Germany, which was
formerly only a side issue of agri-
culture. To offset the high prices
of feeds it is pointed out that more
economy is needed in saving the
waste of the cities which may be
used for feeds or fertilizers, and
more feeds must be grown at home
if meat production is to be profit-
able. As the acreage in Germany
cannot be increased to any extent,
the yields per acre must be increas-
ed, and every available foot of land
must be utilized.

Try to make folks deeply happy
and their heavenliness will take
care of itself.

cit, of a new method of producing
conscious anaesthesia, both blood-
less and painless, in human beings
which promises a world-wide revo-
lution in surgery, especially that of
the brain and head.

The most delicate operations may
be performed, he claims, on the
brain and any part of the head, the
eyes, the ear, the nose, and throat,
with absolutely no discomfort to the
patient, who during it all is con-
scious.

On no occasion, says Dr. Hurley,
was any interference necessary af-
ter starting the patient under his
new anaesthesia, save giving the
patient some strong black coffee to
sip or a cigar to smoke, if the pa-
tient wished it for distraction.

He claims that the new method
will be of the greatest use in cases
of patients suffering from diseases
that prohibit the use of ether or
chloroform, such as consumption,
acute lung affections, diabetes and
nephritis.

Another thing which he described
as most important, and radically
different from the old way, is that
the patient can be given a full meal
just before and immediately after
the operation.

The doctor's discovery has been
demonstrated and accepted at the
Massachusetts Eye and Ear Infir-
mary. The patient was a woman 40
years of age, who was admitted to
the hospital for the removal of the
ossicles of the ear, a particularly
trying and delicate operation. The
operation was absolutely painless
and bloodless, say the doctors.

DANISH FARMERS.

Everything is Done by Co-operative Societies.

The Danish farmers, living as
they do on or near the seacoast, are
great exporters of dairy stuff. Eng-
land is so big a customer that the
Danes in fun reproach their neigh-
bors with eating up their butter,
and leaving them only oleomargarin.
"Yet," says Mr. F. M. Butlin in
"Among the Danes," "they are not
all of that way of thinking, for one
old farmer asked us if we could
not persuade our fellow country-
men to eat butter with their cake."

"If you ask how the Danish farm-
ers manage to keep pace with our
(the British) increasing appetite for
Danish eggs, butter and bacon, the
answer is, they co-operate. The
butter which is exported is made
in their co-operative dairies. The
pigs are slain in their co-operative
slaughter-houses, and the Danes
are not a little proud of the process.
One distinguished traveller com-
plains that during his stay in Den-
mark he was always being asked
to come and see a pig killed.

"The eggs are exported by co-
operative societies. If a Dane has
only one egg he can export it—al-
ways provided it be a good egg. No
mistake must be made about that.
Before the eggs are packed for ex-
port, down in the co-operative fac-
tory on the shore, they are held
over a basin filled with electric
light, when all defects can be de-
tected with the naked eye. It is no
use for an old to pose as a young
one; then. Each egg is marked with
the owner's number and the num-
ber of his district; the owners of
bad eggs are fined. No less than
eighteen thousand Danes belong to
this one society. Here, too, but-
ter is packed for the English mar-
ket."

of cotton-wood and such downy
the liquid runs down to the
throat. Your cold will be gone in
the morning.

BORIC ACID.

The virtues of boric acid, by the
way, are not so well known as they
should be. You can get a quarter
of a pound for five cents, and it will
effectually cure a dozen slight ail-
ments.

If your face feels sore after shav-
ing rub in a little boric acid mixed
with vaseline, and you will be at
ease. Do the same to pimples on
the face, and they will disappear.

If you have a boil on the neck,
the boric-acid ointment will cure it.
Are your lips chafed or your hands
chapped? Try a little boric acid
and vaseline. Are there pimples
over your body, making you feel un-
easy? The vaseline and boric acid
will disperse them in two nights.
Do you suffer from dandruff? Rub
in the vaseline and boric acid, and
the dandruff will disappear after
the first or second application.

It is also the doctor's great mod-
ern eye-cure—at least, for many
kinds of diseases of the lids and the
skin, or mucous membrane, about
the eyes. But for this purpose you
should get the lotion from the chem-
ist, for it must not be too strong.

OUT OF THE GINGER JAR.

The crow sticks steadfastly to his
caws.

The chewing-gum girl lives from
hand to mouth.

The night key is not usually the
key to success.

Even the wise men are occasion-
ally otherwise.

A mortgage on the house will
not prevent the roof from leaking.

It isn't worth while to call in a
veterinarian for a bad case of eggs.

The business of a promoter is to
persuade your money into his pocket.

A little vanity keeps a man keyed
up to his best, while too much ren-
ders him obnoxious to his fellows.

There is many a stump speaker
who would much better be at home
pulling the stumps from his own
clearing.

Bob—I see Smith in town. What
motive brought him? Bub—I don't
know for sure, but I think it was a
locomotive.

One ought always to get more in
his work than he hopes to get by
it.

Some of the real farmers com-
plain that the average city agricul-
tivist doesn't know a corn on the
hand from corn in the ear.

The man who sets out in life's
race expecting to have a walkover
is likely to be run over before he
has proceeded far upon his way.

FISH NOT "BRAIN" FOOD.

How many times have we been
solemnly informed that "fish is a
brain food?" There is no founda-
tion whatever for the belief that
fish contains any particular ele-
ments which adapt them especially
as food for the brain or which sup-
port mental efforts. The value of
fish as a food to persons engaged
in mental labor is found in the fact
that fish do not contain large quan-
tities of those materials which de-
mand much physical exercise or ex-
ertion for their complete assimila-
tion.

No man can carry a great burden
who does not know how to set it
down and forget it at times.

MEN!

Let us show you some of our new spring styles in comfortable, serviceable Footwear.

We have every style and shade for the young man, middle aged man, or elderly gentleman.

Howard Storey a resident of Rich-
mond, was brought to Napanee on
Monday violently insane. He was
confined in the police cells and after
a day and a night of raving died on
Tuesday evening. Deceased was aged
thirty years and one month.

Napanee Lodge No. 86, I.O.O.F. will
run their annual excursion on Civic
Holiday, the second Wednesday in
August. The excursion this year will
be to Toronto and Niagara Falls. The
excursion will go on a special train to
Toronto, boat to Niagara and return,
and return home on any train.

All accounts due me has been placed
in the hands of Manly Jones, Napanee,
for collection and anyone owing me
will please attend to it at once and
save further notice, as these accounts
must be settled for promptly.

THEOPHILUS JONES.

Forest Mills, March 28th, 1910.

16-b

C. H. Spencer, of Roblin, has pur-
chased the farm south of the river,
formerly owned by Alex. Campbell, a
distant relative. Painters are at work
now on the inside of the house. He
proposed adding a furnace and bath
room which will put the house in fair-
ly good shape. Mr. Spencer and
family intend moving to their new
home about July 1st.

On Sunday, at noon, Mrs. Sarah A.
Turner, wife of G. W. Turner, Alfred
street, Kingston, passed away after a
week's illness from bronchitis. The
deceased, whose maiden name was
Sarah Amelia Lucas, daughter of the
late George Lucas, Odessa, was born in
Odessa forty-four years ago. Besides
her husband she leaves one daughter,
Miss Emma, one sister, Mrs. R. W.
Aylesworth, Odessa, and three brothers,
Joseph, George and Dennis, Odessa.
The funeral services were conducted by
the Rev. C. A. Sykes, on Wednes-
day afternoon, from her late residence

Chair Paint.

"Get it at Wallace's", all colors that
dry hard and wear well.

Kodaks and Supplies.

Get them at Wallace's Drug store,
The Napanee agency. We do the de-
veloping, printing, etc. Mail orders
promptly attended to.

Postponed.

The next meeting of the Napanee
Ladies' Musical Club has been post-
poned until Saturday afternoon,
April 9th, at four o'clock.

Paints and Oils.

When you buy paint buy it good, it
takes no longer to put on than the
cheap stuff. Ask for Moore's & Rob-
ertson's, each and every can guaran-
teed at

BOYLE & SON'S.

Men's Fashion Hint.

Summer homespun are going to be
much worn by both ladies and gentle-
men this year—at least this is the view
of one of the Hewson Woollen Mill
travellers who had an order book well
filled with Spring business the other
day.

Fertilizer.

I will have a car of the very best
fertilizer Material, at Napanee about
the 18th of April. Ready for delivery
in any quantity with full instructions
how to apply it. This is an article that
no farmer can afford to ignore. Call
and get a test lot.

W. A. ROSE.

Another Robbery.

On Wednesday evening thieves en-
tered Mr. Windover's grocery on Cen-
tre street and secured a considerable
quantity of canned goods and grocer-
ies. The cash register was smashed to
pieces though it contained but a few
cents and the key was in the lock. No
clues have yet been found of the per-
petrators of any of the recent rob-
beries.

A New Livery Stable.

C. H. Finkle, Newburgh, who re-
cently purchased the livery stables of
A. McIlquham, Clarence street, took
possession on Friday last. Mr. Finkle
has added numerous new rubber tired
vehicles and several fine new horses.
He also has a large twenty passenger
sight-seeing automobile which will run
from Napanee to the city besides run-
ning around the city to meet boats and
trains. The new concern is doing a
fine business and has one of the best
outfits in the city—Whig.

Card of Thanks.

I desire to thank the Odd Fellows
Relief Association for their prompt
settlement of the policy held by my
late husband, E. A. Wagar, in the
Association. The claim papers were
received by the Association on March
30th, 1910, and in settlement of the
claim was issued to me and mailed the
same day, and received March 31st, 1910.
The promptness of the Association in
settlement of this claim speaks volumes
for the Association and the efficiency
of its management.

HENRIETTA M. WAGAR.

Assizes.

The Spring Assizes for the County of
Lennox and Addington open at the
Court House on Monday before His
Lordship, Chief Justice Sir Glenholme
Falconbridge. The following cases
have been entered for trial:

Beausoleil vs. C. P. Ry.—An action
for damage for loss by fire caused by
the engine of the defendant. W. G.
Wilson for plaintiff, Angus Mach-
mure, K. C. for defendant.

Boonhower vs. Walsh—An action
for breach of promise of marriage
brought by Jennie Dell Boonhower,
an infant by Andrew Boonhower her
next friend. The parties all reside
near Croydon. W. G. Wilson for
plaintiff, Herrington, Warner &
Grange for defendant.

Hicks vs. Burns—An action brought
by Geo. A. Hicks against Robt. E.
Burns, Assignee of Margaret E. Hicks,
an insolvent of Ernestown station, to

We Are Still Doing Business At the Old Stand.

One of our specialties is the Pedlar Galvanized Steel Roofing. It has proved itself superior to all other roofing and as a consequence is rapidly growing in favor.

We represent the Perrin Stone and Stove Co., of Smith Falls. Their goods are too well and favorably known to require any comment.

The Wilkinson Plow Co., Toronto.
The Percival plow and Stove Co., Merrickville.

The J. Henry's Sons Plow Co., Curvina.

The Sylvester Mfg. Co., Lindsay, in their various lines.

The T. E. Bissell Co., Elora, Rollers and Disc Harrows, the best in the market.

The Dominion Wrought Iron Wheel Co's wagons, Orillia.

The Bain Mfg. Co., Welland, Ont. Farmers, be sure and see and examine the Bain Vertical Lift mower before placing your order elsewhere.

The Premium Cream Separator Co., Toronto. If you would have the best in the market buy the Premium, simple in construction, easily cleaned and easy running, cleanest separator.

Call and see our Karra Pruning knife. It's a wonder.

Last, but not least, don't miss seeing and testing the Perrin hammock, which for comfort and durability throws all other hammocks in the shade.

POTTER & BLANCHARD.

No Disordered Kidneys or a Weak Bladder if You Take a Few Doses of FIG PILLS.

All Backache and Distress from Out of Order Kidneys or Bladder Trouble will vanish, and you will feel fine. Lame Back, Painful Stitches, Rheumatism, Nervous Headache, Dizziness, Sleeplessness, Worn-out, Sick Feeling and other symptoms of Sluggish, Inactive Kidneys and Liver disappear. Smarting, Frequent Urination and all Bladder Trouble ends. Fig Pills go at once to the disordered Kidneys, Bladder and Urinary System, and complete a cure before you know it. There is no other remedy, at any price, which will effect so thorough and prompt a cure as a 25-cent box of Fig Pills. Only curative results can come from taking Fig Pills, and a few doses may clean active, healthy Kidneys, Bladder and Liver—and No Backache.

For sale at all first class drug stores. 25c a box or five boxes for one dollar. 15cm

JAMES WALTERS,

Merchant Tailor, Napanee.

TRINITY METHODIST CHURCH

Sunday, April 10th, 1910.

Morning service at 10.30 a. m.
Sunday school at 12 a. m.
Evening service at 7 p. m.
The Pastor, Rev. G. W. McCall will occupy the pulpit both morning and evening.

PERSONALS

Neilsons Ice Cream delivered any time you want it. Jessop's.

Mr. and Mrs. Ben Luffman left for Calgary last Monday.

Mr. W. A. Grange attended Finkle's sale in Newburgh, last Tuesday.

Mr. and Mrs. E. J. Keenan have returned to their home in Winchester after spending the Easter holidays with Mrs. Keenan's parents, Dr. and Mrs. Edwards.

Mrs. J. Snider and Mrs. Charles Snider, Odessa, spent last week guests of Mrs. Snook, south river road.

Mr. A. P. S. Donaldson, manager of the Northern Crown Bank at Odessa, has been transferred to Winnipeg, Man.

Mr. and Mrs. John A. Fraser, after spending the winter with friends in Kingston, returned to town Thursday.

The Misses Graham, Kingston, spent Sunday the guests of Mr. and Mrs. J. J. Graham.

Miss Florence Warner, of Colebrook, was in town Monday, on her way to Emerald, Amherst Island.

Mrs. Learoyd and son Lyall, of Ottawa, and Mrs. Alice Gibson, of Napanee, were visiting Mrs. A. C. Warner and family, of Colebrook, this week.

Mr. and Mrs. Will Grange went to Kingston, Thursday.

Mr. George Perry left for Cleveland, Friday, to take a position on one of the big steamers.

Rev. and Mrs. Cairns arrived home last Saturday evening from their trip to England.

Miss Cowan, George St., Toronto, gave a small tea on Saturday afternoon last in honor of her cousin, Miss Kathleen Cowan, and the third year class at Victoria College.

Mrs. Jas. Perry, of Philadelphia, was called here this week on account of the serious illness of her sister, Miss McGuin. Miss McGuin is improving somewhat.

Master Gray Eakins returned from a trip to Toronto last Saturday.

Miss Blanche Peters and Mr. R. Osborne spent Sunday at Hayburn the guest of Mrs. N. Peters.

Mrs. R. M. Brisco, Chatham, is the guest of Mr. and Mrs. Ben Brisco, Ernestown.

Mr. W. A. Rose left on Monday for a business trip to New York. He will be gone about ten days.

Mr. Sylvester Hogaboon left on Monday with a car of effects for Brownlee, Sask.

Messrs. C. Haines, Albert Websdale and Otis Storms left on Monday for the west.

Mr. F. C. Anderson, wife and family Vankleek Hill spent Monday in Napanee.

Mrs. Jos. Magee and little son, Frank returned after spending a very pleasant week with friends in Hamilton.

Spring Tonic.

Now is the time to take a good Tonic to chase the cobwebs from your brain and get your blood clean. Get one at Jessop's.

BIRTH

DAFOE—At Napanee, on Tuesday, April 3rd, 1910, to Mr. and Mrs. Harry Dafoe, twins, boy and girl.

GIBBARD—At Napanee, on Friday, April 1st, 1910, to Mr. and Mrs. George Gibbard, a son.

SELBY.

Miss File, teacher, spent the holidays at her home near Napanee.

Miss Sarah Fitzpatrick spent Sunday under the parental roof.

Mrs. Charles Boyd gave a pleasant "At Home" to a few of her friends on the 28th ult.

Messrs. McQuaigh, Rikley Anderson and McCormick, of the N. C. I., spent their holidays at their respective homes here.

George Paul spent Saturday in town. Mr. and Mrs. Thomas J. Donahue and little daughter, Mary, of Erinsville, were at the "Lawn House" on Sunday.

Diamond Dyes, standard or Dyola Dye, 3 for 25c at Wallace's—The Leading Drug Store, Napanee.

ENTERPRISE.

A gloom was cast over this community by the death of Mrs. Abraham Loucks, of Napanee. She leaves a husband, one son, Willis, of Edmonton, and one daughter, Miss Della, at home, besides four sisters and three brothers.

The death of John V. Wagar was a great shock as he had not been sick long. He leaves one sister, Mrs. Bern Lucas, Odessa, and four sons, Marcal and Wesley, of Centreville, J. D. and Charles D., of Enterprise. The latter left Enterprise on the 6th of January and no one knows anything of his whereabouts since that time.

Mrs. Earl Bell is very low with measles and heart trouble.

Miss Gertie Hayes is ill of diphtheria. Alfred Cousins is moving down to Big Creek and P. J. Murphy is taking his place at Thomas Clancy's farm.

Ferguson Black, of the Northern Crown Bank, Enterprise, has been stationed at Woodstock and Mr. Johnson has been sent here in his place.

It Kills Lice.

Many powders and liquid preparations have been recommended, and sold for killing lice on cattle, poultry, pigs, etc., but in our experience we have met with nothing that has given such general satisfaction as "Empire Dusting Powder," sold in large packages at 25 cents. We refund the price if it does not do the work. The Medical Hall, —Napanee's Largest Drug Store, Fred L. Hooper, sole agent for Napanee.

ANOTHER STAR.

On Saturday next, April 9th there will be issued from the office of the Toronto Daily Star the first number of a new five-cent paper, to be named "The Toronto Star Weekly." One might naturally suppose the newspaper field was filled to overflowing, and that there could be no fixed place in the newspaper firmament for even another star—but the management have traveled to more successes than one under the banner inscribed "find a place or make one," and they mean that there shall be no exception to this rule in putting "The Toronto Star Weekly" in the field.

There is always demand for the "better goods" and from every viewpoint in bright and aggressive newspaper production to-day "The Toronto Star Weekly" will be the best yet in Canada.

Mr. Joseph T. Clark will be the editor, and he has gathered about him an army of associates and contributors that will be a warrant for the quality of the matter, whether it be on the affairs of everyday life, morals, literature, politics, business, amusements, sports, successes or failures.

"The Toronto Star Weekly" will contain serial fiction, short stories, anecdotes of public men, cartoons, comics, and a score more features in a 16-page paper, with seven columns to the page, excellently and freely illustrated in fine half-tone reproductions, and printed on a superior paper—a no mean competitor to the best illustrated English and American publications.

Get the first number, April 9th, if only to read "The Spell of the White Silence," by Robert W. Service, poet of the Yukon, author of "Songs of a Sourdough," and "Songs of a Cheekako." His first appearance in print as a writer of fiction. 17-b

Dr. de Van's French Female Pills—the Wife's Friend.

A reliable regulator; never fails. While these pills are exceedingly powerful in regulating the generative portion of the female system, they are strictly safe to use. Refuse all cheap imitations. Dr. de Van's are sold at \$5.00 a box, or three for \$10.00. Mailed to any address. The Seaball Drug Co., St. Catharines, Ont.

Next door to Post Office, Napanee.

ANNUAL VESTRY MEETING OF THE CHURCH OF ST. MARY MAGDALENE, NAPANEE.

The Annual Vestry Meeting of the Church of St. Mary Magdalene, Napanee was held on the evening of the 4th, inst., and was very well attended. The chair was occupied by the Vicar the Rev. F. T. Dibb. The minutes of the last Vestry Meeting were read by the clerk, approved and confirmed.

The financial statement showed all branches of the Church's work to be in a satisfactory and healthy condition. The total receipts for the year amounted to over \$3,000, of which amount over \$100.00 was sent outside the parish for Missions and other funds. The Sunday offertories showed a most gratifying increase both in the envelopes and the loose offerings. The reports of the Churchwomen's Guild, The Woman's Auxiliary and the Altar Chapter showed them all to be doing good work and their finances to be in good condition.

The retiring wardens Mr. T. B. Wallace and W. S. Herrington, K. C. declined re-election having served for two successive years, and Mr. R. G. H. Travers was unanimously chosen as

... G. amount about \$100.00 was sent out to the parish for "Missions and other funds. The Sunday offerings showed a most gratifying increase both in the envelopes and the loose offerings. The reports of the Churchwoman's Guild, The Woman's Auxiliary and the Altar Chapter showed them all to be doing good work and their finances to be in good condition.

The retiring wardens Mr. T. B. Wallace and W. S. Herrington, K. C. declined re-election, having served for two successive years, and Mr. R. G. H. Travers was unanimously chosen as people's warden, while the Vicar named Mr. Willet Dollar as his warden. Upon motion it was decided that an advisory Board of four members of the congregation in conjunction with the Vicar should be appointed to assist the wardens, should their services be required, and Messrs. F. F. Miller, G. F. Rutan, K. C. T. B. Wallace and W. S. Herrington, K. C., were named as members of the Board, to be called at the request of either the Wardens or the Vicar. On motion it was resolved that the Vicar be asked to take a holiday during the summer for the benefit of his health and general recuperation, he to choose his own supply during his absence, the vestry to supply the funds for the same.

A letter of thanks was read from the Vicar and Mrs. Dibb to the Vestry and congregation for the sympathy expressed in their recent bereavement. On motion of Mr. F. G. Rutan a resolution of very grateful thanks and appreciation of the work done by the Vicar in the parish during the year, his ready help and assistance, his warm sympathy and earnestness was passed by a rising vote, and one of the most pleasant and harmonious vestry meetings ever held in the parish was brought to a conclusion by the saving of the grace by the vicar.

The congregation re-elected Mr. R. G. Wright as lay delegate to the synod, Mr. Ernest Walters was retained as Vestry Clerk, and T. B. Wallace and W. S. Herrington were added to the list of sidesmen.

Verandah chairs made new with coat of our Verandah chair paint. Roger's floor stain, Liquid granite, boat and spar Varnish, best quality at

Western Methodist Cemetery

A meeting of the plot holders will be held at the office of Mr. A. Paul, Secy. Treas., on Friday, April 15th, at 1 o'clock. All plot holders are requested to be present.

To Varnish over Graining.

If you intend having any graining done or to have any grained work renewed. Be sure you use "Copallin Varnish" its the best to be had. Get at Wallace's Drug store.

Complimentary Banquet.

The Committee on Music of Trinity Church tendered the members of the choir and orchestra of the church a complimentary banquet in the dining hall of the church on Friday evening last. About sixty guests were present and enjoyed to the full the splendid supper provided and the after dinner toast list. Mr. A. C. Baker chairman of the music committee acted as chairman.

Important to Ladies.

It is not often an opportunity occurs at your door to see the latest Parisian and New York styles in Hair Goods, yet such is the case, as Prof. Dorenwend of Toronto is visiting this town, and invites your inspection of these goods at his private apartments reserved at the Hotel. These Hair Goods styles, when properly adjusted protect and ornament the head, soften and beautify the expression of the face, and consequently tone up an aged appearance. Be sure and see them at Paisley House on Tuesday April 19th.

Spring tonic.

Now is the time to take a good Tonic to chase the cobwebs from your brain and get your blood clean. Get one at Jessop's.

BIRTHS.

DEATHS.

PHIPPEN At Conway, on Monday, April 14th, 1910, Mrs. Richard Phippen, aged 80 years.

STOREY At Napanee, on Tuesday, April 5th, 1910, Howard Storey, Richmond, aged 30 years and 1 month.

Neilsens Chocolates.

Pure High Grade and delicious at Jessop's.

HALLEY'S COMET.

(Monday's Toronto Star.)

Did you get up this morning to have a peep at Halley's Comet, and then get left? Comets are kittle-cattle anyway and this one of the late Mr. Halley is as bashful as the traditional maiden about showing its face in public.

Up at the Observatory, where they know all about these queer things, The Star was told the reason why the comet was hard to find. It appears that it rose only fifty minutes ahead of the sun this morning, and by that time the light had grown so strong it is almost impossible to see any stars at all. Then, again, the comet is very far down in the eastern sky, and there is every likelihood of that horizon being obscured by a haze just before sunrise.

So, you see, there isn't much use in running a risk of catching a severe cold in your head by getting up at unholy hours to see comets which can't be seen.

However, a better time is coming rapidly. The comet is "going some" as the saying is, and the speed with which it is moving through space will shortly swing it into such a position that there will be no necessity for telescopes with which to see it. Following are a few of the times which have been worked out in connection with the heavenly wonder.

Monday the comet rose 50 minutes before the sun; on the 16th of the month it will rise an hour and a half before it, on the 24th an hour and fifty-five minutes before it, on May 6th two hours and ten minutes before it, and on May 10th two hours and twenty minutes before it. You may look for it then, if you have the courage to get up, but it would be better to wait a little while longer, and get it when it can't get away from you.

Up to this point the comet has been swinging away from the sun; now it turns and rushes back at it. On May 14th it rises just two hours ahead of the sun, and on the 16th one hour and a half ahead. By this time it is getting hard to see again. Then it swings over to the evening, or western sky, and the average citizen gets his chance.

On May 22nd it will set two hours and forty-five minutes after the sun sets, on May 24th three hours and twenty minutes after it, on the 25th three hours and fifty minutes, and on the 28th four hours and five minutes after sunset. By this time the sky will be total y dark, and the comet should stand out brightly. After that it begins another dash at the sun, setting on the 30th of the month, only three hours and fifty minutes after it.

So this is the tail of the comet. It would be better to wait till it consents to be seen easily, because there is every likelihood of mists in the early morning.

A Big Give Away.

Beginning with Saturday, April 2nd, we will give to each of our first five hundred customers, a bottle of Liquid Veneer (the stuff that makes old furniture look like new). Be sure that you get one before they are all gone. The Medical Hall, Napanee's Largest Drug Store—Fred L. Hooper.

packages at 25 cents. we refund the price if it does not do the work. The Medical Hall, Napanee's Largest Drug Store, Fred L. Hooper, sole agent for Napanee.

You Can Even Do Your Toronto Shopping Through "The Star"

The Star's "In Toronto Shops" Department describes new and attractive offerings seen in City Shops day by day, with the Toronto Daily Star's offer to purchase any of these articles for out-of-town subscribers who send the money. Many are taking advantage of this Department.

"Of Interest to Women" is the well-deserved heading of a special page in the Toronto Daily Star. It is one of two and sometimes three pages devoted particularly to women's tastes and is independent of the "Social and Personal" and "Madge Merton's" pages, for years popular features of the Star.

"Of Interest to Women" includes scores of little hints on health and beauty; the newest fashions in dress and house furnishings; talks on ethical matters of particular interest to women; points of etiquette; suggestions for home entertainment; recipes; daily menus; advice and suggestions on all the matters that lie close to a woman's heart. They will help solve household problems, and better still, stimulate and interest the mind.

On the Woman's page, and throughout the paper, current topics are treated in a bright, newsy way that appeals to the wide-awake woman. You'd thoroughly enjoy the
